

# Reliable 3V0-22.25 Exam Pdf - 3V0-22.25 Certification Practice

What's more, part of that DumpsTests 3V0-22.25 dumps now are free: <https://drive.google.com/open?id=1kOge5cpYjPIBtZDV0wwto9BobR7KT9EV>

Are you worrying about how to pass VMware 3V0-22.25 test? Now don't need to worry about the problem. DumpsTests that committed to the study of VMware 3V0-22.25 certification exam for years has a wealth of experience and strong exam dumps to help you effectively pass your exam. Whether to pass the exam successfully, it consists not in how many materials you have seen, but in if you find the right method. DumpsTests is the right method which can help you sail through VMware 3V0-22.25 Certification Exam.

In the past ten years, our company has never stopped improving the 3V0-22.25 exam cram. For a long time, we have invested much money to perfect our products. At the same time, we have introduced the most advanced technology and researchers to perfect our 3V0-22.25 exam questions. At present, the overall strength of our company is much stronger than before. We are the leader in the market and master the most advanced technology. In fact, our 3V0-22.25 Test Guide has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about the 3V0-22.25 test guide. In the future, we will continuously invest more money on researching.

## Pass Guaranteed Quiz Perfect 3V0-22.25 - Reliable Advanced VMware Cloud Foundation 9.0 Operation Exam Pdf

For the Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) web-based practice exam no special software installation is required. Because it is a browser-based Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) practice test. The web-based Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) practice exam works on all operating systems like Mac, Linux, iOS, Android, and Windows.

## VMware Advanced VMware Cloud Foundation 9.0 Operation Sample Questions (Q31-Q36):

### NEW QUESTION # 31

An operator logs into VCF Operations successfully but sees an empty Dashboard List, even though the administrator claims to have shared the "Operations-Health" dashboard with the operator's group.

# User Status

Login: Success

RBAC Role: "General User" (Assigned to 'All Objects')

# Dashboard Status

Name: Operations-Health

Shared With: "Everyone" Group

What is the most likely reason the dashboard is not appearing for the user?

- A. The "General User" role does not have the "View Dashboard" privilege enabled in its permissions list.
- **B. The Dashboard was shared, but the user must manually "Import" it from the Dashboard Library before it appears on their home screen menu.**
- C. The user's browser is blocking pop-ups.
- D. The user's account is locked in Active Directory.

**Answer: B**

#### NEW QUESTION # 32

Which components are automatically deployed or configured specifically to support a new Virtual Infrastructure (VI) Workload Domain in a standard VCF architecture using a dedicated NSX instance?

- A. A dedicated vCenter Server, a shared NSX Manager cluster from the Management Domain, and a dedicated Aria Operations instance.
- **B. A dedicated vCenter Server, a dedicated NSX Manager cluster, and ESXi hosts from the free pool.**
- C. A shared vCenter Server from the Management Domain, a dedicated NSX Manager cluster, and ESXi hosts.
- D. A dedicated vCenter Server, a dedicated NSX Manager cluster, and a dedicated SDDC Manager instance.

**Answer: B**

#### NEW QUESTION # 33

A Solution Architect is designing a "DMZ Workload Domain" that requires strict isolation and enhanced security monitoring. The design proposes the following component structure and VCF Operations integration. (Select all that apply.)

# Proposed Design - DMZ-WLD

1. Compute: Dedicated vCenter Server.
2. Network: Dedicated NSX Manager Cluster.
3. Storage: vSAN (Dedicated).
4. Monitoring: New Cloud Proxy deployed in DMZ-WLD, connected to Management Domain VCF Operations.
5. Security: NSX Distributed Firewall (DFW) logging enabled.

# Monitoring Requirement

"Ensure all DFW logs from the DMZ are analyzed for security breaches, but keep the log traffic isolated from the Management Domain management network." Which design choices or configurations correctly address the architecture and monitoring requirements?

- A. VCF Operations can ingest the DFW logs directly via the Cloud Proxy without needing VCF Operations for Logs (Aria Operations for Logs).
- **B. To satisfy the "isolated log traffic" requirement, a separate VCF Operations for Logs cluster should be deployed within the DMZ-WLD, rather than forwarding logs to the Management Domain.**
- **C. The "Dedicated NSX Manager" choice ensures that security policies for the DMZ are not visible to or editable by admins of other Workload Domains.**
- D. The "Dedicated vCenter Server" is optional; the DMZ cluster could be managed by the Management vCenter to reduce licensing costs while maintaining security.
- **E. Deploying a "Cloud Proxy" in the DMZ-WLD allows VCF Operations to collect metrics/logs locally and transmit them securely over a single HTTPS port to the Management Domain.**

**Answer: B,C,E**

#### NEW QUESTION # 34

Which communication protocol does the VCF Operations for Logs Agent use by default to transmit logs to the server, offering features like compression and SSL encryption?

- A. UDP Syslog (514).
- **B. CFAPI (Common Forwarding API). This proprietary protocol typically runs over port 9000 (non-SSL) or 9543 (SSL), providing a more robust, efficient, and secure delivery mechanism compared to standard syslog.**
- C. SNMP Trap (162).
- D. TCP Syslog (514).

**Answer: B**

### NEW QUESTION # 35

An administrator is configuring an offline depot for a newly deployed VMware Cloud Foundation fleet. The VCF Download Tool is used to populate the depot because the installation is operating in a dark site environment. What does the VCF Download Tool require to authenticate with the Broadcom Business Portal and download the required software binaries?

- **A. A Download Token from the Broadcom Business Portal**
- B. The VCF or VVF bundleId to be downloaded
- C. A download SKU using the --sku option
- D. The target component using the component option

**Answer: A**

Explanation:

The VCF Download Tool requires a download token generated from the Broadcom portal to authenticate entitlement and download software binaries into an offline depot. In a dark-site deployment, the depot server is populated externally because the VCF environment cannot directly reach the online depot. The official VCF 9.0 documentation describes the VCF Download Tool as the CLI utility used to manage binaries and metadata for VMware Cloud Foundation lifecycle operations, including offline binary handling. The documented workflow for downloading binaries specifically instructs the administrator to obtain a download token from the Broadcom Support Portal, create a token file, and pass it to the tool using the depot download token file option. The SKU, bundle ID, and component parameters are selection or filtering inputs used to target what is downloaded; they do not authenticate the session. Authentication and entitlement validation are performed by the download token. Reference topic: Objective 4.14 - Fleet Management activities / offline depot / binary management / VCF Download Tool.

### NEW QUESTION # 36

.....

Passing VMware real exam is not so simple. Choose right 3V0-22.25 exam prep is the first step to your success. The valid braindumps of DumpsTests is a good guarantee to your success. If you choose our latest practice exam, it not only can 100% ensure you pass 3V0-22.25 Real Exam, but also provide you with one-year free updating exam pdf.
