NEW QUESTION # 24

MistAI accounts are essential for which of the following reasons?

- A. To manually configure network devices
- B. To reduce network security
- **C. To access AI-driven network insights**
- D. To limit network functionality

NEW QUESTION # 25

You are asked to forward event messages from Mist to an external log collector. In this scenario, which feature would enable this capability?

- A. webhooks
- B. SNMP traps
- C. NETCONF
- **D. syslog**

Answer: D

Explanation:

In Juniper Mist, the **syslog** feature allows administrators to forward event messages and alerts from the Mist cloud to an external syslog server.

This is often used for centralized event monitoring, compliance, and correlation with tools like Splunk or SIEM systems.

Syslog operates over UDP or TCP and can capture switch events, system logs, and Marvis actions for both Wired and Wireless networks.
