

Exam Sample C_BCBTP_2502 Online & Trusted C_BCBTP_2502 Exam Resource

Exam Code: C_BCBTP_2502
Total No. of Questions: 30
Passing Percentage: 70
Exam Duration: 60 Min

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 1

Which of the following can you do with SAP Datasphere? Note: There are 2 correct answers to this question.

- A. Create and consume in-memory caches
- B. Manage user accounts and authorizations
- C. Integrate data from different sources
- D. Provide a unified data and analytics platform

Answer C D

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 2

What are the main types of APIs commonly used in SAP BTP? Note: There are 2 correct answers to this question.

- A. SOAP APIs
- B. REST APIs
- C. FTP APIs
- D. RPC APIs

Answer A B

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 3

What are some of the SAP BTP commercial models? Note: There are 2 correct answers to this question.

- A. Modular Pricing
- B. Pay-As-You-Go
- C. Subscription
- D. Named User License

Answer B C

As the industry has been developing more rapidly, our C_BCBTP_2502 exam dumps have to be updated at irregular intervals in case of keeping pace with changes. To give you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest C_BCBTP_2502 Exam practices. What's more, we won't charge you in one-year cooperation; if you are pleased with it, we may have further cooperation. We will inform you of the latest preferential activities about our C_BCBTP_2502 test braindumps to express our gratitude towards your trust.

How to improve your IT ability and increase professional IT knowledge of C_BCBTP_2502 real exam in a short time? Obtaining valid training materials will accelerate the way of passing C_BCBTP_2502 actual test in your first attempt. It will just need to take one or two days to practice SAP C_BCBTP_2502 Test Questions and remember answers. You will free access to our test engine for review after payment.

Choosing The Exam Sample C_BCBTP_2502 Online Means that You Have Passed SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite

To help you prepare well, we offer three formats of our C_BCBTP_2502 exam product. These formats include SAP C_BCBTP_2502 PDF dumps, Desktop Practice Tests, and web-based SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite (C_BCBTP_2502) practice test software. Our efficient customer service is available 24/7 to support you in case of trouble while using our C_BCBTP_2502 Exam Dumps. Check out the features of our formats.

SAP C_BCBTP_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.
Topic 2	<ul style="list-style-type: none"> Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q26-Q31):

NEW QUESTION # 26

What is a competitive advantage of SAP BTP for businesses?

- A. Prevents integration with multi-cloud environments.
- B. Eliminates the need for AI-driven automation.
- C. Limits businesses to SAP ERP-only solutions.
- **D. Provides a unified platform for AI, analytics, and automation.**

Answer: D

Explanation:

The primary competitive advantage of SAP BTP lies in its unified nature, bringing together AI, analytics, integration, and automation into a single cohesive platform. Many organizations struggle with "point solutions"-using one vendor for AI, another for database management, and a third for integration. This fragmentation creates technical debt and data silos. SAP BTP solves this by providing a consistent set of tools and a shared data model, which allows for faster innovation and a lower total cost of ownership.

By having these capabilities on a single platform, businesses can create "end-to-end" intelligent scenarios. For example, a company can use Integration Suite to pull data from a third-party CRM, SAP HANA Cloud to process that data in real-time, SAP AI Core to predict customer behavior, and SAP Build Process Automation to trigger a marketing campaign based on those predictions. This level of cross-functional orchestration is difficult to achieve with fragmented systems. Positioning SAP BTP as the "technological foundation" allows businesses to focus on business outcomes rather than managing infrastructure, giving them a significant edge in agility and speed-to-market compared to competitors using traditional, siloed architectures.

NEW QUESTION # 27

Why is SAP BTP considered a strategic platform for digital transformation?

- **A. It centralizes integration, automation, and data-driven decision-making.**
- B. It eliminates the need for external data management solutions.
- C. It provides a one-size-fits-all solution without customization options.
- D. It allows enterprises to move all workloads to SAP on-premise solutions.

Answer: A

Explanation:

SAP BTP is the strategic foundation for the "Intelligent, Sustainable Enterprise." Its primary value lies in its ability to centralize integration, automation, and data-driven decision-making into a single, unified platform. In a modern IT landscape, data is often fragmented across multiple cloud and on-premise systems.

