In addition, you can print these HP HPE0-J68 PDF questions for paper study in this format of Exam4Free product frees you from restrictions of time and place as you can study HPE0-J68 exam questions from your comfort zone in your spare time. The second version is the web-based format of the HP HPE0-J68 Practice Test. Browsers such as Internet Explorer, Microsoft Edge, Firefox, Safari, and Chrome support the web-based practice exam.

HPE Storage Solutions Sample Questions (Q174-Q179):

NEW QUESTION # 174

A customer needs a centralized solution for storing departmental data to be accessed by Windows-based laptops and other personal devices.

Which solution should you recommend?

- A. Object storage, accessed over S3 connector
- B. Block storage, directly accessed over FC
- C. Block storage, directly accessed over SAS
- D. File-oriented storage, accessed over SMB

Answer: D

Explanation:

For a customer needing a centralized storage solution accessible by Windows-based laptops and other personal devices, file-

oriented storage accessed over SMB (Option D) is the most appropriate recommendation. SMB (Server Message Block) is a network file sharing protocol that allows files to be shared among devices running on a Windows network. File-oriented storage solutions, like HPE's StoreEasy or Nimble with file services, are designed to serve files over the network using SMB, providing easy and secure access to departmental data.

NEW QUESTION # 175

A customer need to implement a new SAN fabric for their growing environment .The new SAN should provide a high performance and port-efficient network with many-to-many connectivity .Because of changing requirement and the possible acquisition of another company in the near future. The customer cannot predict the I/O traffic pattern within the SAN .The customer also concerned about availability. Which type of SAN topology should you recommend?

- A. Cascaded fabric
- **B. Meshed fabric**
- C. Single switch fabric
- D. Core-edge fabric

Answer: B

Explanation:

A Meshed fabric SAN topology is recommended when the customer requires a high-performance, port-efficient network with many-to-many connectivity and cannot predict I/O traffic patterns. This topology provides multiple paths between devices, ensuring high availability and redundancy. It is flexible and can easily accommodate changes in the network, such as the acquisition of another company, making it ideal for environments with dynamic requirements.

NEW QUESTION # 176

A customer need a new storage system for visual desktop infrastructure environment to reduce the time required to provision new desktop. Which HPE solution should you recommended to fulfill this customers requirements?

- A. Storage pool on HPE store Easy
- B. Virtual Copy on HPE 3Par storeServ
- **C. SmartClone on HPE store virtual VSA(54)**
- D. Snapclones on HPE MSA 2040

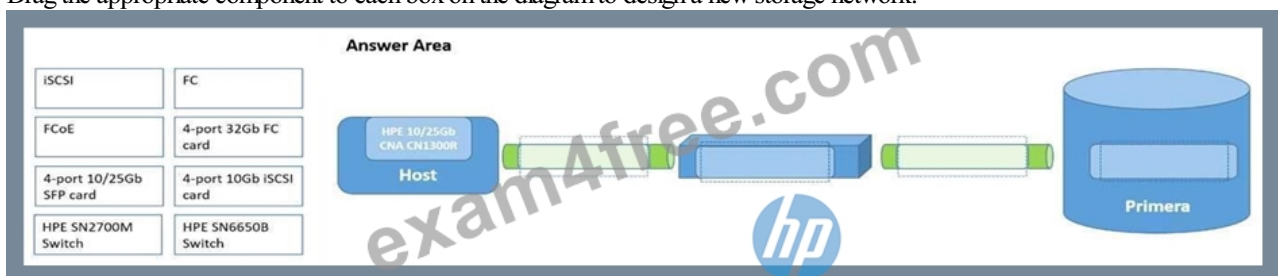

Answer: C

NEW QUESTION # 177

Drag and Drop Question

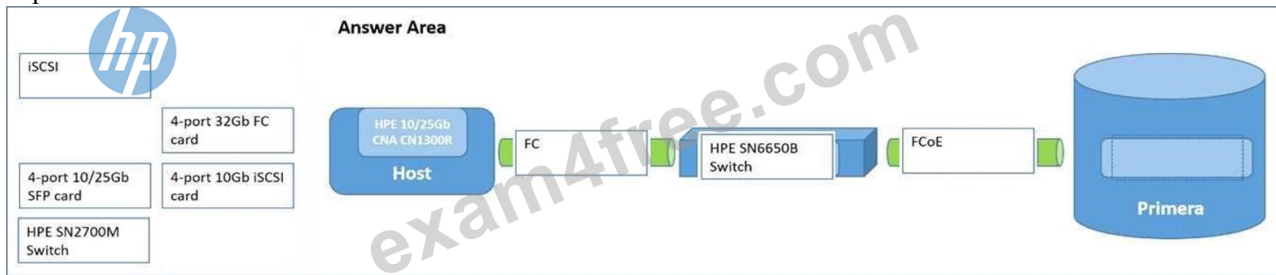

A customer wants to implement a new storage network, but wants to retain the ability to connect with legacy fiber channel-based components.

Drag the appropriate component to each box on the diagram to design a new storage network.

Answer:

Explanation:

NEW QUESTION # 178

Which statement regarding the deduplication process on HPE StoreOnce is a true?

- A. It is applied on a per-VTL/NAS/Catalyst Store basis
- B. It is only available for Catalyst Store
- C. It can be disabled at any time
- D. It requires an extra license

Answer: A

Explanation:

The deduplication process on HPE StoreOnce is applied on a per-VTL (Virtual Tape Library), NAS, or Catalyst Store basis. This means that deduplication settings can be configured individually for each store type, allowing for flexible data reduction strategies depending on the specific use case. Deduplication helps to significantly reduce the amount of storage required by eliminating duplicate data, making it a key feature in data protection environments.
