Our experts all have a good command of exam skills to cope with the C-SEC-2405 preparation materials efficiently in case you have limited time to prepare for it, because all questions within them are professionally co-related with the C-SEC-2405 exam. Moreover, to write the Up-to-date C-SEC-2405 Practice Braindumps, they never stop the pace of being better. As long as you buy our C-SEC-2405 study quiz, you will find that we update it from time to time according to the exam center.

SAP Certified Associate - Security Administrator Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which user type in SAP S/4HANA Cloud Public Edition is used for API access, system integration, and scenarios where automated data exchange is required?

- **A. SAP Communication User**
- B. SAP Administrative User
- C. SAP Technical User
- D. SAP Support User

Answer: A

Explanation:

In SAP S/4HANA Cloud Public Edition, the SAP Communication User is specifically designed for API access, system integration, and scenarios requiring automated data exchange. This user type is utilized for machine-to-machine communication, such as integrating SAP systems with external applications or services via APIs, ensuring seamless and secure data flows without human intervention. Unlike SAP Administrative Users, who focus on system management tasks, or SAP Support Users, who are used for troubleshooting and support activities, the Communication User is optimized for programmatic access. The SAP Technical User, while sometimes used in on-premise systems, is not the standard term in SAP S/4HANA Cloud Public Edition for this purpose. The Communication User's role ensures that automated processes, such as data synchronization or third-party integrations, are executed efficiently while maintaining strict security controls and auditability.

NEW QUESTION # 44

Which cloud-based SAP solution helps organizations control their data across various cloud platforms and on- premise data sources?

- **A. SAP Data Custodian**
- B. SAP Privacy Governance

- C. SAP Identity Access Governance
- D. SAP Information Steward

Answer: A

Explanation:

SAP Data Custodian is a cloud-based solution designed to help organizations manage and protect their data across multiple cloud platforms and on-premise data sources. It ensures data sovereignty, compliance, and security by providing real-time insights into data residency, transparency, and access policies. Below is a detailed breakdown of its functionality:

- * **Data Residency Insights:** SAP Data Custodian offers visibility into where data resides, enabling organizations to adhere to local regulations and compliance requirements regarding data storage.
- * **Access Control and Monitoring:** The solution provides tools to define, manage, and monitor data access policies. It ensures that only authorized individuals and systems can access sensitive information.
- * **Multi-cloud and On-premise Support:** SAP Data Custodian integrates seamlessly with various cloud platforms (e.g., AWS, Azure, Google Cloud) and on-premise environments, making it versatile for hybrid IT landscapes.
- * **Compliance Reporting:** Built-in compliance features allow organizations to generate reports that demonstrate adherence to regulations like GDPR, CCPA, and industry-specific standards.
- * **Advanced Security Features:** The solution offers encryption, key management, and risk assessment functionalities, enhancing the overall security posture of the organization.

SAP Security References:

- * SAP Official Documentation: SAP Help Portal for Data Custodian
- * SAP White Paper on Cloud Data Sovereignty
- * SAP Data Custodian Overview Guide

For more detailed implementation guidelines, refer to the SAP Data Custodian documentation available through the SAP Marketplace or the SAP Help Portal.

NEW QUESTION # 45

Under which of the following conditions can you merge authorizations for the same object during role maintenance? Note: There are 2 correct answers to this question.

- A. The activation status and the maintenance status of the authorizations must NOT match.
- **B. The activation status and the maintenance status of the authorizations must match.**
- C. The maintenance status of the changed authorizations must match the status of a manual authorization.
- **D. The activation status of a manual authorization must match the status of the changed authorizations.**

Answer: B,D

Explanation:

- * **Context:** Merging authorizations in SAP role maintenance ensures that multiple authorizations for the same object are harmonized.
- * **Solution Descriptions:**
- * **B:** Matching activation and maintenance statuses ensures consistent merging.
- * **D:** Manual authorizations can be merged only if their activation status matches the changed authorizations.

SAP Security References:

- * SAP Role Maintenance (PFCG) Documentation
- * SAP Authorization Management Guide

NEW QUESTION # 46

In SAP S/4HANA Cloud Public Edition, which of the following can you change in a derived business role if the "Inherit Spaces in Derived Business Roles" checkbox is NOT selected in the leading business role?

- A. Restrictions
- **B. Pages**
- C. Business Role Template
- D. Business Catalogs

Answer: B

Explanation:

In SAP S/4HANA Cloud Public Edition, derived business roles inherit attributes from their leading business role, but the "Inherit

Spaces in Derived Business Roles" checkbox controls whether Spaces are inherited. If this checkbox is not selected, administrators can modify the Pages assigned to the derived business role independently of the leading role. Pages in the SAP Fiori launchpad define the layout and content visible to users, such as tiles and applications, and allowing changes in the derived role provides flexibility to tailor the user interface for specific business needs. The Business Role Template, Restrictions, and Business Catalogs, however, remain inherited and cannot be modified in the derived role, as these are core components defined in the leading role to ensure consistency across related roles. This selective modification of Pages enables organizations to customize user experiences while maintaining standardized authorizations, supporting both operational efficiency and security compliance in SAP S/4HANA Cloud Public Edition's role management framework.

NEW QUESTION # 47

What can be assigned directly to a user when using the SAP Launchpad service in SAP BTP?

- A. Catalogs
- B. Role collections
- C. Launchpad roles
- D. Spaces

Answer: C

NEW QUESTION # 48

.....
