NEW QUESTION # 18

If a Value Stream is bigger than the recommended ART size, SAFe recommends splitting it by development process steps and organizing the trains around those steps respectively.

- A. True
- B. False

Answer: B

Explanation:

SAFe recommends splitting large Value Streams along value delivery boundaries (e.g., by product, solution, or customer segment), not by development process steps. Organizing ARTs by process step creates handoffs and delays, which is contrary to Lean-Agile principles.
