

# 2026 The Best AI-900: Microsoft Azure AI Fundamentals Reliable Exam Pass4sure

P.S. Free & New AI-900 dumps are available on Google Drive shared by FreePdfDump: <https://drive.google.com/open?id=1jTaxmsZXM3IQriDRzfwy7nk4hC5c2p5F>

The Microsoft AI-900 exam offers a great opportunity for beginner and experienced to validate their expertise in a short time period. To do this they just need to pass the Microsoft Azure AI Fundamentals AI-900 Certification Exam which is not an easy task. And FreePdfDump offers latest AI-900 exam practice, exam pattern and practice exam online.

In today's rapidly evolving technological landscape, AI is becoming increasingly important in many industries, including healthcare, finance, and retail. As such, the Microsoft AI-900 certification provides a valuable credential for individuals who want to stand out in the job market and demonstrate their expertise in this field. Whether you are a developer, data scientist, or IT professional, the Microsoft AI-900 certification can help you advance your career and take advantage of the many opportunities available in the world of AI.

Microsoft AI-900 Certification Exam is an ideal starting point for individuals who want to build a career in AI and ML. Microsoft Azure AI Fundamentals certification exam is designed to test your foundational knowledge of AI and ML concepts and how they can be applied to the Azure platform. By passing the AI-900 exam, you will gain a better understanding of how AI and ML can be used to solve real-world problems, and you will be able to use Azure AI services and tools to build intelligent applications.

## AI-900 Exam Papers | Valid AI-900 Exam Bootcamp

The wording is fully approved in our AI-900 Exam Guide. They handpicked what the AI-900 exam torrent usually tests in exam recent years and devoted their knowledge accumulated into these AI-900 study tools. Besides, they keep the quality and content according to the trend of the AI-900 practice exam. As approved AI-900 exam guide from professional experts their quality is unquestionable. Our agreeable staffs are obliging to offer help 24/7 without self-seeking intention and present our after-seals services in a most favorable light. We have patient colleagues offering help and solve your problems and questions of our materials all the way.

Microsoft AI-900 certification exam is ideal for individuals who work with Azure cloud services or plan to migrate their applications to the Azure cloud. AI-900 exam is also suitable for IT professionals, developers, data analysts, and business analysts who want to gain a basic understanding of AI and its applications in the cloud environment. The AI-900 Certification is a valuable addition to the resume of anyone interested in AI and machine learning.

## Microsoft Azure AI Fundamentals Sample Questions (Q172-Q177):

### NEW QUESTION # 172

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
A webchat bot can interact with users visiting a website.	<input type="radio"/>	<input type="radio"/>
Automatically generating captions for pre-recorded videos is an example of conversational AI.	<input type="radio"/>	<input type="radio"/>
A smart device in the home that responds to questions such as "What will the weather be like today?" is an example of conversational AI.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

Statements	Yes	No
A webchat bot can interact with users visiting a website.	<input checked="" type="checkbox"/>	<input type="radio"/>
Automatically generating captions for pre-recorded videos is an example of conversational AI.	<input checked="" type="checkbox"/>	<input type="radio"/>
A smart device in the home that responds to questions such as "What will the weather be like today?" is an example of conversational AI.	<input checked="" type="checkbox"/>	<input type="radio"/>

### NEW QUESTION # 173

To complete the sentence, select the appropriate option in the answer area.

The interactive answering of questions entered by a user as part of an application is an example of

anomaly detection.
computer vision.
conversational AI.
forecasting.

**Answer:**

Explanation:

The interactive answering of questions entered by a user as part of an application is an example of	<table border="1"> <tbody> <tr> <td>anomaly detection.</td> </tr> <tr> <td>computer vision.</td> </tr> <tr> <td>conversational AI.</td> </tr> <tr> <td>forecasting.</td> </tr> </tbody> </table>	anomaly detection.	computer vision.	conversational AI.	forecasting.
anomaly detection.					
computer vision.					
conversational AI.					
forecasting.

### NEW QUESTION # 174

To complete the sentence, select the appropriate option in the answer area.

