

# Reliable Workday-Prism-Analytics Reliable Test Duration - Pass Workday-Prism-Analytics Once - Well-Prepared New Workday-Prism-Analytics Exam Testking

## What is Workday Prism Analytics?

P.S. Free 2025 Workday Workday-Prism-Analytics dumps are available on Google Drive shared by ValidBraindumps: <https://drive.google.com/open?id=1jvapO83fjeZSJPR5BgxAYmNcYUSFgJPv>

Certification has become a prerequisite for employment and career growth in the Workday industry for reputable companies. To advance comfortably in your career, passing the Workday-Prism-Analytics exam is a valuable validation of your expertise. However, many test takers struggle to find updated Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) dumps and fail to prepare effectively in a short period, resulting in a loss of time, money, and motivation.

I know your time is very valuable. We guarantee that you can download our products Workday-Prism-Analytics exam questions immediately after payment is successful. After your current page shows that the payment was successful, you can open your e-mail address to receive our Workday-Prism-Analytics Study Materials. And you can find that you can get Workday-Prism-Analytics learning guide only in 5 to 10 minutes. It is very fast and easy. And our Workday-Prism-Analytics practice engine is auto installed, so you don't have to do more work.

## New Workday-Prism-Analytics Exam Testking - Complete Workday-Prism-Analytics Exam Dumps

Are you still worried about low wages? Are you still anxious to get a good job? Are you still anxious about how to get a Workday-Prism-Analytics certificate? If yes, our Workday-Prism-Analytics study materials will be the good choice for you. If you have our Workday-Prism-Analytics study materials, I believe your difficulties will be solved, and you will have a better life. And Workday-Prism-Analytics real test has a high quality as well as a high pass rate of 99% to 100%. What is more, Workday-Prism-Analytics

test prep provides free trial downloading before your purchasing.

## Workday Pro Prism Analytics Exam Sample Questions (Q43-Q48):

### NEW QUESTION # 43

What security domain enables the ability to create a dataset?

- A. Prism: Tables Create
- **B. Prism Datasets: Create**
- C. Prism Datasets: Publish
- D. Prism: Manage Data Source

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, the ability to create a dataset is governed by specific security domains within the Prism Analytics functional area. According to the official Workday Prism Analytics study path documents, the security domain that explicitly enables users to create datasets is the "Prism Datasets: Create" domain.

This domain grants users the necessary permissions to initiate the creation of both base and derived datasets within the Prism Analytics Data Catalog.

The process of creating a dataset involves defining the metadata and processing logic to manipulate data, which can include Workday or external (non-Workday) data sources. The "Prism Datasets: Create" domain ensures that only authorized users, such as Prism data analysts or administrators, can perform this task, aligning with Workday's configurable security framework. Other domains, such as "Prism Datasets: Publish," are responsible for publishing datasets to make them available as Prism Data Sources for reporting, while

"Prism: Manage Data Source" pertains to managing the data sources themselves, not creating datasets.

Similarly, "Prism: Tables Create" is related to creating tables, which is a distinct entity from datasets in Prism Analytics.

This distinction is critical, as datasets and tables serve different purposes in the data management workflow.

Datasets include metadata and a subset of example rows, while tables contain metadata and all data rows. The

"Prism Datasets: Create" domain is specifically designed to control access to dataset creation, ensuring secure and governed data preparation.

### NEW QUESTION # 44

You want to configure access to a published Prism data source to use it in reporting and discovery boards.

What action must you take?

- **A. Edit the data source security and select a domain.**
- B. Share the dataset with appropriate users.
- C. Share the imported Workday report to provide users with access to the published Prism data source.
- D. Schedule the recurring publish process.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, configuring access to a published Prism data source for use in reporting and discovery boards requires managing its security settings. According to the official Workday Prism Analytics study path documents, the necessary action is to edit the data source security and select a domain (option A).

After a dataset is published as a Prism data source, access is controlled through security domains. By editing the data source security and assigning it to an appropriate security domain (e.g., a domain that grants access to specific user groups like report writers or analysts), you ensure that authorized users can access the data source for reporting and discovery boards. This aligns with Workday's configurable security framework, ensuring that only users with the appropriate permissions can view or use the data source.

