In order to meet all demands of all customers, our company has employed a lot of excellent experts and professors in the field to design and compile the SC-200 study materials with a high quality. It has been a generally accepted fact that the SC-200 Study Materials from our company are more useful and helpful for all people who want to pass exam and gain the related exam. We believe this resulted from our constant practice, hard work and our strong team spirit.

Microsoft SC-200 certification provides several benefits to the candidates, including recognition of their skills and knowledge in cybersecurity, improved job opportunities, and higher salary packages. Microsoft Security Operations Analyst certification also helps the candidates to stay updated with the latest cybersecurity trends and techniques. Furthermore, the certification is globally recognized, which means that it opens doors to job opportunities worldwide. In conclusion, the Microsoft SC-200 Certification is an essential certification for security analysts who want to demonstrate their expertise in cybersecurity and advance their career in this field.

>> SC-200 Fresh Dumps <<

Pass Guaranteed 2026 Professional Microsoft SC-200 Fresh Dumps

Furthermore, it is our set of SC-200 brain dumps that stamp your success with a marvelous score. The dumps include SC-200 study questions that likely to be set in real SC-200 exam. They provide you a swift understanding of the key points of SC-200 covered under the syllabus contents. Going through them enhances your knowledge to the optimum level and enables you to ace exam without any hassle. No need of running after unreliable sources such as free courses, online SC-200 courses for free and SC-200 dumps that do not ensure a passing guarantee to the SC-200 exam candidates.

Microsoft SC-200 (Microsoft Security Operations Analyst) certification exam is designed for security professionals who are responsible for monitoring, detecting, and responding to security incidents. SC-200 exam measures the skills and knowledge required to manage security operations in a Microsoft environment. Microsoft Security Operations Analyst certification is ideal for individuals who are interested in advancing their careers in the field of cyber security.

The SC-200 Certification Exam is a challenging but rewarding opportunity for security professionals who are looking to take their careers to the next level. With the right preparation and dedication, candidates can successfully pass the exam and achieve this valuable certification.

Microsoft Security Operations Analyst Sample Questions (Q51-Q56):

NEW QUESTION # 51
You need to use an Azure Resource Manager template to create a workflow automation that will trigger an automatic remediation when specific security alerts are received by Azure Security Center.
How should you complete the portion of the template that will provision the required Azure resources? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

```
"resources": [
  {
    "type": "  [ ▼ ] /automations",
              Microsoft.Automation
              Microsoft.Logic
              Microsoft.Security
    "apiVersion": "2019-01-01-preview",
    "name": "[parameters('name')]",
    "location": "[parameters('location')]",
    "properties": {
      "description": "[format(variables('description'), '{0}', parameters
('subscriptionId'))]",
      "isEnabled": true,
      "actions": [
        {
          "actionType": "LogicApp",
          "logicAppResourceId": "[resourceId('ITEM2/workflows', parameters
('appName'))]",
          "uri": "[listCallbackURL(resourceId(parameters('subscriptionId'),
parameters('resourceGroupName'), '  [ ▼ ] /workflows/triggers',
                                       Microsoft.Automation
                                       Microsoft.Logic
                                       Microsoft.Security
parameters('appName'), 'manual'), '2019-05-01').value]"
        }
      ],
```

Answer:

Explanation:

```
'resources": [
  {
    "type": "          ▼  /automations",
              Microsoft.Automation
              Microsoft.Logic
              Microsoft.Security
    "apiVersion": "2019-01-01-preview",
    "name": "[parameters('name')]",
    "location": "[parameters('location')]",
    "properties": {
        "description": "[format(variables('description'), '{0}', parameters
('subscriptionId'))]",
        "isEnabled": true,
        "actions": [
          {
            "actionType": "LogicApp",
            "logicAppResourceId": "[resourceId('ITEM2/workflows', parameters
('appName'))]",
            "uri": "[listCallbackURL(resourceId(parameters('subscriptionId')
parameters('resourceGroupName'), '          ▼  /workflows/triggers',
                                            Microsoft.Automation
                                            Microsoft.Logic
                                            Microsoft.Security
parameters('appName'), 'manual'), '2019-05-01').value]"
          }
```

**NEW QUESTION # 52**

You have a Microsoft Sentinel workspace

You develop a custom Advanced Security information Model (ASIM) parser named Parser1 that produces a schema named Schema1.

You need to validate Schema1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Parser1 | getschema | | invoke ▼ | ASimSchemaTester('Schema1')
          evaluate   evaluate
          getschema   getschema
          invoke   invoke
          parse   parse

Answer:

Explanation:

Parser1 | getschema ▼ | | invoke ▼ | ASimSchemaTester('Schema1')
          evaluate   evaluate
          getschema   getschema
          invoke   invoke
          parse   parse

Explanation:

Parser1 | getschema | | invoke ▼ | ASimSchemaTester('Schema1')

NEW QUESTION # 53

You need to use an Azure Sentinel analytics rule to search for specific criteria in Amazon Web Services (AWS) logs and to generate incidents.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

area and arrange them in the correct order.

a Microsoft 365 E5

Actions

Answer Area

Create a rule by using the Changes to Amazon VPC settings rule template

From Analytics in Azure Sentinel, create a Microsoft incident creation rule

> (>)
> (<)

Add the Amazon Web Services connector

Set the alert logic

From Analytics in Azure Sentinel, create a custom analytics rule that uses a scheduled query

Select a Microsoft security service

Add the Syslog connector

(∧)
(∨)

Answer:

Explanation:

Answer Area

Add the Amazon Web Services connector

From Analytics in Azure Sentinel, create a custom analytics rule that uses a scheduled query

Set the alert logic

1 - Add the Amazon Web Services connector
2 - From Analytics in Azure Sentinel, create a custom analytics rule that uses a scheduled query
3 - Set the alert logic
Reference:
https://docs.microsoft.com/en-us/azure/sentinel/detect-threats-custom

NEW QUESTION # 54
You have a Microsoft 365 E5 subscription that uses Microsoft 365 Defender for Endpoint.
You need to ensure that you can initiate remote shell connections to Windows servers by using the Microsoft 365 Defender portal.
What should you configure? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 55
You have an Azure subscription that is linked to a hybrid Azure AD tenant and contains a Microsoft Sentinel workspace named Sentinel1.
You need to enable User and Entity Behavior Analytics (UEBA) for Sentinel 1 and configure UEBA to use data collected from Active Directory Domain Services (AD OS).
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

To the AD DS domain controllers, deploy: `The Azure Connected Machine agent ▼`

Microsoft Defender for Identity sensors
The Azure Connected Machine agent
The Azure Monitor agent

For Sentinel1, configure: `The Audit Logs data source ▼`

The Audit Logs data source
The Security Events data source
The Signin Logs data source

Explanation:

Answer Area

To the AD DS domain controllers, deploy: `The Azure Connected Machine agent ▼`

For Sentinel1, configure: `The Audit Logs data source ▼`
