1z0-1075-25 Exam Assessment, Hot 1z0-1075-25 Spot Questions

Everybody knows that Oracle is an influential company with high-end products and best-quality service. It will be a long and tough way to pass 1z0-1075-25 exam test, especially for people who have no time to prepare the 1z0-1075-25 Questions and answers. So choosing right 1z0-1075-25 dumps torrent is very necessary and important for people who want to pass test at first attempt.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q40-Q45):

NEW QUESTION # 40

A Production Supervisor queries a work order, WO-1025, from the Manage Work Orders page. On the Entering Edit Work Order: WO-1025 page, the supervisor finds a General Information, Operations, and History tab, but no Reservations tab. What are two reasons for the Reservations tab not being displayed for WO-1025?

- A. It is not a Drop-Ship work order.
- B. It is not a Pick-to-Order work order.
- C. It is not a Back-to-Back work order.
- D. It is not a Plan-to-Produce work order.
- E. It is not a Configured Item work order.

Answer: C,E

Explanation:

In Oracle Manufacturing Cloud, the Reservations tab on the Edit Work Order page is displayed only for specific types of work orders that require reservations of components or materials. The absence of the Reservations tab in work order WO-1025 indicates that the work order is not one of the following types:

* Configured Item Work Order (A) : Configured items are typically built based on specific customer requirements, and reservations of components are often necessary. Since WO-1025 is not a configured item work order, the Reservations tab is not shown.

* Back-to-Back Work Order (E) : Back-to-back work orders are linked to sales orders and require reservations of materials to fulfill the specific demand. Since WO-1025 is not a back-to-back work order, the tab is not displayed.

Incorrect options:

* B, C, D : Drop-Ship, Pick-to-Order, and Plan-to-Produce work orders do not typically require reservations in the same way as configured or back-to-back orders, which is why they are not the reasons for the absence of the Reservations tab.

Oracle Cloud documentation on work order types and the Reservations tab explains the conditions under which reservations are required and when the tab is displayed.

NEW QUESTION # 41

Your client's company is in a regulated industry and must keep detailed records of their product manufacturing processes in accordance with the United States Food and Drug Administration (FDA) regulation on electronic records and signatures called 21 Code of Federal Regulations (CFR) Part 11.

You are implementing Oracle E-Signatures and E-Records for securely capturing, storing, retrieving, and printing electronic records and signatures in manufacturing. They enable Deferred Electronic Records and Electronic Signatures for Manufacturing Work Order Release in Oracle Manufacturing Cloud.

Which statement is NOT true about using Deferred Electronic Records and Electronic Signatures for Manufacturing Work Order Release?

- A. Using a deferred approval process with notifications, the work order is held in "Released" status until the approvals are obtained.
- B. These capabilities are supported for discrete and process work orders.
- C. It generates e-records on initial work order release through UI and sends notifications to approvers.
- D. If the e-record is rejected, you can optionally resubmit the rejected electronic records.

Answer: A

Explanation:

When implementing Oracle E-Signatures and E-Records for compliance with 21 CFR Part 11 in regulated industries like the pharmaceutical or food industries, certain processes govern how electronic records and signatures are managed for manufacturing work orders. The statement that is not true is:

* Statement B is incorrect because when using deferred electronic records and signatures, the work order is not held in a "Released" status until approvals are obtained. Instead, the work order is placed in a "Pending Approval" state until signatures are collected and approval is granted. Only after approval does the work order move to a "Released" status.

Correct statements:

* Statement A : E-records are generated at the time of work order release, and notifications are sent to approvers for review.

* Statement C : Rejected e-records can be resubmitted for approval if necessary.

* Statement D : These capabilities are supported for both discrete and process manufacturing work orders.

Oracle Cloud documentation on "E-Signatures and E-Records" explains the approval process for electronic records, and the steps

work orders go through from creation to approval.

NEW QUESTION # 42

In which three ways does Supply Chain Orchestration enrich supply requests with project details to support outside processing for a project-specific work order?

- A. Expenditure Type is set to the expenditure type associated to the outside processing Item
- B. Expenditure Item Date is set to the requested need-by date and Expenditure Organization is set to the manufacturing plant.
- C. Expenditure Item Date is set to the receipt date and Expenditure Organization is set to the manufacturing plant.
- D. Supply Chain Orchestration initiates the creation of a purchase order without the work order.
- E. Supply Chain Orchestration initiates the creation of a requisition with the project details.

