CIPM Exam Study Guide 2023-2024| With Questions & Answers (100%Verified)

Which of the following is not a metric an organization would use? - ANSWER - Minimize security threats

Which of the following is least likely a goal of an organization's privacy program? - ANSWER - Hiring a privacy officer or manager

In which of the following ways can internal audit most likely help a privacy program? - ANSWER - Providing consultancy services

What can be considered to be the essence of an organization's privacy notice communicated to the outside world? - ANSWER - A promise on handling

Which of the following is most true about privacy by design? - ANSWER - Results, partly, in compliance with the General Data Protection Regulation

Which of the following is the best description of an accountable organization? - ANSWER - An organization with the necessary policies and procedures

Which step is likely not part of a privacy program with the goal to protect an organization's brand? - ANSWER - Prevent phishing e-mails using the company logo from being sent

What is "the authority aims to safeguard the balance between the right to privacy and other rights"? - ANSWER - A mission or vision

A manufacturing company has placed computers all around the manufacturing area to help machine operators to relax during their lunch break and check their e-mails or social media. The company is doing so in an attempt to stop the machine operators from being distracted by their phones during their work and all the dangers that come with being distracted in a manufacturing area. All the computers are connected to both the intranet and the internet. This allows an internal news bulletin and all policies and procedures to be displayed easily. There are regular updates, for example on family events, updates of procedures, bonus-related information and news on the employee of the month. In addition to involving employees by sharing company news with them, all procedures are on the intranet. Anything from safe work practice guidelines to social media guidelines can be found on the intranet. To use the computer, no login is needed. All computers are configured to be accessible to anyone, with ease. A downside of this is a shared hard-drive, and the older

As for the safe environment and effective product, there are thousands of candidates are willing to choose our CIPM study question, why don't you have a try for our study question, never let you down!

IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q267-Q272):

NEW QUESTION # 267

In a sample metric template, what does "target" mean?

- A. The threshold for a satisfactory rating
- B. The percentage of completion
- C. The suggested volume of data to collect
- D. The frequency at which the data is sampled

Answer: A

Explanation:

In a sample metric template, the target is the threshold for a satisfactory rating. It is the desired or expected value for the metric that indicates a successful performance or outcome. For example, if the metric is the percentage of employees who completed privacy training, the target could be 90% or higher. References: IAPP CIPM Study Guide, page 22.

NEW QUESTION # 268

SCENARIO

Please use the following to answer the next QUESTION:

For 15 years, Albert has worked at Treasure Box - a mail order company in the United States (U.S.) that used to sell decorative candles around the world, but has recently decided to limit its shipments to customers in the 48 contiguous states. Despite his years of experience, Albert is often overlooked for managerial positions. His frustration about not being promoted, coupled with his recent interest in issues of privacy protection, have motivated Albert to be an agent of positive change.

He will soon interview for a newly advertised position, and during the interview, Albert plans on making executives aware of lapses in the company's privacy program. He feels certain he will be rewarded with a promotion for preventing negative consequences resulting from the company's outdated policies and procedures.

For example, Albert has learned about the AICPA (American Institute of Certified Public Accountants)/CICA (Canadian Institute of Chartered Accountants) Privacy Maturity Model (PMM). Albert thinks the model is a useful way to measure Treasure Box's ability to protect personal data. Albert has noticed that Treasure Box fails to meet the requirements of the highest level of maturity of this model; at his interview, Albert will pledge to assist the company with meeting this level in order to provide customers with the most rigorous security available.

Albert does want to show a positive outlook during his interview. He intends to praise the company's commitment to the security of customer and employee personal data against external threats. However, Albert worries about the high turnover rate within the company, particularly in the area of direct phone marketing. He sees many unfamiliar faces every day who are hired to do the marketing, and he often hears complaints in the lunch room regarding long hours and low pay, as well as what seems to be flagrant disregard for company procedures.

