

Quiz 2026 Microsoft High Hit-Rate PL-900: Microsoft Power Platform Fundamentals Reliable Exam Questions

BTW, DOWNLOAD part of TestKingFree PL-900 dumps from Cloud Storage: <https://drive.google.com/open?id=1NHISE13d7wZbE-FO070FQqihZqQ46TiJ>

To contribute the long-term of cooperation with our customers, we offer great discount for purchasing our PL-900 exam pdf. Comparing to other dumps vendors, the price of our PL-900 questions and answers is reasonable for every candidate. You will grasp the overall knowledge points of PL-900 Actual Test with our pass guide and the accuracy of our PL-900 exam answers will enable you spend less time and effort.

Demonstrating the Power BI Capabilities (15-20%)

- **Connecting to and consuming data**

The candidates need to confirm that they are able to combine several data sources; clean as well as transform data; describe and apply aggregate functions; define available data source types including Microsoft Excel; explain use cases for template apps and shared datasets as well as how to consume each.

- **Building a fundamental dashboard with the help of Power BI**

The subtopic requires that the examinees have the skills in designing a Power BI dashboard; designing data mapping and layout; publishing as well as sharing dashboards and reports.

- **Defining the general Power BI components**

This section includes such abilities as defining and describing uses for visualization controls such as bar, pie, donut, KPIs and scatter plots; describing filter types; describing Power BI Data, Desktop Reports, as well as Model tabs; describing uses for custom visuals such as controls or charts; comparing dashboards as well as workspaces; comparing Power BI Service as well as Power BI Desktop.

Valid PL-900 Test Duration, PL-900 Latest Material

The Microsoft Power Platform Fundamentals (PL-900) exam questions are the real, valid, and updated PL-900 Exam Questions that are specifically designed for quick and complete PL-900 exam preparation. With TestKingFree Microsoft Power Platform Fundamentals (PL-900) practice test questions you can start Microsoft PL-900 exam preparation immediately.

Microsoft Power Platform Fundamentals Sample Questions (Q322-Q327):

NEW QUESTION # 322

A company is implementing Power BI to track sales. Each of the company's regions has specific quarterly and yearly sales goals.

You need to build a Power BI dashboard for various reporting requirements.

Which chart types should you use? To answer, drag the appropriate chart types to the correct requirements.

Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Chart types

Requirement

Chart type

Donut

Show the quarterly sales total to date in relation to the sales goal.

KPIs

View the sales trend by month of the sales year to date for all regions.

Line chart

View the year-to-date sales as a percentage by region.

Matrix

Answer:

Explanation:

The screenshot shows the Power BI interface with the following assignments:

Chart types	Requirement	Chart type
Donut	Show the quarterly sales total to date in relation to the sales goal.	KPIs
KPIs	View the sales trend by month of the sales year to date for all regions.	Line chart
Line chart	View the year-to-date sales as a percentage by region.	Donut
Matrix		

Explanation

Box 1: KPIs

A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

Box 2: Line chart

Line charts emphasize the overall shape of an entire series of values, usually over time.

Box 3: Donut

Doughnut charts are similar to pie charts. They show the relationship of parts to a whole. The only difference is that the center is blank and allows space for a label or icon.

NEW QUESTION # 323

A company performs on-site inspections and services for air industrial equipment.

Field technicians must perform a series of maintenance checks every time they visit a customer site. Every technician performs maintenance tasks in a different order. Some technicians miss steps.

You need to ensure that all technicians perform the same steps in the same order.

What should you use?

- A. Business process flow
- B. Business rule
- C. Virtual Agent
- D. AI Builder

Answer: A

Explanation:

Explanation

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

NEW QUESTION # 324

You plan to use Power Automate to monitor what people are saying about your company's products. You store the feedback for research and development purposes.

You need to recommend Power Automate components to use for the solution.

To answer drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split Car between panes or scroll to view content.

