As we all know, the preparation process for an exam is very laborious and time- consuming. We had to spare time to do other things to prepare for SCP-NPM exam, which delayed a lot of important things. If you happen to be facing this problem, you should choose our SCP-NPM Study Materials. With our study materials, only should you take about 20 - 30 hours to preparation can you attend the exam. The rest of the time you can do anything you want to do to,which can fully reduce your review pressure.

That's why it's indispensable to use SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) real exam dumps. DumpsTests understands the significance of Updated SolarWinds SCP-NPM Questions, and we're committed to helping candidates clear tests in one go. To help SolarWinds SCP-NPM test applicants prepare successfully in one go, DumpsTests's SCP-NPM dumps are available in three formats: SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) web-based practice test, desktop SCP-NPM practice Exam software, and SCP-NPM dumps PDF.

Latest SCP-NPM Exam Registration: SolarWinds Network Performance Monitor (NPM) Exam - High-quality SolarWinds Practice SCP-NPM Exam Fee

Among global market, SCP-NPM guide question is not taking up such a large share with high reputation for nothing. And we are the leading practice materials in this dynamic market. To facilitate your review process, all questions and answers of our SCP-NPM test question is closely related with the real exam by our experts who constantly keep the updating of products to ensure the accuracy of questions, so all SCP-NPM Guide question is 100 percent assured. We make SCP-NPM exam prep from exam candidate perspective, and offer high quality practice materials with reasonable prices but various benefits.

SolarWinds Network Performance Monitor (NPM) is a powerful tool that network administrators use to monitor and manage their network infrastructure. The SCP-NPM (SolarWinds Certified Professional for Network Performance Monitor) exam is designed to test the knowledge and skills of professionals who work with this tool. SCP-NPM exam covers a range of topics related to NPM,

including installation, configuration, monitoring, and troubleshooting.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Certification Exam is designed to validate the skills of network professionals in managing and monitoring network performance using SolarWinds NPM. SCP-NPM exam is ideal for network engineers, administrators, and managers who want to prove their expertise in using SolarWinds NPM to maintain network uptime, optimize network performance, and troubleshoot network issues.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q73-Q78):

NEW QUESTION # 73
What is required to monitor tenants in your SDN environment with NPM Cisco ACI monitoring? (Choose all that apply.)

- A. Add an APIC node to NPM
- B. Enable API polling on the APIC node
- C. View your SDN environment in Orion Maps
- D. Enable API polling on all ACI devices

Answer: A,B

Explanation:
To monitor tenants in your SDN environment with NPM Cisco ACI monitoring, you need to add an APIC node to NPM and enable API polling on the APIC node. The APIC node is the controller of the ACI system that provides a full view of the SDN environment, including tenants, application profiles, endpoint groups, spine and leaf switches, and their health scores1. By enabling API polling on the APIC node, NPM can collect health and performance data for the ACI entities and display them on the Orion Web Console2. You do not need to enable API polling on all ACI devices, as one APIC node can provide the information for the entire ACI system3. You also do not need to view your SDN environment in Orion Maps, as this is an optional feature that allows you to visualize the relationships and dependencies among the ACI entities4. Reference: 1: Monitor Cisco ACI devices in NPM - SolarWinds1 2: Monitor Cisco ACI devices in NPM - Add ACI devices and enable ACI polling1 3: Monitor Cisco ACI devices in NPM - Requirements1 4: Monitor Cisco ACI devices in NPM - View ACI environment on SolarWinds Platform Maps1

NEW QUESTION # 74
For any node you monitor, you can use Network Discovery to automatically add child volumes or interfaces for monitoring.

- A. FALSE
- B. TRUE

Answer: A

Explanation:
For any node you monitor, you cannot use Network Discovery to automatically add child volumes or interfaces for monitoring. Network Discovery is a tool that helps you identify and add new devices to your network, but it does not automatically monitor all the components of the discovered devices. You need to manually select the volumes or interfaces you want to monitor from the list of resources on each node. You can also use the Network Sonar Results Wizard to filter and add the resources you want to monitor after running a discovery job. References:
Discover your network with NPM - SolarWinds (see the Monitoring Settings panel section) Network Discovery Tool - Automated Discovery Software | SolarWinds (see the Monitor Devices section)

NEW QUESTION # 75
You want to create an alert that notifies you when packet loss meets or exceeds 50%, but only for a select set of nodes in your network. How do you accomplish this?

- A. Create separate SWQL trigger condition for each node to be included in the alert
- B. Set the alert trigger evaluation to evaluate nodes to be included in the alert
- C. Set an alert limitation for the nodes to be included in the alert
- D. Set the scope of the alert to only apply to nodes to be included in the alert

Answer: C

Explanation:
An alert limitation is a filter that restricts the scope of an alert to a specific set of objects, such as nodes, interfaces, applications, or groups. You can use an alert limitation to create an alert that only applies to a select set of nodes in your network, and exclude the rest. To set an alert limitation for the nodes to be included in the alert, follow these steps1:
Click Alerts & Activity > Alerts > Manage Alerts.
Find the alert that you want to edit or create a new alert.
On the Trigger Condition tab, define the condition that triggers the alert, such as Percent Loss is greater than or equal to 50.
On the Scope of Alert tab, select Limit the scope of this alert to a specific subset of objects.
Choose the method to define the subset of objects, such as Select objects manually, Use a custom SWQL query, or Use a custom SQL query.
Select or enter the criteria to filter the objects, such as the node name, IP address, group, custom property, or any other attribute.
Click Add Selected Objects to add the objects to the alert limitation.
Click Next and complete the rest of the alert configuration.
You can now save and enable the alert, and it will only notify you when packet loss meets or exceeds 50% for the nodes that you have selected in the alert limitation. Reference: 1: Limit the objects an alert applies to

NEW QUESTION # 76
What is required to monitor tenants in your SDN environment with NPM Cisco ACI monitoring? (Choose all that apply.)

- A. Add an APIC node to NPM
- B. Enable API polling on the APIC node
- C. View your SDN environment in Orion Maps
- D. Enable API polling on all ACI devices

Answer: A,B

NEW QUESTION # 77
What is required to monitor tenants in your SDN environment with NPM Cisco ACI monitoring? (Choose all that apply.)

- A. Enable API polling on all ACI devices
- B. Enable API polling on the APIC node
- C. Add an APIC node to NPM
- D. View your SDN environment in Orion Maps

Answer: A,C

NEW QUESTION # 78
.....

DumpsTests can not only save you valuable time, but also make you feel at ease to participate in the exam and pass it successfully. DumpsTests has good reliability and a high reputation in the IT professionals. You can free download the part of SolarWinds SCP-NPM exam questions and answers DumpsTests provide as an attempt to determine the reliability of our products. I believe you will be very satisfied of our products. I have confidence in our DumpsTests products that soon DumpsTests's exam questions and answers about SolarWinds SCP-NPM will be your choice and you will pass SolarWinds certification SCP-NPM exam successfully. It is wise to choose our DumpsTests and DumpsTests will prove to be the most satisfied product you want.
