

Free PDF Quiz 2026 CompTIA Unparalleled Real XK0-006 Exam Questions

P.S. Free & New XK0-006 dumps are available on Google Drive shared by TopExamCollection: <https://drive.google.com/open?id=1azPILCoVWv9ByT6S6qkzAUVTLzCu-CdW>

Our CompTIA Linux+ Certification Exam (XK0-006) exam questions are being offered in three easy-to-use and compatible formats. These CompTIA Linux+ Certification Exam (XK0-006) exam dumps formats offer a user-friendly interface and are compatible with all devices, operating systems, and browsers. The TopExamCollection CompTIA Linux+ Certification Exam (XK0-006) PDF questions file contains real and valid CompTIA XK0-006 exam questions that assist you in XK0-006 exam dumps preparation and boost the candidate's confidence to pass the challenging CompTIA Linux+ Certification Exam (XK0-006) exam easily.

Our passing rate is very high to reach 99% and our XK0-006 exam torrent also boost high hit rate. Our XK0-006 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our study materials can improves your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You can choose the version which suits you mostly. Our CompTIA Linux+ Certification Exam exam torrents simplify the important information and seize the focus to make you master the XK0-006 Test Torrent in a short time.

Free PDF Quiz 2026 CompTIA XK0-006: CompTIA Linux+ Certification Exam – High Pass-Rate Real Exam Questions

Nowadays in this information-based world the definition of the talents has changed a lot and the talents mean that the personnel boost both the knowledge in XK0-006 area and the practical abilities now. With our XK0-006 exam braindumps, you can get what you want. Our XK0-006 Study Materials are easy to be mastered and boost varied functions. We compile Our XK0-006 preparation questions elaborately and provide the wonderful service to you thus you can get a good learning and preparation for the exam.

CompTIA Linux+ Certification Exam Sample Questions (Q76-Q81):

NEW QUESTION # 76

While hardening a system, an administrator runs a port scan with Nmap, which returned the following output:

Which of the following is the best way to address this security issue?

- A. Closing port 80 on the network switch to block traffic
- B. Configuring a firewall to block traffic on port 23 on the server
- C. **Disabling and removing the Telnet service on the server**
- D. Changing the systems administrator's password to prevent unauthorized access

Answer: C

Explanation:

Port 23/tcp indicates Telnet, which is insecure because it transmits data in plaintext. The best hardening approach is to disable and remove the Telnet service entirely, eliminating the vulnerability rather than just blocking it at the firewall. Secure alternatives like SSH should be used instead.

NEW QUESTION # 77

A systems administrator is creating a backup copy of the /home/directory. Which of the following commands allows the administrator to archive and compress the directory at the same time?

- A. dd of=/backups/home.tar.xz if=/home/
- B. **tar -cJf /backups/home.tar.xz /home/**
- C. rsync -z /backups/home.tar.xz /home/
- D. cpio -o /backups/home.tar.xz /home/

Answer: B

Explanation:

The tar -cJf command creates (-c) an archive, compresses it with XZ (-J), and writes it to a file (-f). This allows archiving and compression of the /home/ directory in one step.

NEW QUESTION # 78

Which of the following best describes journald?

- A. A feature that creates crash dumps in case of kernel failure
- B. **A system service that collects and stores logging data**
- C. A service responsible for keeping the filesystem journal
- D. A service responsible for writing audit records to a disk

Answer: B

Explanation:

journald, part of systemd, is the core logging service in modern Linux systems and is covered under Linux+ V8 logging and monitoring objectives.

The correct description is A. systemd-journald collects, stores, and indexes logging data from the kernel, system services, and applications. Logs are stored in a structured, binary format and can be queried using journalctl. Journald supports metadata tagging, log filtering, and centralized logging integration.

Option B refers to kernel crash dump mechanisms like kdump. Option C describes filesystem journaling (such as ext4 journaling).

Option D refers to auditd, which manages security audit logs.

Linux+ V8 documentation clearly distinguishes journald from other logging and auditing services. Therefore, the correct answer is A.

NEW QUESTION # 79

A Linux administrator wants to make the ENABLE_AUTH variable set to 1 and available to the environment of subsequently executed commands. Which of the following should the administrator use for this task?

- A. **export ENABLE_AUTH=1**
- B. let ENABLE_AUTH=1
- C. ENABLE_AUTH=\$(echo \$ENABLE_AUTH)

- D. ENABLE_AUTH=1

Answer: A

Explanation:

The export command sets an environment variable and makes it available to subsequently executed commands and child processes, ensuring ENABLE_AUTH=1 is recognized system-wide in that shell session.

NEW QUESTION # 80

Which of the following is a characteristic of Python 3?

- A. It is extensible through modules.
- B. It is closed source.
- C. It is binary compatible with Java.
- D. It is fully backwards compatible.

Answer: A

Explanation:

Python 3 characteristics are part of Linux+ V8 scripting objectives. One of Python's most important features is its modular and extensible architecture.

Option B is correct because Python 3 supports extensibility through modules and packages. Python includes a large standard library and allows developers to extend functionality using third-party modules or custom code.

This makes Python highly adaptable for automation, system management, and DevOps tasks.

The other options are incorrect. Python is open source, not closed source. Python 3 is not fully backwards compatible with Python 2, which is a major distinction emphasized in Linux+ V8. Python is also not binary compatible with Java.

Linux+ V8 documentation highlights Python's extensibility as a key reason it is widely used in Linux automation. Therefore, the correct answer is B.

NEW QUESTION # 81

.....

For more than ten years, our XK0-006 practice engine is the best seller in the market. More importantly, our good XK0-006 guide questions and perfect after sale service are apporobated by our local and international customers. If you want to pass your practice exam, we believe that our XK0-006 Learning Engine will be your indispensable choices. More and more people have bought our XK0-006 guide questions in the past years. What are you waiting for? Just rush to buy our XK0-006 exam braindumps and become successful!