NOTE: Each correct selection is worth one point

The screenshot shows a drag-and-drop interface for selecting Power Automate components. On the left, under 'Components', there are four items: 'action', 'expression', 'service', and 'trigger'. In the center, under 'Requirement', there are three tasks: 'Retrieve the top five posts from your company's Facebook page.', 'Enter the resulting posts into the product database.', and 'Combine author and link fields into a single field.', followed by a 'Run a flow every hour.' trigger. On the right, under 'Component', there are four empty slots labeled 'Component'.

Answer:

Explanation:

The screenshot shows the same interface as before, but with the correct components selected. In the 'Components' pane, 'action', 'expression', 'service', and 'trigger' are highlighted with green boxes. In the 'Component' pane, 'action', 'expression', and 'trigger' are highlighted with red boxes, indicating they are the correct selections for the requirements.

NEW QUESTION # 325

You test a business process flow in a sandbox environment. When you complete testing, you must copy the business process flow to a production environment without bringing any data or other modifications with it. You must meet the requirements.

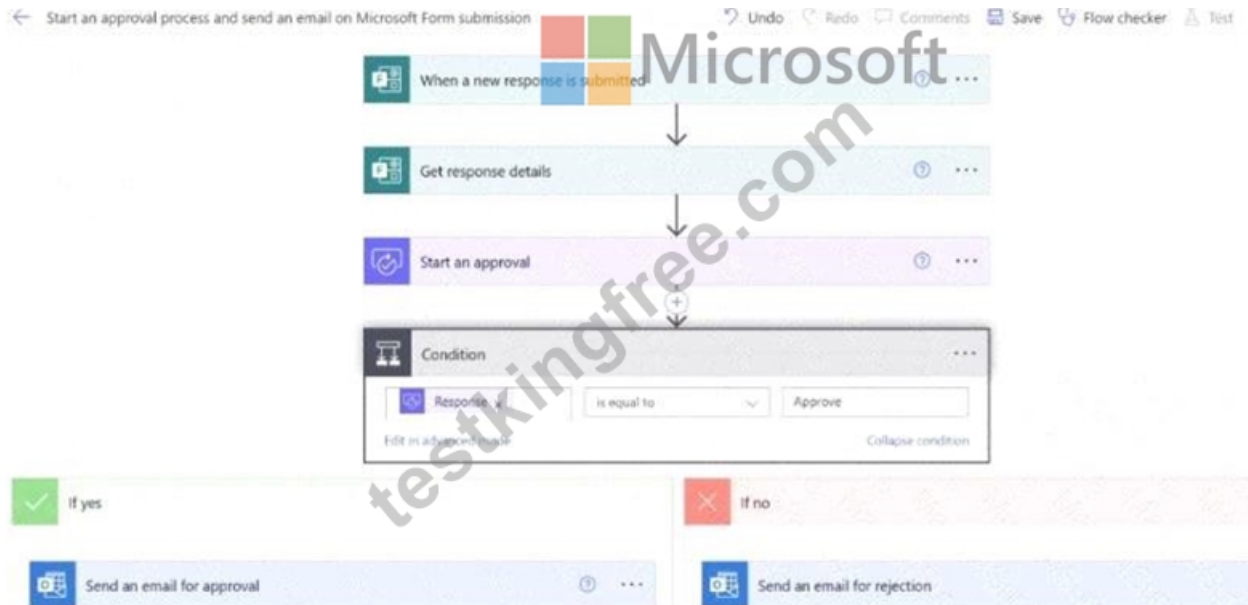

What should you do?

- A. Add the business process flow to a separate solution. Export the solution.
- B. Export the form that contains the business process flow to a separate solution.
- C. Export the default solution.
- D. Create a view and export the view.

Answer: A

NEW QUESTION # 326

You are editing the Power Automate cloud flow depicted in the following screenshot:

You need to perform a step analysis to determine how the flow uses its connectors and the connector components. What is the result of the step analysis? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Step analysis

Which step is a trigger?

Which step uses the same connector as Get response details?

Result

- Get response details
- Get response details
- Start an approval
- Send an email for approval
- When a new response is submitted

- Send an email for approval
- Start an approval
- Send an email for approval
- When a new response is submitted

Answer:

Explanation:
