We also offer you free update for 365 days, the update version will send to your email automatically.

HPE Network Switching Associate Exam Sample Questions (Q71-Q76):

NEW QUESTION # 71

Which statement is true given the IP address 10.64.0.240 and subnet mask 255.255.254.0?

- A. The prefix length of the network is /25.
- B. There are more than 8 bits in the host portion.

- C. The network portion of the address is 10.64.
- D. 10.64.0.240 is a broadcast address.

Answer: B

Explanation:

The mask 255.255.254.0 corresponds to a /23 prefix, leaving 9 host bits. That means the host portion contains more than 8 bits.

NEW QUESTION # 72

You have recently configured a LAG interface between two CX switches. You have noticed congestion on one of the links and very little traffic on the other.

What should you configure to reduce the congestion?

- A. Configure LACP fast rate.
- B. Configure a static lag.
- C. Change the hash algorithm.
- D. Change the LACP mode.

Answer: C

Explanation:

Traffic imbalance in a LAG is usually caused by the hash algorithm used to distribute traffic across member links. Changing the hash algorithm to include additional fields (like ports or VLANs) can better balance the load and reduce congestion.

NEW QUESTION # 73

A Network Operator is managing a campus network with multiple HPE Aruba Networking CX switches. To ensure the ability to roll back to a known-good state before making significant changes, a checkpoint of the running configuration is created using the command ``copy running- config checkpoint pre-change-01``. After making several configuration changes related to VLANs and routing, the operator discovers that the changes have caused network instability. They need to revert the switch to the exact state it was in before the changes were made.

Which command should the operator use to immediately restore the switch's active configuration from the checkpoint?

- A. ``copy checkpoint pre-change-01 startup-config`` followed by a reboot
- B. ``checkpoint rollback pre-change-01``
- C. ``copy startup-config running-config``
- D. ``erase startup-config`` followed by a reboot

Answer: B

NEW QUESTION # 74

A Support Technician is remotely troubleshooting a connectivity issue and needs to verify the full Layer 2 and Layer 3 configuration of a specific port, 1/1/5, on an HPE Aruba Networking CX switch. Which single command provides the most comprehensive output, including VLAN membership, STP status, IP address, and other interface-specific details for this purpose?

- A. ``show vlan port 1/1/5``
- B. ``show running-config interface 1/1/5``
- C. ``show interface 1/1/5``
- D. ``show lldp neighbor-info 1/1/5``

Answer: C

NEW QUESTION # 75

Which is at the Transport Layer of the OSI model?

- A. Switch Port
- B. TCP Port

- C. MAC Address
- D. IP Address

Answer: B

Explanation:

The Transport layer is responsible for end-to-end communication and uses port numbers to identify application processes, which is the role performed by TCP ports.

NEW QUESTION # 76

.....

With Exam4Docs, you don't have to waste money, because we offer up to 365 days of free updates of actual HPE6-A86 exam questions. These free updates of valid HPE Network Switching Associate Exam (HPE6-A86) exam dumps will help you keep preparing as per the new updates.