When developing an AI system for self-driving cars, the Microsoft for responsible AI should be applied to ensure consistent operation system during unexpected circumstances.

principle of the  
inclusiveness  
accountability  
reliability and safety  
fairness

**Answer:**

Explanation:

When developing an AI system for self-driving cars, the Microsoft for responsible AI should be applied to ensure consistent operation system during unexpected circumstances.

principle of the  
inclusiveness  
accountability  
reliability and safety  
fairness Microsoft

Explanation:

When developing an AI system for self-driving cars, the Microsoft for responsible AI should be applied to ensure consistent operation system during unexpected circumstances.

principle of the  
inclusiveness  
accountability  
reliability and safety  
fairness Microsoft

**Reliability and safety:** To build trust, it's critical that AI systems operate reliably, safely, and consistently under normal circumstances and in unexpected conditions. These systems should be able to operate as they were originally designed, respond safely to unanticipated conditions, and resist harmful manipulation.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/responsible-ai-principles/4-guiding-principles> AI systems should perform reliably and safely. For example, consider an AI-based software system for an autonomous vehicle; or a machine learning model that diagnoses patient symptoms and recommends prescriptions. Unreliability in these kinds of system can result in substantial risk to human life.

<https://docs.microsoft.com/en-us/learn/modules/get-started-ai-fundamentals/7-understand-responsible-ai>

## NEW QUESTION # 175

Match the AI solution to the appropriate task.

To answer, drag the appropriate solution from the column on the left to its task on the right. Each solution may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Solutions	Answer Area
Computer vision	Generate a caption from a given image.
Data mining	Generate an image from a given caption.
Generative AI	Generate a 200-word summary from a 2,000-word article.
Text analytics	

Microsoft

**Answer:**

Explanation:

**Solutions**

- Computer vision
- Data mining
- Generative AI
- Text analytics

**Answer Area**

Computer vision	Generate a caption from a given image.
Generative AI	Generate an image from a given caption.
Text analytics	Generate a 200-word summary from a 2,000-word article.

Explanation:

**Solutions**

- Computer vision
- Data mining
- Generative AI
- Text analytics

**Answer Area**

Computer vision	Generate a caption from a given image.
Generative AI	Generate an image from a given caption.
Text analytics	Generate a 200-word summary from a 2,000-word article.

### NEW QUESTION # 176

Select the answer that correctly completes the sentence

**Answer Area**

Object detection	is used to identify multiple types of items in one image.
Image classification	
Image description	
<b>Object detection</b>	
Optical character recognition (OCR)	

Answer:

Explanation:

**Answer Area**

Object detection	is used to identify multiple types of items in one image.
Image classification	
Image description	
<b>Object detection</b>	
Optical character recognition (OCR)	

Explanation:

**Answer Area**

Object detection	is used to identify multiple types of items in one image.
------------------	---

According to the Microsoft Azure AI Fundamentals (AI-900) official study guide and Microsoft Learn module "Identify features of Computer Vision workloads on Azure", Object Detection is a specific computer vision capability used to identify and locate multiple types of objects within a single image. Unlike image classification, which assigns one label to an entire image, object detection identifies individual objects, their categories, and their positions using bounding boxes or polygons.

In practical terms, Object Detection combines two key outputs:

\* Classification - recognizing what the object is (for example, "car", "person", "dog").

\* Localization - determining where the object appears in the image by drawing bounding boxes around it.

This technology is commonly used in scenarios such as traffic monitoring (detecting vehicles and pedestrians), retail shelf analysis (detecting products and inventory levels), and manufacturing quality control (identifying defective parts).

Microsoft's Azure Cognitive Services - Custom Vision includes a dedicated Object Detection domain, which allows developers to train custom models to recognize multiple object types within a single image. The service uses deep learning techniques, particularly convolutional neural networks (CNNs), to process pixel patterns and spatial relationships for accurate detection.

For contrast:

\* Image Classification identifies only the overall category of an image (e.g., "This is a cat").

\* Image Description generates captions summarizing the visual content (e.g., "A cat sitting on a couch").

\* Optical Character Recognition (OCR) detects and extracts text from images, not physical objects.

Therefore, per the official AI-900 learning content and Azure documentation, when the goal is to identify multiple types of items within a single image, the correct AI workload is Object Detection.
