Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q64-Q69):

NEW QUESTION # 64

Which two potential risks can a company encounter when turning on Digital Experiences during B2B Commerce setup? 09m 56s

- A. External members are provided read access to all objects in the org by default.
- B. Digital Experiences extends portal access to external members.

- C. Digital Experiences extends internal org access to external members.
- D. External members may have permissions to view records they should not be able to view.

Answer: B,D

Explanation:

When turning on Digital Experiences during B2B Commerce setup, two potential risks include Digital Experiences extending portal access to external members (A) and the possibility of external members having permissions to view records they should not be able to view (B). Proper configuration and management of access rights and permissions are crucial to mitigate these risks, ensuring that external members only have access to appropriate information and functionalities.

NEW QUESTION # 65

Which two places can an Administrator go to set up Variation products using the B2B Commerce App's navigation menu?

- A. Catalogs
- B. Product Workspace
- C. Entitlement Policies
- D. Products
- E. Commerce Setup

Answer: B,D

Explanation:

To set up Variation products in Salesforce B2B Commerce, an Administrator can navigate to Product Workspace (A) and Products (B) within the B2B Commerce App's navigation menu. The Product Workspace provides a comprehensive area for managing individual products and their variations, allowing for detailed configuration of product attributes and relationships. The Products section offers a broader view of all products, including the ability to access and manage variation relationships. While Catalogs (C), Entitlement Policies (D), and Commerce Setup (E) are important for overall store configuration, they are not the primary locations for setting up product variations.

NEW QUESTION # 66

An Administrator needs to rebuild the Search Index in the B2B Commerce App. What should the Administrator do next while on the store record page?

- A. Click on Search Reindexing in the Quick Actions
- B. Click on Community Settings
- C. Click on the Search tile
- D. Go to Search Reindex in Setup

Answer: A

Explanation:

To rebuild the Search Index in the B2B Commerce App, the Administrator should:

C) Click on Search Reindexing in the Quick Actions: This option directly initiates the reindexing process from the store record page, updating the search index to reflect the most current data across products, categories, and content, thereby improving search accuracy and performance.

NEW QUESTION # 67

An implementation of B2B Commerce is requiring guest users to have read access to the Product object. What should an Administrator do to ensure that guest users have access?

- A. Create a new store sharing setting on the Product object.
- B. Change the org wide default for the Product object to read.
- C. Create a sharing rule on the Product object.
- D. Modify the guest user profile to provide access to the Product object.

Answer: D

Explanation:

To ensure that guest users have read access to the Product object, an Administrator should B. Modify the guest user profile to provide access to the Product object. This involves adjusting the permissions within the guest user profile settings to grant read access specifically to the Product object, ensuring that guest users can view product details without compromising data security.

NEW QUESTION # 68

Which two types of data are supported by the Multilevel Navigation Menu Component in B2B Commerce?

- A. External URL
- B. Data Source
- C. Event
- D. System Link

Answer: A,D

Explanation:

The Multilevel Navigation Menu Component in B2B Commerce supports System Link (A) and External URL (C) as types of data. System Links are used to navigate within the B2B Commerce application, facilitating a seamless user experience by linking to internal pages or resources. External URLs allow the integration of links to external websites, which can be crucial for providing additional product information, manufacturer details, or external resources. Data Source (B) and Event (D) are not typically supported by the navigation menu component as they serve different purposes in the context of B2B Commerce.

NEW QUESTION # 69

.....