In addition, Treasure Box has had two recent security incidents. The company has responded to the incidents with internal audits and updates to security safeguards. However, profits still seem to be affected and anecdotal evidence indicates that many people still harbor mistrust. Albert wants to help the company recover. He knows there is at least one incident the public is unaware of, although Albert does not know the details. He believes the company's insistence on keeping the incident a secret could be a further detriment to its reputation. One further way that Albert wants to help Treasure Box regain its stature is by creating a toll-free number for customers, as well as a more efficient procedure for responding to customer concerns by postal mail.

In addition to his suggestions for improvement, Albert believes that his knowledge of the company's recent business maneuvers will also impress the interviewers. For example, Albert is aware of the company's intention to acquire a medical supply company in the coming weeks.

With his forward thinking, Albert hopes to convince the managers who will be interviewing him that he is right for the job.

What is one important factor that Albert fails to consider regarding Treasure Box's response to their recent security incident?

- A. How data at the company is collected
- B. How long data at the company is kept
- C. What the nature of the data is
- D. Who has access to the data

Answer: B

NEW QUESTION # 269

Incipia Corporation just trained the last of its 300 employees on their new privacy policies and procedures.

If Incipia wanted to analyze the effectiveness of the training over the next 6 months, which form of trend analysis should they use?

- A. Standard variance.
- B. Irregular.
- C. **Statistical.**
- D. Cyclical.

Answer: C

Explanation:

Explanation

This answer is the best form of trend analysis that Incipia Corporation should use to analyze the effectiveness of the training over the next six months, as it can provide a quantitative and objective way to measure and compare the results and outcomes of the training against predefined criteria or indicators. Statistical trend analysis is a method that involves collecting, analyzing and presenting data using statistical tools and techniques, such as charts, graphs, tables or formulas. Statistical trend analysis can help to identify patterns, changes or correlations in the data over time, as well as to evaluate the performance and impact of the training on the organization's privacy program and objectives. NEW QUESTION # 270

SCENARIO

Please use the following to answer the next QUESTION:

For 15 years, Albert has worked at Treasure Box - a mail order company in the United States (U.S.) that used to sell decorative candles around the world, but has recently decided to limit its shipments to customers in the 48 contiguous states. Despite his years of experience, Albert is often overlooked for managerial positions. His frustration about not being promoted, coupled with his recent interest in issues of privacy protection, have motivated Albert to be an agent of positive change.

He will soon interview for a newly advertised position, and during the interview, Albert plans on making executives aware of lapses in the company's privacy program. He feels certain he will be rewarded with a promotion for preventing negative consequences resulting from the company's outdated policies and procedures.

For example, Albert has learned about the AICPA (American Institute of Certified Public Accountants)/CICA (Canadian Institute of Chartered Accountants) Privacy Maturity Model (PMM). Albert thinks the model is a useful way to measure Treasure Box's ability to protect personal data. Albert has noticed that Treasure Box fails to meet the requirements of the highest level of maturity of this model; at his interview, Albert will pledge to assist the company with meeting this level in order to provide customers with the most rigorous security available.

Albert does not want to show a positive outlook during his interview. He intends to praise the company's commitment to the security of customer and employee personal data against external threats. However, Albert worries about the high turnover rate within the company, particularly in the area of direct phone marketing. He sees many unfamiliar faces every day who are hired to do the marketing, and he often hears complaints in the lunch room regarding long hours and low pay, as well as what seems to be flagrant disregard for company procedures.

In addition, Treasure Box has had two recent security incidents. The company has responded to the incidents with internal audits and updates to security safeguards. However, profits still seem to be affected and anecdotal evidence indicates that many people still harbor mistrust. Albert wants to help the company recover.

He knows there is at least one incident the public is unaware of, although Albert does not know the details. He believes the company's insistence on keeping the incident a secret could be a further detriment to its reputation. One further way that Albert wants to help Treasure Box regain its stature is by creating a toll-free number for customers, as well as a more efficient procedure for responding to customer concerns by postal mail.

In addition to his suggestions for improvement, Albert believes that his knowledge of the company's recent business maneuvers will also impress the interviewers. For example, Albert is aware of the company's intention to acquire a medical supply company in the coming weeks.

With his forward thinking, Albert hopes to convince the managers who will be interviewing him that he is right for the job.

