Our C_BCBAI_2509 exam questions are committed to instill more important information with fewer questions and answers, so you can learn easily and efficiently in this process. In the meantime, our service allows users to use more convenient and more in line with the user's operating habits of C_BCBAI_2509 Test Guide, so you will not feel tired and enjoy your study. With timing and practice exam features, studies can experience the atmosphere of the exam and so you can prepare for the next exam better.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which of the following are included in SAP's Responsible AI framework? Note: There are 3 correct answers to this question.

- A. ESG reporting
- **B. Transparency and accountability**
- **C. SAP Global Human Rights commitment**
- **D. Ethical governance**

Answer: B,C,D

Explanation:

SAP's Responsible AI framework includes the SAP Global Human Rights commitment, transparency and accountability, and ethical governance, as detailed in SAP documentation. The SAP Global Human Rights commitment ensures AI respects human rights, aligning with global standards. Transparency and accountability mandate clear documentation of AI processes and decision-making, fostering trust. Ethical governance establishes policies and oversight to ensure fairness, mitigate bias, and comply with regulations. ESG reporting, while part of SAP's sustainability efforts, is not a core component of the Responsible AI framework, and human-centered design is a principle but not explicitly listed. These elements ensure SAP's AI solutions are trustworthy and ethical.

NEW QUESTION # 31

What are the main domain clusters of SAP's guiding principles for ethical AI? Note: There are 3 correct answers to this question.

- **A. Organizational practice**
- B. AI Ethics Steering committee
- C. Executive Sponsorship
- **D. AI System definition**
- **E. AI System engineering**

Answer: A,D,E

NEW QUESTION # 32

(What are some benefits of SAP Signavio's AI-assisted performance indicator recommender? Note: There are 3 correct answers to this question.)

- **A. Simple connection between the business problem, the affected process, and the relevant metric to be measured**
- **B. Instant recommendations based on best practices**
- C. Automated creation of custom KPI dashboards
- D. Cross-system KPI standardization across a company's divisions and departments
- **E. Self-service approach to define an initial process monitoring framework**

Answer: A,B,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The benefits of SAP Signavio's AI-assisted performance indicator recommender include providing a simple connection between business problems, processes, and metrics for targeted monitoring; enabling a self-service approach to establish process monitoring frameworks; and delivering instant recommendations based on best practices to accelerate process improvement.

Exact extracts supporting this:

Simple connection: "Leverage the simplified connection between the business problem, the affected process, and the relevant metric ..."
community.sap.com Self-service approach: "The AI-assisted performance indicators recommender capability provides process owners and analysts with instant, curated recommendations on the process ..."
learning.sap.com (Implying self-service through analyst access.) Instant recommendations: "Instant recommendations based on best practices."
learning.sap.com "An AI-assisted performance indicators recommender delivers instant recommendations on the most relevant process performance indicators (PPIs) ..."
news.sap.com Other options are incorrect because:

Option B: While recommendations aid monitoring, automated dashboard creation is not a specified benefit; focus is on indicator suggestions.

Option D: Standardization may occur indirectly, but the recommender emphasizes instant, tailored recommendations rather than cross-system uniformity.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP News "New Process AI Capabilities for SAP Signavio" and SAP Help Portal "AI-Assisted Performance Indicators Recommender." These highlight the recommender's role in process intelligence within SAP Signavio, positioned as part of AI-enhanced transformation in the SAP Business Suite, as per C_BCBAI_2502 materials and learning journeys on generative AI in Signavio.

NEW QUESTION # 33

Which protocol enables autonomous AI agents to discover each other, delegate tasks, and collaborate across platforms?

- A. Agent-to-Orchestrator (A2O)
- B. Agent Hub
- C. Model Context Protocol (MCP)
- D. Agent2Agent (A2A)

Answer: D

Explanation:

The Agent2Agent (A2A) protocol enables autonomous AI agents to discover each other, delegate tasks, and collaborate across platforms, as detailed in SAP Business AI documentation. This protocol facilitates direct communication and coordination between AI agents, allowing them to share tasks and data seamlessly within and across SAP ecosystems. This ensures efficient, decentralized collaboration for complex workflows. The Agent-to-Orchestrator (A2O) protocol focuses on orchestration, not direct agent collaboration. The Model Context Protocol (MCP) and Agent Hub are not defined protocols in SAP's framework for this purpose. A2A's design supports scalable, autonomous AI operations, enhancing enterprise agility and interoperability.

NEW QUESTION # 34

Which protocol enables autonomous AI agents to discover each other, delegate tasks, and collaborate across platforms?

- A. Agent Hub
- B. Model Context Protocol (MCP)
- C. Agent2Agent (A2A)
- D. Agent-to-Orchestrator (A2O)

Answer: C

NEW QUESTION # 35
