

Top F5 F5CAB4 Questions, F5CAB4 Hot Spot Questions

There are many advantages of our F5CAB4 pdf torrent: latest real questions, accurate answers, instantly download and high passing rate. You can totally trust our F5CAB4 practice test because all questions are created based on the requirements of the certification center. Latest F5CAB4 Test Questions are verified and tested several times by our colleagues to ensure the high pass rate of our F5CAB4 study guide.

So many candidates have encountered difficulties in preparing to pass the F5CAB4 exam. But our study materials will help candidates to pass the exam easily. Our F5CAB4 guide questions can provide statistics report function to help the learners to find weak links and deal with them. The F5CAB4 test torrent boost the function of timing and simulating the exam. They set the timer to simulate the exam and help the learners adjust the speed and keep alert. So the F5CAB4 Guide questions are very convenient for the learners to master and pass the exam. So believe us and take action immediately to buy our F5CAB4 exam torrent.

Pass Guaranteed F5 - F5CAB4 - BIG-IP Administration Control Plane Administration Perfect Top Questions

If you have the certification, it will be very easy for you to achieve your dream. But it is not an easy thing for many candidates to pass the F5CAB4 exam. By chance, our company can help you solve the problem and get your certification, because our company has compiled the F5CAB4 question torrent that not only have high quality but also have high pass rate. We believe that our F5CAB4 exam questions will help you get the certification in the shortest. So hurry to buy our F5CAB4 exam torrent, you will like our products.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q33-Q38):

NEW QUESTION # 33

A BIG-IP Administrator needs to update the list of configured NTP servers. In which area of the Configuration Utility should the BIG-IP Administrator perform this update?

- A. System > Configuration
- B. System > Preferences
- C. System > Services
- D. System > Platform

Answer: A

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: NTP (Network Time Protocol) is vital for management connectivity and HA state synchronization. Correct time is required for log timestamping and device trust group communication⁴⁶. To manage these settings, the administrator navigates to System > Configuration, where general system-level services like NTP and DNS are defined to ensure the Control Plane remains synchronized with the network environment.

NEW QUESTION # 34

A BIG-IP Administrator uses a device group to share the workload and needs to perform service on a BIG-IP device currently active for a traffic group. The administrator needs to enable the traffic group to run on another BIG-IP device in the device group. What should the administrator do to meet the requirement? (Choose one answer)

- A. Create a new Traffic Group and then fail to Standby Unit
- **B. Select Traffic Group and then select Failover**
- C. Select Traffic Group and then select Force to Standby
- D. Select Traffic Group on Primary Unit and then select Demote

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

Traffic Groups are the mechanism BIG-IP uses to control which device owns specific application traffic in a high-availability (HA) configuration. When maintenance is required on a device that is currently active for a traffic group, the correct and recommended action is to fail over that traffic group to another device in the device group.

Failing over the traffic group moves ownership of that traffic group (and the virtual servers associated with it) to another available device without forcing the entire device into standby.

This allows targeted maintenance while minimizing impact to other traffic groups that may still be active on the device.

Why the other options are incorrect:

A is unnecessary and incorrect; traffic groups are not recreated for routine maintenance.

C forces the entire device to standby, which may move more traffic than intended.

D (Demote) affects device trust/priority behavior and is not the standard or recommended method for moving traffic group ownership.

Therefore, selecting the Traffic Group and choosing Failover is the correct solution.

NEW QUESTION # 35

The BIG-IP appliance fails to boot. The BIG-IP Administrator needs to run the End User Diagnostics (EUD) utility to collect data to send to F5 Support. Where can the BIG-IP Administrator access this utility?

- A. External VLAN interface
- **B. Console Port**
- C. Internal VLAN interface
- D. Management Port

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The EUD is a

33hardware-level diagnostic tool that runs outside of the TMOS operating system. Because it is used when the system cannot boot or is in a pre-boot state, it cannot be accessed via the GUI or management network. The administrator must connect physically via the serial Console Port to interact with the boot menu and initiate the hardware tests.

NEW QUESTION # 36

A BIG-IP Administrator makes a configuration change to a Virtual Server on the Standby device of an HA pair. The HA pair is currently configured with Auto-Sync Enabled. What effect will the change have on the HA pair configuration?