The other options are incorrect:

\* B. Share the dataset with appropriate users: Sharing the dataset itself does not grant access to the published Prism data source;

access to the data source is controlled through its security settings, not the dataset's sharing settings.

\* C. Share the imported Workday report to provide users with access to the published Prism data source:

Sharing an imported Workday report does not affect access to the Prism data source; the data source's security must be configured directly.

\* D. Schedule the recurring publish process: Scheduling a recurring publish process ensures the data source is updated regularly, but it does not configure access for reporting or discovery boards.

Editing the data source security and selecting a domain is the critical step to enable access for reporting and discovery boards.

### NEW QUESTION # 45

A Prism data administrator combined data from multiple sources down to a final derived dataset, including current worker data.

There is a new requirement to append historical worker data to the dataset in a uniform layout. The historical worker data includes some, but not all, fields that align with the current worker data.

Using current worker data as the primary pipeline, how can the historical worker data points be brought in?

- A. Add a Join stage with a Left Outer Join.
- **B. Add a Union stage.**
- C. Add a Join stage with a Right Outer Join.
- D. Add a Join stage with an Inner Join.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when the goal is to append data from one dataset to another in a uniform layout, such as combining current worker data with historical worker data, a Union stage is the appropriate transformation. According to the official Workday Prism Analytics study path documents, a Union stage is used to append rows from one pipeline to another, stacking the data vertically while aligning fields based on their names and types. In this scenario, the current worker data (primary pipeline) and historical worker data (secondary pipeline) share some fields, and a Union stage will combine the rows from both datasets into a single dataset. Fields that exist in one pipeline but not the other will have NULL values for the rows where they are not present, ensuring a uniform layout without losing data.

The other options are not suitable for this requirement:

\* A. Add a Join stage with a Right Outer Join: A Right Outer Join would include all rows from the historical worker data and only matching rows from the current worker data, which does not align with the goal of appending all data in a uniform layout.

\* C. Add a Join stage with a Left Outer Join: A Left Outer Join would include all rows from the current worker data and matching rows from the historical worker data, but this is not an append operation; it's a matching operation based on a join condition, which isn't specified here.

\* D. Add a Join stage with an Inner Join: An Inner Join would only include rows where matches exist between the two datasets, potentially excluding non-matching historical or current worker data, which does not meet the requirement to append all data.

The Union stage is the correct approach to append historical worker data to the current worker data, ensuring all rows are included in a uniform layout, with NULLs filling in for missing fields.

### NEW QUESTION # 46

You want your derived dataset to only show rows that meet the following criteria: Agent ID is not null AND Location is Dallas OR Location is Montreal. How can you achieve this?

- **A. By using Advanced Filter conditions.**
- B. By using Simple Filter conditions.
- C. By creating a Custom Example.
- D. By adding a Manage Fields stage.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, filtering a derived dataset to meet specific criteria involving multiple conditions with mixed logical operators (AND, OR) requires careful configuration. The criteria here are: Agent ID is not null AND (Location is Dallas OR Location is Montreal). According to the official Workday Prism Analytics study path documents, this can be achieved by using Advanced Filter conditions (option C).

A Simple Filter in Prism Analytics allows for basic conditions with a single operator ("If All" for AND, "If Any" for OR), but it cannot handle nested logic like AND combined with OR in a single filter. For example, a Simple Filter with "If All" would require all conditions to be true (Agent ID is not null AND Location is Dallas AND Location is Montreal), which is too restrictive. A Simple Filter with "If Any" would include rows where any condition is true (Agent ID is not null OR Location is Dallas OR Location is Montreal), which is too broad. The Advanced Filter, however, allows for complex expressions with nested logic, such as `ISNOTNULL(Agent_ID) AND (Location = "Dallas" OR Location = "Montreal")`, ensuring the correct rows are included.

The other options are incorrect:

- \* A. By adding a Manage Fields stage: The Manage Fields stage modifies field properties (e.g., type, visibility) but does not filter rows based on conditions.
- \* B. By using Simple Filter conditions: As explained, a Simple Filter cannot handle the combination of AND and OR logic required for this criteria.
- \* D. By creating a Custom Example: Custom Examples are used to provide sample data for testing, not to filter rows in a dataset. Using Advanced Filter conditions allows for the precise application of the required logic to filter the dataset accurately.