On which of the following topics does Albert most likely need additional knowledge?

- A. The requirements for a managerial position with privacy protection duties
- B. The role of privacy in retail companies

- C. The possibility of delegating responsibilities related to privacy
- **D. The necessary maturity level of privacy programs**

Answer: D

Explanation:

Explanation

The topic that Albert most likely needs additional knowledge on is the necessary maturity level of privacy programs. Albert thinks that the AICPA/CICA Privacy Maturity Model (PMM) is a useful way to measure Treasure Box's ability to protect personal data, and that the company should aim to meet the highest level of maturity of this model. However, Albert may not realize that the PMM is not a prescriptive or definitive standard for privacy programs, but rather a descriptive and flexible tool for self-assessment and improvement.

The PMM does not require or expect organizations to achieve the highest level of maturity for all privacy practices, as this may not be feasible, realistic, or appropriate for their specific context, objectives, and risks.

The PMM recognizes that different levels of maturity may be suitable for different organizations or different aspects of their privacy programs, depending on their needs and circumstances. Therefore, Albert should not assume that the highest level of maturity is always the best or the most rigorous option for privacy protection.

Albert should learn more about how to use the PMM effectively and appropriately, and how to determine the optimal level of maturity for Treasure Box's privacy program.

The other options are not topics that Albert most likely needs additional knowledge on. Albert seems to have a good understanding of the role of privacy in retail companies, as he is aware of the importance of protecting customer and employee personal data, as well as complying with relevant laws and regulations. Albert also seems to have a good understanding of the possibility of delegating responsibilities related to privacy, as he plans to assist the company with meeting its privacy obligations and goals. Albert also seems to have a good understanding of the requirements for a managerial position with privacy protection duties, as he intends to demonstrate his knowledge, skills, and experience in this area during his interview. NEW QUESTION # 271

SCENARIO

Please use the following to answer the next QUESTION:

Richard McAdams recently graduated law school and decided to return to the small town of Lexington, Virginia to help run his aging grandfather's law practice. The elder McAdams desired a limited, lighter role in the practice, with the hope that his grandson would eventually take over when he fully retires. In addition to hiring Richard, Mr. McAdams employs two paralegals, an administrative assistant, and a part-time IT specialist who handles all of their basic networking needs. He plans to hire more employees once Richard gets settled and assesses the office's strategies for growth.

Immediately upon arrival, Richard was amazed at the amount of work that needed to be done in order to modernize the office, mostly in regard to the handling of clients' personal data. His first goal is to digitize all the records kept in file cabinets, as many of the documents contain personally identifiable financial and medical data. Also, Richard has noticed the massive amount of copying by the administrative assistant throughout the day, a practice that not only adds daily to the number of files in the file cabinets, but may create security issues unless a formal policy is firmly in place. Richard is also concerned with the overuse of the communal copier/printer located in plain view of clients who frequent the building. Yet another area of concern is the use of the same fax machine by all of the employees. Richard hopes to reduce its use dramatically in order to ensure that personal data receives the utmost security and protection, and eventually move toward a strict Internet faxing policy by the year's end.

Richard expressed his concerns to his grandfather, who agreed, that updating data storage, data security, and an overall approach to increasing the protection of personal data in all facets is necessary. Mr. McAdams granted him the freedom and authority to do so.

Now Richard is not only beginning a career as an attorney, but also functioning as the privacy officer of the small firm. Richard plans to meet with the IT employee the following day, to get insight into how the office computer system is currently set-up and managed.

Which of the following policy statements needs additional instructions in order to further protect the personal data of their clients?

- **A. All unused copies, prints, and faxes must be discarded in a designated recycling bin located near the work station and emptied daily.**
- B. When sending a print job containing personal data, the user must not leave the information visible on the computer screen following the print command and must retrieve the printed document immediately.
- C. All faxes sent from the office must be documented and the phone number used must be double checked to ensure a safe arrival.
- D. Before any copiers, printers, or fax machines are replaced or resold, the hard drives of these devices must be deleted before leaving the office.