- A. The change will be undone when Auto-Sync propagates the config to the HA pair.
- B. The change will be undone next time a configuration change is made on the Active device.
- C. The change will be propagated next time a configuration change is made on the Active device.

- D. The change will take effect when Auto-Sync propagates the config to the HA pair.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: TMOS Device Service Clustering (DSC) allows for configuration changes to be made on any device within a synchronization group. If Auto-Sync is enabled, the Control Plane detects the change on the Standby unit and automatically propagates (pushes) that updated configuration to the other members of the HA pair

NEW QUESTION # 37

A BIG-IP administrator is troubleshooting inconsistent configuration objects on devices in a device group. The administrator uses the command:

```
tmsh run /cm watch-devicegroup-device
```

and observes the following output:

```
devices <devgroup> device clu_id cl_orig cl_time last_sync
```

```
2021 sync_test bigip_a 3273 bigip_a 14:27:00
```

```
2021 sync_test bigip_b 1745 bigip_b 13:52:34 13:42:04
```

```
2021 sync_test bigip_c 1745 bigip_a 13:52:34 13:42:04
```

What two conclusions can be made about this output? (Choose two answers)

- A. Two of the devices in the device group have a configuration that is out of date.
- B. The correct configuration exists on bigip_b and bigip_c because their cluster times match.
- C. The config from bigip_c was synced to the other devices in the device group during the most recent ConfigSync.
- D. bigip_a has the latest configuration.
- E. The correct configuration exists on bigip_a and bigip_c because their cluster times match.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

watch-devicegroup-device shows (among other columns) the commit ID (cid.id / shown here as clu_id), the originating device for that commit (cid-orig / shown here as cl_orig), and the time the configuration change was made (cid.time / shown here as cl_time). The highest/newest commit ID and its time represent the most recent configuration change seen among the devices.

(clouddocs.f5.com) bigip_a has the latest configuration (A) because it shows commit ID 3273 at 14:27:00, which is newer than commit ID 1745 at 13:52:34 on bigip_b and bigip_c. (clouddocs.f5.com) Two devices are out of date (B) because bigip_b and bigip_c are still on the older commit ID 1745, so they do not match the latest commit shown on bigip_a. (clouddocs.f5.com) Why the other options are not supported by this output:

C is not supported: bigip_c is not showing a newer commit than the others; it's on the older commit (1745), so it's not the source of the most recent change. The output's cid-orig column is what tells you where the change was made. (clouddocs.f5.com) D/E are incorrect logic: matching cid.time between two devices only indicates they share the same change timestamp/commit, not that it is the correct or latest configuration. The "latest" is indicated by the newest commit ID/time (here, bigip_a). (clouddocs.f5.com)

NEW QUESTION # 38

.....

In cyber age, it's essential to pass the F5CAB4 exam to prove ability especially for lots of office workers. Our company, with a history of ten years, has been committed to making efforts on developing F5CAB4 exam guides in this field. Since the establishment, we have won wonderful feedback from customers and ceaseless business and continuously worked on developing our F5CAB4 Exam prepare to make it more received by the public. Moreover, our understanding of the importance of information technology has reached a new level. Efforts have been made in our experts to help our candidates successfully pass F5CAB4 exam. Seldom dose the e-market have an authorized study materials for reference.

F5CAB4 Hot Spot Questions: <https://www.testkingpass.com/F5CAB4-testking-dumps.html>

Therefore, you can get a comprehensive idea about our real F5CAB4 study materials, While our F5CAB4 practice materials are beneficiary even you lose your chance of winning this time, F5 Top F5CAB4 Questions Notices You consent to receive notices from us by e-mail at the addresses included in the contact information you submit to the Company, or by adding notices on this site, First and foremost, we offer free renewal for one year, which means once you have made a purchase for our F5CAB4 training

materials, you can enjoy the free renewal in the whole year.

Late one Sunday evening, she asked whether I would like her to bake a cheesecake New F5CAB4 Test Papers for us, A duplex mismatch will not only cause the end user to experience network slowness but also cause many collisions and runts on the switch interface.
