SSM Exams Training - Efficient SSM Latest Test Experience and First-Grade SSM (6.0) - SAFe® Scrum Master Valid Test Brindumps

We have considered that your time may be very tight, and you can only use some fragmented time to learn. Therefore, it is really important to be able to read our SSM study materials anytime, anywhere. So we have developed our SSM exam questions to three

different versions: the PDF, Software and APP online. They have covered all conditions that you will be in to study on our SSM learning guide. For example, the time you want to study on phone, computer, laptop, paper and so on.

The SAFe 5 Scrum Master (SSM) Exam is a comprehensive test that evaluates the Scrum Master's knowledge and skills in implementing SAFe practices in a large-scale environment. SSM exam covers various aspects of the Scrum Master's role, including team facilitation, coaching, and leadership, and requires a deep understanding of the principles of SAFe. SSM Exam is ideal for individuals who have experience working in Agile projects and are looking to enhance their knowledge and skills in a SAFe environment. Successful completion of the exam results in a certification that demonstrates the individual's proficiency in implementing SAFe practices as a Scrum Master.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q47-Q52):

NEW QUESTION # 47

What is one trait of a servant leader?

- A. Deflects information that could change the team's work
- **B. Persuades rather than using authority**
- C. Determines the day-to-day activities for the team
- D. Solves problems on behalf of the team

Answer: B

Explanation:

According to the SAFe 6 Scrum Master documentation, one of the traits of a servant leader is to persuade rather than use authority. This means that the servant leader influences others by appealing to their values, beliefs, and interests, rather than by imposing their own will or position. By persuading rather than using authority, the servant leader fosters a culture of collaboration, empowerment, and trust, where team members are more likely to accept and welcome coaching, feedback, and change. Persuasion also helps the servant leader to align the team with the organization's vision, mission, and goals, and to create a shared understanding of the purpose and value of the work.

The Scrum Master as a Servant-Leader

NEW QUESTION # 48

According to SAFe, what is one common characteristic of effective Scrum Masters/Team Coaches?

- **A. Conflict navigator**
- B. Ambitious
- C. Charismatic
- D. Competitive

Answer: A

Explanation:

According to the SAFe (Scaled Agile Framework) guidelines, an effective Scrum Master or Team Coach (SM/TC) exhibits several key traits that enable them to support Agile Teams effectively. One of the most emphasized characteristics is the ability to navigate conflict constructively.

A "conflict navigator" refers to someone who helps the team identify and work through disagreements in a productive way. Rather than avoiding or suppressing conflict, a skilled Scrum Master uses it as an opportunity to surface issues, enhance team learning, and drive continuous improvement. This aligns with the servant-leadership stance encouraged both in SAFe and the Scrum Guide. While traits like being charismatic or ambitious may be personally beneficial, they are not explicitly listed in SAFe or Scrum literature as core attributes for Scrum Masters. Similarly, competitiveness could actually contradict the collaborative, team-focused nature of Agile frameworks.

From the SAFe Scrum Master role description:

"Effective Scrum Masters are servant leaders who display characteristics such as active listening, empathy, persuasion, and conflict facilitation." This highlights the importance of conflict facilitation, making "Conflict navigator" the correct answer.

NEW QUESTION # 49

What is one way the Scrum Master/Team Coach can support the Inspect and Adapt?

- A. Create an agenda
- **B. Provide team data**
- C. Supply templates
- D. Host a brainstorm

Answer: B

Explanation:

In SAFe, the Inspect and Adapt (I&A) event provides the Agile Release Train (ART) with a structured opportunity to reflect, measure progress, and identify systemic improvements. The Scrum Master/Team Coach (SM/TC) plays a critical role in supporting this event by ensuring that each team's contribution is backed by meaningful, accurate data.

Providing team data—such as iteration metrics, team velocity, predictability, and performance against objectives—enables evidence-based discussions during the quantitative and qualitative measurement portion of the I&A. This transparency helps identify trends, validate outcomes, and support root cause analysis during the problem-solving workshop.

From SAFe guidance:

"Teams prepare quantitative and qualitative data for the Inspect and Adapt to provide objective insights into their performance and enable continuous improvement discussions." Thus, the correct answer is C. Provide team data, as it directly supports the empirical foundation of the I&A event.

NEW QUESTION # 50

A team's Product Owner (PO) takes an unexpected leave of absence for the last week of the Iteration.

Three of the team's stories have been completed and are waiting to be accepted. The Scrum Master asks the Product Manager (PM) to attend the Iteration Review and accept the stories. The PM responds that he is not familiar enough with the intent to feel comfortable accepting these responsibilities. He suggests keeping the Iteration open for an additional week and waiting for the PO to come back. What should the team's Scrum Master do?

- A. Ask another PO in the Agile Release Train to accept the stories
- **B. Work with the Release Train Engineer to find a solution**
- C. The Scrum Master should accept the stories after the team demonstrates the stories
- D. Strongly urge the PM to attend the Demo and accept the stories

Answer: B

NEW QUESTION # 51

What is one recommended practice for Scrum Masters/Team Coaches when facilitating Iteration Review?

- A. Encourage team members to spend 3+ hours preparing
- **B. Begin to consider how and what to demo in Iteration Planning**
- C. Limit participants to just the team members
- D. Encourage the team member with the best presentation skills to demo each Iteration

Answer: B

Explanation:

One of the recommended practices for Scrum Masters/Team Coaches when facilitating Iteration Review is to begin to consider how and what to demo in Iteration Planning. This helps the team to have a clear vision of the expected outcome and to align their work with the iteration goals. It also facilitates the preparation and execution of the demo, as the team can anticipate the feedback and questions from the stakeholders.