#### NEW QUESTION # 47

You want to apply a Filter stage to your derived dataset to show only expense reports submitted in the current month and where the expense report total amount is higher than 2000 USD. What should you do?

- **A. Use a simple filter, two conditions, and "If All" operator.**
- B. Use a simple filter, three conditions, and "If All" operator.
- C. Use a simple filter, two conditions, and "If Any" operator.
- D. Use a simple filter, three conditions, and "If Any" operator.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Filter stage in a derived dataset is used to include only rows that meet specific criteria. The requirement here is to show expense reports that satisfy two conditions: (1) submitted in the current month, and (2) total amount higher than 2000 USD. According to the official Workday Prism Analytics study path documents, this can be achieved by using a simple filter with two conditions and the "If All" operator (option A).

The first condition would check the submission date, using a function like `MONTH()` to compare with the current month (e.g., `MONTH(submission_date) = MONTH(CURRENT_DATE())`). The second condition would compare the total amount (e.g., `total_amount > 2000`). The "If All" operator ensures that both conditions must be true for a row to be included, which aligns with the requirement that both criteria (current month AND amount > 2000 USD) must be met. A simple filter is sufficient because the logic involves straightforward comparisons without nested conditions.

The other options are incorrect:

- \* B. Use a simple filter, two conditions, and "If Any" operator: The "If Any" operator would include rows where either condition is true (e.g., submitted in the current month OR amount > 2000 USD), which does not meet the requirement for both conditions to be true.
- \* C. Use a simple filter, three conditions, and "If All" operator: Only two conditions are needed (submission month and amount), so three conditions are unnecessary.
- \* D. Use a simple filter, three conditions, and "If Any" operator: This combines the issues of option B (wrong operator) and option C (too many conditions).

Using a simple filter with two conditions and the "If All" operator ensures the dataset includes only the expense reports that meet both criteria.

## NEW QUESTION # 48

.....

We try our best to provide the most efficient and intuitive learning methods to the learners and help them learn efficiently. Our Workday-Prism-Analytics exam reference provides the instances to the clients so as to they can understand them intuitively. Based on the consideration that there are the instances to our Workday-Prism-Analytics test guide to concretely demonstrate the knowledge points. Through the stimulation of the Real Workday-Prism-Analytics Exam the clients can have an understanding of the mastery degrees of our Workday-Prism-Analytics exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way.

**New Workday-Prism-Analytics Exam Testking:** <https://www.validbraindumps.com/Workday-Prism-Analytics-exam-prep.html>

Now, stop worrying because I have brought a good thing for you--that is our Workday-Prism-Analytics dumps guide materials, with the help of which you can attain good grades in the exam, Workday Workday-Prism-Analytics Reliable Test Duration At the same time, there are no limits to the numbers of computers you install, High-value Workday-Prism-Analytics: Workday Pro Prism Analytics Exam preparation files with competitive price, Workday Workday-Prism-Analytics Reliable Test Duration So it is of great importance for a lot of people who want to pass the exam and get the related certification to stick to studying and keep an optimistic mind.

Syndicating Your Content on the Web, After completing Workday-Prism-Analytics a rotation, many employees have a newfound respect for their line manager, Now, stop worrying because I have brought a good thing for you--that is our Workday-Prism-Analytics Dumps Guide materials, with the help of which you can attain good grades in the exam.

## 100% Pass Quiz Accurate Workday - Workday-Prism-Analytics Reliable Test Duration

At the same time, there are no limits to the numbers of computers you install, High-value Workday-Prism-Analytics: Workday Pro Prism Analytics Exam preparation files with competitive price, So it is of great importance for a lot of people who want New Workday-Prism-Analytics Exam Testking to pass the exam and get the related certification to stick to studying and keep an optimistic mind.

The evergreen field of Workday is so attractive that it provides non-stop possibilities for the one who passes the Workday Workday-Prism-Analytics exam
