SAP Certified Specialist - Project Manager - SAP Activate for Agile Implementation Management Sample Questions (Q13-Q18):

NEW QUESTION # 13
What are the SAP Cloud ALM Implementation capabilities? Note: There are 2 correct answers to this question
.

- A. Monitor project performance centrally
- B. Perform implementation activities
- C. Check data quality prior to migration
- D. Natively built-in test automation

Answer: B,D

NEW QUESTION # 14
What activity do you perform in the Deploy phase?

- A. Final assessment of data quality
- B. Perform productive cutover
- C. Implement operations processes
- D. Complete integration testing

Answer: B

Explanation:
In the Deploy phase of the SAP Activate methodology, the primary activity performed is:
* B. Perform productive cutover: This involves transitioning all project deliverables, configurations, and data from the test environment to the production environment, marking the system's readiness to go live.
The productive cutover ensures that all components are functionally integrated, tested, and ready to support business operations in the live environment. The Deploy phase is critical as it signifies the move to production, where the system becomes fully operational and available for end-users.References:
* SAP Activate methodology deploy phase documentation
* SAP implementation best practices

NEW QUESTION # 15
What are the core capabilities in SAP Cloud ALM for operations? Note: There are 3 correct ans-wers to this que-stion.

- A. Upgrade analysis
- B. Event and alert management
- C. Operation automation
- D. Monitoring
- E. License management

Answer: B,C,D

Explanation:
SAP Cloud ALM for operations supports several core capabilities essential for the maintenance and optimal functioning of SAP systems:
* A. Monitoring: This includes comprehensive system monitoring, covering performance metrics, system health, and more, crucial for maintaining the reliability and availability of SAP solutions.
* C. Event and alert management: This capability ensures that any incidents or anomalies within the SAP environment are detected, alerted, and managed efficiently, allowing for quick resolution and minimal disruption.
* D. Operation automation: Automating daily operations tasks is key to reducing manual overhead, increasing efficiency, and ensuring consistency across processes within the SAP environment. Option B (License management) and E (Upgrade analysis) while

important, are not listed as part of the core capabilities for SAP Cloud ALM for operations per the usual categorization by SAP.References:
* SAP Cloud ALM for operations documentation
* Operational management and monitoring guidelines from SAP
SAP Cloud ALM

NEW QUESTION # 16
What are the core capabilities of SAP Cloud ALM for operations? Note: There are 3 correct answers to this question.

- A. Upgrade analysis
- B. Event and alert management
- C. Operation automation
- D. Monitoring
- E. License management

Answer: B,C,D

NEW QUESTION # 17
What are the capabilities of Task Management application in SAP Cloud ALM with SAP Activate methodology tasks? Note: There are 3 correct ans-wers to this que-stion.

- A. Assign SAP Activate task to a team member
- B. Delete SAP delivered SAP Activate tasks
- C. Create sub-tasks to break down the SAP Activate task
- D. Change description of SAP Activate task
- E. Launch SAP Cloud ALM apps to perform SAP Activate task

Answer: A,C,E

Explanation:
The capabilities of the Task Management application in SAP Cloud ALM when managing SAP Activate methodology tasks include:
* B. Launch SAP Cloud ALM apps to perform SAP Activate task: This allows users to directly access and utilize different SAP Cloud ALM applications necessary for performing specific SAP Activate tasks, integrating workflow and tools.
* C. Create sub-tasks to break down the SAP Activate task: This feature supports the breakdown of larger tasks into more manageable sub-tasks, facilitating detailed tracking and assignment of specific components of a task to different team members.
* E. Assign SAP Activate task to a team member: Enables project managers and team leads to assign tasks directly to team members within the SAP Cloud ALM environment, ensuring clear task delegation
* and responsibility. Option A (Change description of SAP Activate task) and D (Delete SAP delivered SAP Activate tasks) are not typically features supported by the Task Management application in SAP Cloud ALM, as these tasks and their core descriptions are usually predefined and integral to the methodology.References:
* SAP Cloud ALM official documentation
* SAP Activate methodology user guide
