Huawei HCIP-Storage V5.5 Sample Questions (Q58-Q63):

NEW QUESTION # 58
To prevent misoperations from affecting services, a storage system controls user operation permissions and scopes based on user levels and roles. Which of the following is not a tenant management user role in the storage system?

- A. Tenant administrator
- B. Tenant protocol administrator
- C. Security administrator
- D. Tenant data protection administrator

Answer: C

Explanation:
The *HCIP-Storage V5.5 Training Material (Module 5: Storage System Maintenance and Troubleshooting)* lists tenant management roles: "Tenant management roles include tenant administrator, tenant protocol administrator, and tenant data protection administrator, which manage resources, protocols, and data protection tasks within a tenant's scope." The security administrator is a system-wide role, not specific to tenant management, as it handles global security policies. Thus, option D is not a tenant management role.
