NEW QUESTION # 22

Which transactions can you use to run the path finder? Note: There are 2 correct answers to this question.

- A. Edit freight order
- B. Explanation tool
- C. Carrier selection
- D. Transportation network cockpit

Answer: B,D

Explanation:

In SAP S/4HANA Transportation Management, the path finder is a tool used to analyze and visualize transportation routes and networks, helping planners understand possible paths for freight. According to the SAP documentation:

* Transportation network cockpit (C): This transaction provides a comprehensive interface for managing transportation planning.

including the ability to run the path finder to analyze routes and connections within the transportation network.

* Explanation tool (D): The explanation tool allows users to analyze the results of planning activities, including running the path finder to understand the routes considered by the optimizer or manual planning.

The other options are incorrect:

* Carrier selection (A) focuses on selecting carriers based on criteria like cost or priority, not on running the path finder.

* Edit freight order (B) is used to modify freight order details but does not directly support running the path finder.
