NEW QUESTION # 20

How can an administrator synchronize licenses from the production org when preparing a sandbox for development?

- A. Run the Match Production Licenses to Sandbox without a Refresh tool in Setup
- B. Use a custom shell script
- C. Export a Change Set
- D. Import a Change Set

Answer: A

Explanation:

The best way for an administrator to synchronize licenses from the production org when preparing a sandbox for development is to run the Match Production Licenses to Sandbox without a Refresh tool in Setup. This tool allows administrators to match their sandbox licenses with their production licenses without refreshing their sandbox. This way, the administrator can ensure that the sandbox has the same number and type of licenses as the production org, and avoid any license-related issues when developing or testing in the sandbox. NEW QUESTION # 23

Which two practices are needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects?

- **A. The types must match within reason**
- **B. The names must be an exact match**
- C. The names must only contain letters and underscores
- D. The types must be an exact match (i.e. String to String)

Answer: A,B

Explanation:

Explanation

Two practices that are needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects are:

The types must match within reason. The data type of the custom attribute in Order Management must match or be compatible with the data type of the corresponding attribute in the external system, such as B2C Commerce or B2B Commerce. For example, if the attribute is a string in B2C Commerce, it must also be a string in Order Management.

The names must be an exact match. The name of the custom attribute in Order Management must be exactly the same as the name of the corresponding attribute in the external system, including capitalization and punctuation. For example, if the attribute is named "kitItem" in B2C Commerce, it must also be named "kitItem" in Order Management.
