No study can be done successfully without a specific goal and a powerful drive, and here to earn a better living by getting promotion is a good one.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 2	<ul style="list-style-type: none">App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.

Topic 3	<ul style="list-style-type: none"> User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 4	<ul style="list-style-type: none"> Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 5	<ul style="list-style-type: none"> Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.

Plat-Admn-202 Real Exam Preparation Materials | Plat-Admn-202 Exam Prep - PracticeDump

Many candidates find the Salesforce Plat-Admn-202 exam preparation difficult. They often buy expensive study courses to start their Salesforce Plat-Admn-202 certification exam preparation. However, spending a huge amount on such resources is difficult for many Salesforce Plat-Admn-202 Exam applicants.

Salesforce Certified Platform App Builder Sample Questions (Q302-Q307):

NEW QUESTION # 302

DreamHouse Realty wants to display a weather map component on a Lightning record page when a house is scheduled for a showing.

How should the app builder meet the requirement?

- A. Component visibility
- B. Sharing rules
- C. Field-level field
- D. Field-level security

Answer: A

Explanation:

To display a weather map component on a Lightning record page conditionally:

A . Component visibility should be used. This feature in the Lightning App Builder allows components on a Lightning page to be displayed based on specific criteria, such as field values or user attributes. In this case, the app builder can set the visibility of the weather map component to only appear when a house is scheduled for a showing based on the relevant field values.

For more details on setting up conditional component visibility, review the guide on Dynamic Lightning Pages.

NEW QUESTION # 303

The Service Manager provided the app builder with color code requirements for case age on open cases.

New cases populate a green circle

Day-old cases populate a yellow circle
Three-day-old cases populate a red circle
How should an app builder implement this requirement?

- A. Lightning Web Component
- B. Quick Action
- C. Custom Button
- D. **Formula Field**

Answer: D

Explanation:

A formula field is a read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change. You can use formula fields to display images based on certain conditions. In this case, a formula field can be used to display a green, yellow, or red circle image based on the case age.

NEW QUESTION # 304

Cloud Kicks has a sales rep who is stating that their Contact is unavailable for other users to see within Salesforce. In which three ways can an app builder troubleshoot this issue?

Choose 3 answers

- A. Create an Account Sharing Rule to give the users access to all records.
- B. Create a new Contact and have the users try again.
- C. Verify the users with the issue have access to the Contact object.
- D. Review the Contact record and ensure it is linked to an Account.
- E. Confirm whether Default Organization-Wide Sharing Settings provide access to the Account.

Answer: C,D,E

NEW QUESTION # 305

Universal Containers has two types of applicants, hourly and salary. There are separate record types for each. While all members of the human resource department need to be able to view all applicant records, only the hiring Manager and VP of HR should be able to create salary applicant records.

What should the app builder recommend to meet this requirement?

- A. Configure the hourly record type as the default and instruct non-management users to accept the default record type.
- B. Remove "create" permission for the salary applicant object for everyone except the manager and VP.
- C. Update the org-wide default to private and create a sharing rule for the role of recruiting manager.
- D. **Create a permission set containing the salary record type and assign it to the appropriate users.**

Answer: D

Explanation:

A permission set containing the salary record type and assigning it to the appropriate users would allow only those users to create salary applicant records, while still allowing all users to view all applicant records. This is the most granular and flexible way to meet the requirement.

NEW QUESTION # 306

Universal Containers require different fields to be filled out at each stage of the Opportunity sales process. What configuration steps can an app builder use to meet this requirement?

- A. Create a Process Builder to prompt the User for field information.
- B. **Add the Path component to the Lightning record page.**
- C. Define record types and page layouts for each stage.
- D. Set page layout required fields based on the current stage.

Answer: B

Explanation:

The app builder should use the Path component to meet the requirement of tracking different fields at each stage of the Opportunity sales process. The Path component is a Lightning component that displays the key fields and guidance for each stage of a standard or custom picklist field, such as the Opportunity Stage field. The app builder can configure the Path component to show the fields that need to be filled out and provide recommendations and sales strategies for each stage. Option A, B, and C are not configuration steps that can meet this requirement.

NEW QUESTION # 307

Our company abides by the industry norm all the time.
