ISQI ISTQB Foundation Level - Acceptance Testing Sample Questions (Q75-Q80):

NEW QUESTION # 75
Which of the following statements corresponds BEST to a UX requirement analysis activity?

- A. Security requirements are derived from usage scenarios.
- B. Personas are used to analyze products or solutions from competitors.
- C. Environmental conditions such as light conditions are obtained from a task analysis.
- D. User profiles are used to determine different levels of business knowledge.

Answer: D

NEW QUESTION # 76
Which one of the following combinations of given perspective and statement matches BEST?

- A. From a technical perspective, the number of concurrent user and the types of transactions performed are major elements.
- B. From a user perspective, missing feedback from the system when processing a request it is a problem.
- C. From a business perspective, computing power and architecture are major parameters for fine- tuning the system.
- D. From a business perspective, the choice of performance test tools strongly depends on the applied test techniques.

Answer: B

Explanation:
In usability and user experience, system feedback is critical. Users expect clear, timely responses from the system to confirm their actions are received and processed. Lack of feedback (e.g., when clicking a button yields no visual response) leads to confusion, frustration, or repeated actions.
Option B is correct because it highlights a genuine issue from a user's perspective - inadequate feedback, which affects usability and satisfaction.
Other options:
A focuses on technical infrastructure (architecture, computing power) - a technical or business concern, but less so from a user's lens.
C is mostly correct but fits the technical or test engineer's perspective rather than the user's.
D is inaccurate - selection of performance tools is primarily a technical/test management decision, not business-driven.
B). From a user perspective, missing feedback from the system when processing a request is a problem.

NEW QUESTION # 77
Which of the following reasons explains BEST why it makes sense to review test reports?

- A. The test report quality significantly influences the impression third parties get from the organization / the product.
- B. Test automation engineers may misunderstand the test case and implement test scripts that miss the target
- C. Like all humans, the tester can make mistakes and overlook important acceptance criteria of a requirement / user story
- D. If the test reports are unclear or incomplete, the decision to release the product can be base on non reliable information

Answer: D

Explanation:
Test reports summarize the results of test execution and are often used by stakeholders, including business owners and release managers, to make informed decisions about whether to release a product. If these reports are ambiguous, incomplete, or inaccurate, the decisions based on them could be flawed, leading to reputational damage, customer dissatisfaction, or regulatory issues.
Option A is correct because it highlights the risk of basing critical go/no-go decisions on poor-quality reporting.
Other options:
B describes a problem with test case implementation, not test reporting.
C mentions public perception, which might be influenced by report quality, but it is secondary to the internal decision-making purpose.
D refers to human error during test execution or design, not the purpose of reviewing test reports.
A). If the test reports are unclear or incomplete, the decision to release the product can be based on non-reliable information

NEW QUESTION # 78
Which one of the following statements regarding acceptance criteria is true?

- A. In acceptance test-driven development (ATDD., acceptance criteria replace acceptance tests.
- B. Testers should not be involved in writing acceptance criteria to make sure that the test is independent.
- C. Acceptance criteria are specific to agile frameworks where they correspond to functional requirements.
- D. Acceptance criteria specify what shall be tested to verify that a requirement or user story has been implemented correctly.

Answer: D

NEW QUESTION # 79

As an acceptance tester you want to test the $100 withdrawal process described by the following Business Process Model and Notation (BPMN) model.
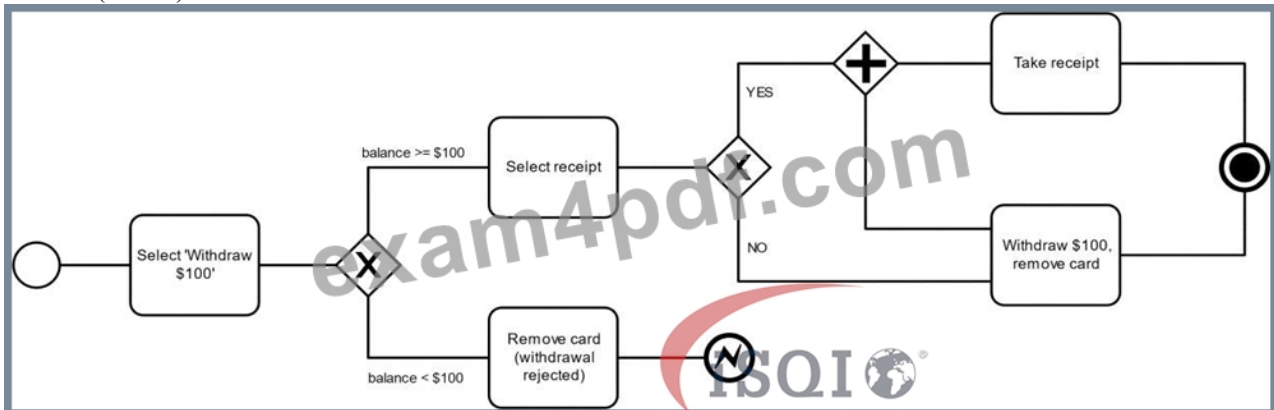

You would like to achieve the following coverage criterion "execute all possible process tasks". Consider the following test cases:

Test 1: balance = $100, receipt = YES
Test 2: balance = $120, receipt = NO
Test 3: balance = $85
Test 4: balance = $20, receipt = YES

Which of the following is the minimal set of test cases allowing to achieve required coverage?

- A. Test 1, Test 2, Test 3