BTP acts as the unified technical layer that breaks down these silos. By providing a common set of services for data management (SAP HANA Cloud), analytics (SAP Analytics Cloud), and integration (SAP Integration Suite), BTP ensures that business leaders have a holistic view of their operations.

Digital transformation requires more than just moving to the cloud; it requires the ability to innovate quickly.

BTP's strategic positioning allows businesses to extend their core SAP applications (like S/4HANA) using side-by-side extensions. This keeps the "core" clean and stable while allowing for rapid innovation at the edge. Furthermore, the platform's automation capabilities (like SAP Build Process Automation) enable companies to optimize their workflows, reducing manual effort and increasing accuracy. By choosing BTP, enterprises are not just buying a set of tools; they are adopting a platform strategy that supports continuous improvement and agility, ensuring they can adapt to market changes more effectively than they could with fragmented, legacy architectures.

NEW QUESTION # 28

Which SAP BTP component provides a centralized hub for managing enterprise APIs?

- A. SAP API Management
- B. SAP Business Network
- C. SAP Ariba
- D. SAP SuccessFactors

Answer: A

Explanation:

As businesses move toward a "composable" architecture, APIs (Application Programming Interfaces) become the essential links between different software components. SAP API Management, a core capability of the SAP Integration Suite on BTP, provides a centralized hub to design, publish, secure, and monitor these APIs.

In a complex SAP Business Suite environment, APIs might be exposed from S/4HANA, SuccessFactors, or even third-party non-SAP systems. Without a centralized management tool, these connections become difficult to track, secure, and update.

SAP API Management allows IT administrators to enforce consistent security policies (such as OAuth or rate-limiting) across all enterprise services, protecting sensitive data from unauthorized access. It also includes a

"Developer Portal," which serves as a self-service catalog where developers can discover and test available APIs, significantly speeding up the development of new applications and integrations. By positioning API Management as a central pillar, SAP BTP enables "API-first" development, which is critical for digital transformation. This ensures that the enterprise is open and connectable, allowing for seamless communication between the digital core and the vast ecosystem of cloud services, mobile apps, and IoT devices.

NEW QUESTION # 29

What is the key advantage of using SAP Business Application Studio?

- A. Restricts the use of external DevOps integrations.
- B. Provides a cloud-native development environment with modern tooling.
- C. Eliminates the need for full-stack development.
- D. Requires on-premise deployment for all applications.

Answer: B

Explanation:

SAP Business Application Studio (BAS) is the next-generation development environment on SAP BTP, evolving from the previous SAP Web IDE. Its primary advantage lies in providing a cloud-native development environment that mimics a local desktop experience while being accessible entirely via a web browser. It is built on the open-source "Theia" framework (similar to VS Code), which allows developers to use modern tooling, terminal access, and a wide array of extensions tailored specifically for SAP-centric development, such as SAP Fiori, SAP Cloud Application Programming Model (CAP), and mobile development.

Positioning BAS as a core part of the SAP Business Suite ecosystem is crucial because it simplifies the

"setup" phase of development. Developers no longer need to configure complex local environments; instead, they use pre-configured "Dev Spaces" optimized for specific business scenarios. This ensures consistency across development teams and streamlines the path from coding to deployment on the SAP BTP Cloud Foundry or Kyma runtimes. By integrating seamlessly with Git for version

control and supporting standard DevOps practices, BAS allows enterprises to modernize their development lifecycle, moving away from legacy monolithic structures toward agile, microservices-based extensions that enhance the core SAP landscape without disrupting it.

NEW QUESTION # 30

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- A. By providing enterprise architecture visualization and analysis.
- B. By preventing real-time integration with business processes.
- C. By restricting governance of IT landscapes.
- D. By enforcing manual IT infrastructure tracking.

Answer: A

Explanation:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals. The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

NEW QUESTION # 31

.....

To help people pass exam easily, we bring you the latest C_BCBTP_2502 exam prep for the actual test which enable you get high passing score easily in test. Our study materials are the up-to-date and all C_BCBTP_2502 Test Answers you practiced are tested by our professional experts. Once you have well prepared with our C_BCBTP_2502 dumps collection, you will go through the formal test without any difficulty.
