DOWNLOAD the newest TestkingPDF 1Z0-1072-25 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1e6OXoPUVQL2gxzOHvrjEDFyW_n09OJg3

The up-to-date Oracle 1Z0-1072-25 exam answers will save you from wasting much time and energy in the exam preparation. The content of our Oracle 1Z0-1072-25 Dumps Torrent covers the key points of exam, which will improve your ability to solve the difficulties of Oracle 1Z0-1072-25 real questions.

You can customize 1Z0-1072-25 exam questions complexity levels and test duration during any attempt. Real Oracle 1Z0-1072-25 practice test questions like scenarios that the online test creates will enable you to control anxiety. Self-evaluation reports of the 1Z0-1072-25 web-based practice test will inform you where you exactly stand before the final Oracle 1Z0-1072-25 test. 1Z0-1072-25 Exam Questions in this Oracle 1Z0-1072-25 practice test are similar to the real test.

Upgrade Your Professional Career by Obtaining the Oracle 1Z0-1072-25 Certification

Since the cost of signing up for the Oracle Cloud Infrastructure 2025 Architect Associate 1Z0-1072-25 exam dumps is considerable, your main focus should be clearing the Oracle Cloud Infrastructure 2025 Architect Associate 1Z0-1072-25 exam on your first try. Utilizing quality Oracle 1Z0-1072-25 Exam Questions is the key to achieving this. Buy the Oracle Cloud Infrastructure 2025 Architect Associate 1Z0-1072-25 Exam Dumps created to avoid the stress of searching for tried-and-true Oracle 1Z0-1072-25 certification exam preparation.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.
Topic 2	<ul style="list-style-type: none"> Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block File Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.
Topic 3	<ul style="list-style-type: none"> Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 4	<ul style="list-style-type: none"> Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q48-Q53):

NEW QUESTION # 48

What would be the total meteredBytes shown by the File Storage service after the hourly update cycle is complete when you overwrite 0.5 GB of a 1 GB file?

- A. 2.5 GB
- B. 0.5 GB
- C. 1.5 GB
- D. 1 GB

Answer: C

Explanation:

In Oracle Cloud Infrastructure (OCI) File Storage, when you overwrite a portion of a file, the service does not immediately reclaim the space occupied by the previous version of the file. The total meteredBytes reflects both the original data and the new data written.

Scenario Explanation: You start with a 1 GB file. When you overwrite 0.5 GB of this file, the file system retains both the 0.5 GB of the original file and the new 0.5 GB you wrote.

Calculation: The original 1 GB file contributes 1 GB to meteredBytes. When 0.5 GB is overwritten, the total usage becomes 1.5 GB (1 GB original + 0.5 GB new).

Thus, after the hourly update cycle, the total meteredBytes shown by the File Storage service will be 1.5 GB.

NEW QUESTION # 49

Which THREE protocols are supported by the Oracle Cloud Infrastructure (OCI) private Network Load Balancers?

- A. ICMP
- B. iSCSI
- C. BGP

- D. TCP
- E. UDP
- F. HTTP

Answer: D,E,F

Explanation:

The OCI Private Network Load Balancer supports multiple protocols for managing traffic efficiently across your instances within a private subnet. Specifically, it supports:

UDP (User Datagram Protocol): Commonly used for applications that require fast, connectionless communication, such as video streaming or DNS services.

TCP (Transmission Control Protocol): A reliable, connection-oriented protocol, widely used for web traffic and other applications requiring data integrity.

HTTP (Hypertext Transfer Protocol): Frequently used for web traffic, it is an application-layer protocol built on top of TCP and enables communication between web browsers and servers.

The combination of these protocols allows the OCI Network Load Balancer to manage diverse workloads, including web services and real-time applications.

NEW QUESTION # 50

Which Oracle Cloud Infrastructure (OCI) Identity and Access Management (IAM) policy is invalid?

- A. Allow group 'Default/'A-Admins' to manage all-resources in compartment Project-A
- B. Allow any-user to inspect users in tenancy
- C. Allow dynamic-group 'Default/'FrontEnd' to manage instance-family in compartment Project-A
- D. Allow group 'Default/'A-Developers' to create volumes in compartment Project-A

Answer: B

Explanation:

In Oracle Cloud Infrastructure (OCI), Identity and Access Management (IAM) policies are used to control access to resources.

The policy in option C is invalid because "any-user" is not a valid principal in OCI IAM policies. OCI policies can only grant permissions to groups or dynamic groups, but not to arbitrary users.

Here's an explanation for each option:

A . Allow dynamic-group 'Default/'FrontEnd' to manage instance-family in compartment Project-A: This is valid. It grants the dynamic group 'FrontEnd' the ability to manage instances within the Project-A compartment.

B . Allow group 'Default/'A-Admins' to manage all-resources in compartment Project-A: This is valid. It provides full administrative access to all resources in the Project-A compartment for the 'A-Admins' group.

C . Allow any-user to inspect users in tenancy: This is invalid because OCI does not allow the use of "any-user" in policies. You must specify a valid group or dynamic group to define permissions.

D . Allow group 'Default/'A-Developers' to create volumes in compartment Project-A: This is valid. It permits the 'A-Developers' group to create volumes in the Project-A compartment.

OCI Policy Reference

NEW QUESTION # 51

Which authentication option should you use to ensure third-party APIs communicate with OCI resources?

- A. API Signing Key
- B. SSH Key Pair with 2048-bit algorithm
- C. Auth Tokens
- D. OCI Username and Password

Answer: A

Explanation:

When ensuring that third-party APIs communicate securely with OCI resources, the appropriate authentication option is API Signing Key.

API Signing Key: This method uses an RSA key pair to authenticate and sign API requests. The API signing key provides a secure and reliable way to ensure that the API requests to OCI are coming from an authorized source. It is commonly used for programmatic access to OCI services.

Other Options:

SSH Key Pair: Primarily used for secure shell access to compute instances, not for API authentication.

Auth Tokens: Typically used for authentication in environments where APIs don't support the API Signing Key, such as OCI CLI or SDKs.

OCI Username and Password: Generally used for the Console login, not for securing API communications.

Relevant OCI Documentation:

API Signing Key Authentication

This documentation provides details on using API Signing Keys for secure API communication in OCI.

NEW QUESTION # 52

Which statement is true about instance configurations and instance pools in OCI?

- A. You cannot reuse the same instance configuration for multiple instance pools.
- B. You can delete an instance configuration if it is associated with an instance pool.
- **C. You can only delete an instance configuration if it is not associated with any instance pool.**
- D. An instance pool can have multiple instance configurations associated with it.

Answer: C

NEW QUESTION # 53
