More qualified certification for our future employment has the effect to be reckoned with, only to have enough qualification 300-610 certifications to prove their ability, can we get over rivals in the social competition. Many candidates be defeated by the difficulty of the 300-610 exam, but if you can know about our 300-610 Exam Materials, you will overcome the difficulty easily. If you want to buy our 300-610 exam questions please look at the features and the functions of our product on the web or try the free demo of our 300-610 exam questions.

The Cisco 300-610 exam covers a wide range of topics, including data center network design, storage network design, compute network design, and automation. It also covers various technologies such as Cisco Application Centric Infrastructure (ACI), Cisco Nexus data center switches, and Cisco Unified Computing System (UCS).

Cisco 300-610 exam covers a wide range of topics related to data center infrastructure design, including network design, storage design, compute design, virtualization, automation, and security. 300-610 Exam consists of 60-70 questions that are mostly multiple-choice and simulation-based. The candidates are required to complete the exam within 90 minutes and achieve a passing score of

750 or higher out of a possible 1000.

Designing Cisco Data Center Infrastructure practice torrent & 300-610 study guide & Designing Cisco Data Center Infrastructure dumps vce

300-610 actual test not only are high-quality products, but also provided you with a high-quality service team. Our Prep4away platform is an authorized formal sales platform. Since the advent of 300-610 prep torrent, our products have been recognized by thousands of consumers. Everyone in 300-610 exam torrent ' team has gone through rigorous selection and training. We understand the importance of customer information for our customers. And we will strictly keep your purchase information confidential and there will be no information disclosure. At the same time, the content of 300-610 Exam Torrent is safe and you can download and use it with complete confidence.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q99-Q104):

NEW QUESTION # 99

A network design must include a solution to run CLI commands remotely on Cisco Nexus 9000 Series Switches. The customer's security policy requires secure login credentials and an encrypted underlying transport. The command output will be processed using tools that support XML or JSON encoding. Which two components should be included in the design? (Choose two.)

- A. HTTPS
- B. Bash shell
- C. NX-API
- D. HTTP
- E. SSH

Answer: A,E

NEW QUESTION # 100

Refer to the exhibit. An engineer must assign multiple Fibre Channel IDs to a single port channel. Which two features must be enabled this goal? (Choose two.)

- A. NPV feature on the Cisco MDS Series.
- B. end-host mode feature on the Cisco UCS Fabric Interconnects
- C. SAN Pin Groups on the Cisco UCS Fabric Interconnects.
- D. NPIV feature on the Cisco MDS Series
- E. Smart Zoning feature on the Cisco UCS Fabric Interconnects

Answer: B,D

Explanation:

N-Port ID Virtualization (NPIV)

NPIV allows a Fibre Channel host connection or N-Port to be assigned multiple N-Port IDs or Fibre Channel IDs (FCID) over a single link. All FCIDs assigned can now be managed on a Fibre Channel fabric as unique entities on the same physical host. Different applications can be used in conjunction with NPIV. In a virtual machine environment where many host operating systems or applications are running on a physical host, each virtual machine can now be managed independently from zoning, aliasing, and security perspectives.

NEW QUESTION # 101

Which type of encoding is used on 8-Gbps links as compared to 10-Gbps links?

- A. 8-Gbps links and 10-Gbps links use 64B/66B encoding.
- **B. 8-Gbps links use 8B/10B encoding, and 10-Gbps links use 64B/66B encoding.**
- C. 8-Gbps links use 64B/66B encoding, and 10-Gbps links use 8B/10B encoding.
- D. 8-Gbps links and 10-Gbps links use 8B/10B encoding.

Answer: B

NEW QUESTION # 102

An engineer must implement a WWPN pool for the vHBA template inside the Cisco UCS Manager. The template is used to connect a Cisco UCS B-Series blade to an external storage array.

Which addressing sequence accomplishes this goal?

- A. from 192.168.1.1 to 192.168.1.254
- B. from iqn.2020-c41i4p21y5a165.lab.ucs-00 to iqn.2020-ceiD1pj5y135-8.lab.ucs-FF
- **C. from 20:00:00:00:00:00:00 to 20:FF:FF:FF:FF:FF:FF**
- D. from 00:0A:E6:3E:00:00 to 00:0A:E6:3E:00:FF

Answer: C

NEW QUESTION # 103

An engineer is implementing a storage area network where an NPV is used. The engineer notices that the servers in a storage farm are experiencing heavy traffic contention. The engineer needs to migrate traffic from heavily loaded server interfaces to interfaces with less load. When the new links are deployed, the existing traffic is not rebalanced as expected.

Which feature must be used to meet these requirements?

- **A. NPIV**
- B. DVM
- C. disruptive load balancing
- D. multiple VSAN support

Answer: A

NEW QUESTION # 104

.....

Many customers may doubt the quality of our 300-610 learning quiz since they haven't tried them. But our 300-610 training engine is reliable. What you have learnt on our 300-610 exam materials are going through special selection. The core knowledge of the real exam is significant. With our guidance, you will be confident to take part in the 300-610 Exam. Our 300-610 study materials will be your good assistant. Put your ideas into practice.
