Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Responsible Design and Production
- B. SAP Sustainability Footprint Management
- C. SAP Green Token
- D. SAP Sustainability Control Tower

**Answer: D**

Explanation:

SAP Sustainability Control Tower is a solution specifically designed to help organizations measure, report, and act on environmental, social, and governance (ESG) metrics. It consolidates ESG data from various sources, providing insights that align with sustainability goals and regulatory requirements.

Option A: SAP Sustainability Control Tower

This option is correct. The SAP Sustainability Control Tower is a centralized solution for managing and analyzing ESG data, enabling customers to track sustainability performance effectively.

Option B: SAP Green Token

Incorrect. SAP Green Token focuses on tracking and verifying material flows to ensure transparency in sustainable supply chains but is not designed for ESG data consolidation.

Option C: SAP Sustainability Footprint Management

Incorrect. This solution helps organizations calculate their carbon footprints for products and operations but does not provide the broader ESG data management capabilities.

Option D: SAP Responsible Design and Production

Incorrect. This solution supports designing and producing products responsibly but does not address the management of ESG data.

In summary, SAP Sustainability Control Tower is the appropriate solution for managing and understanding ESG data, aligning with corporate sustainability strategies.