Answer: A,B,E

Explanation:

Supply Chain Orchestration (SCO) plays a vital role in managing project-specific work orders, particularly for outside processing. Here's how it enriches supply requests with project details:

* Statement B : Expenditure Item Date is set to the requested need-by date and Expenditure Organization is set to the manufacturing plant - In project-specific work orders, Supply Chain Orchestration assigns the need-by date as the Expenditure Item Date. The Expenditure Organization is typically set to the manufacturing plant handling the work order.

Oracle Fusion Project-Driven Supply Chain documents this behavior, showing how expenditure details are linked to the project for costing purposes.

Statement D : Supply Chain Orchestration initiates the creation of a requisition with the project details - SCO automatically creates a requisition with all relevant project details, such as project number, task, and expenditure information. This ensures that the procurement process is aligned with the project's financial and material requirements.

Reference : Oracle SCM Cloud Supply Chain Orchestration User Guide details the automated creation of requisitions with project data for external processing.

Statement E : Expenditure Type is set to the expenditure type associated with the outside processing item - In Oracle Cloud, expenditure types must align with the specific processing items. SCO ensures that the correct expenditure type is applied to the work order and subsequent requisitions.

Reference : Project Financial Management guides in Oracle SCM Cloud explain how expenditure types are associated with items, ensuring accurate costing.

Incorrect Statements:

Statement A : SCO does not initiate the creation of a purchase order without the work order. A work order is essential for processing the outside work, and its absence would disrupt the orchestration process.

Statement C : The Expenditure Item Date is not set to the receipt date but rather to the requested need-by date for proper alignment with project scheduling.

NEW QUESTION # 43

Your client needs to implement operational checks for compliance with training and job requirements. Which four statements are true about this functionality?

- A. You do not have the ability to associate a Job profile with a Work order operation resource.
- B. The qualification is enforced during reporting of labor usage.
- C. You have the ability to associate a Job profile with a Standard operation resource.
- D. The qualification is used to warn a production supervisor if they assign operators that don't meet the skill requirements against the resource.
- E. You have the ability to associate a Job profile with a Work definition operation resource.
- F. A qualified operator need not be specified to report resource transactions.

Answer: B,C,D,E

Explanation:

Oracle Manufacturing Cloud provides functionality to enforce compliance with training and job requirements through operational checks. The correct statements are:

* Statement B : You can associate a job profile with a work definition operation resource. This ensures that only operators who meet the job requirements are allowed to perform the work.

* Statement C : Qualifications are enforced when reporting labor usage, meaning that if an operator lacks the required qualifications, the system can prevent or warn about the labor transaction.

- * Statement D : You can also associate a job profile with a standard operation resource to enforce skills and training compliance.
- * Statement F : If an unqualified operator is assigned to a task, the system can notify the production supervisor to avoid non-compliance with skill requirements.

Incorrect options:

- * Statement A : A qualified operator must be specified to report resource transactions.
- * Statement E : You can associate a job profile with a work order operation resource, contrary to what is implied.

Oracle Manufacturing Cloud documentation on "Operational Checks for Compliance" explains the enforcement of job profiles and qualifications in production operations.

NEW QUESTION # 44

Which option represents all the production exception types that can be reported by a Production Operator in Oracle Manufacturing Cloud?

- **A. Work Area, Work Center, Resources, and Components**
- B. Work Center and Resources
- C. Resources and Components
- D. Work Area, Work Center, and Resources
- E. Work Area, Work Center, Resources, Components, and Miscellaneous

Answer: A

Explanation:

In Oracle Manufacturing Cloud, production operators can report several types of production exceptions that affect the flow of the production process. The complete list of production exception types that can be reported includes:

- * Work Area : Issues related to the broader production environment.
- * Work Center : Problems or exceptions that arise at specific work centers.
- * Resources : Issues with labor, machines, or tools that are part of the production process.
- * Components : Exceptions related to materials or components used in manufacturing.

Incorrect options:

- * Options A, B, C, D are incomplete and miss one or more of the exception types available in Oracle Manufacturing Cloud.
- Oracle Cloud documentation on Production Exceptions details the types of exceptions that can be reported by production operators, including work areas, work centers, resources, and components.

NEW QUESTION # 45

.....

In the past ten years, our company has never stopped improving the Oracle Manufacturing Cloud 2025 Implementation Professional exam cram. For a long time, we have invested much money to perfect our products. At the same time, we have introduced the most advanced technology and researchers to perfect our Oracle Manufacturing Cloud 2025 Implementation Professional exam questions. At present, the overall strength of our company is much stronger than before. We are the leader in the market and master the most advanced technology. In fact, our 1z0-1075-25 Test Guide has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about the 1z0-1075-25 test guide. In the future, we will continuously invest more money on researching.
