

Free PDF Quiz Newest Dynatrace-Associate - Free Dynatrace Associate Certification Exam Pdf Guide

Dynatrace mockup associate certification exam (Test 1)

1)

Which metric in Dynatrace indicates the responsiveness of an application from the end-user perspective?

Your answer is correct!

Application Response Time

Memory consumption

Network bandwidth

CPU utilization

2)

How does Dynatrace assist organizations in proactively improving digital experiences for end-users?

By conducting occasional manual user surveys.

Proactive improvement of digital experiences is not supported by Dynatrace.

By relying solely on reactive issue resolution.

Your answer is correct!

Through continuous monitoring, analysis, and proactive alerts based on predefined thresholds.

To make sure your possibility of passing the certificate, we hired first-rank experts to make our Dynatrace-Associate practice materials. So the proficiency of our team is unquestionable. They help you to review and stay on track without wasting your precious time on useless things. By handpicking what the Dynatrace-Associate practice exam usually tested in exam and compile them into our Dynatrace-Associate practice materials, they win wide acceptance with first-rank praise. To go with the changing neighborhood, we need to improve our efficiency of solving problems as well as the new contents accordingly, so all points are highly fresh about in compliance with the syllabus of the exam.

Dynatrace Dynatrace-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.
Topic 2	<ul style="list-style-type: none"> Synthetics: Covers the creation and monitoring of synthetic tests to simulate user interactions and proactively detect availability or performance issues.

Topic 3	<ul style="list-style-type: none"> • Foundational Platform Capabilities: Covers the core features and navigation of the Dynatrace platform, including entity relationships, tagging, and how data is collected.
Topic 4	<ul style="list-style-type: none"> • Reporting and Analysis: Covers tools and methods for analyzing observability data and generating insights to support performance and operational decisions.
Topic 5	<ul style="list-style-type: none"> • Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.
Topic 6	<ul style="list-style-type: none"> • Log Investigation: Covers querying, filtering, and analyzing log data within Dynatrace to troubleshoot and identify root causes of problems.
Topic 7	<ul style="list-style-type: none"> • Infrastructure Observability: Covers monitoring and visibility into hosts, services, and infrastructure components to detect and analyze performance issues.
Topic 8	<ul style="list-style-type: none"> • Business Analytics: Covers capturing and correlating business metrics with technical data to measure the impact of application performance on business outcomes.

Dynatrace-Associate Vce Download - Guide Dynatrace-Associate Torrent

Before you buy our product, you can download and try out it freely so you can have a good understanding of our Dynatrace-Associate test prep. The page of our product provide the demo and the aim to provide the demo is to let the client understand part of our titles before their purchase and see what form the software is after the client open it. The client can visit the page of our product on the website. We guarantee to you our Dynatrace-Associate Exam Materials can help you and you will have an extremely high possibility to pass the exam.

Dynatrace Associate Certification Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79

What steps would I need to perform to analyze logs?

- A. Distributed Traces
- B. Ingest logs into Dynatrace
- C. Dynatrace DQL
- D. Dynatrace RUM
- E. Dynatrace Operator

Answer: B,C

Explanation:

To analyze logs in Dynatrace, two essential steps are required:

* Ingest logs into Dynatrace - logs must first be collected and stored in the platform (Grail)

* Use DQL (Dynatrace Query Language) - to query, filter, and analyze the ingested log data. These steps allow users to extract insights, detect issues, and correlate logs with other observability data.

Other options are not part of log analysis:

* RUM is for user experience monitoring

* Distributed Traces are for request tracking

* Operator is for Kubernetes deployment

Reference: Based on official Dynatrace University training materials on log monitoring and DQL.

NEW QUESTION # 80

Which attribute provides a unique value to view a transaction end-to-end?

- A. Span kind

- B. Process id
- C. Service type
- **D. W3C trace id**

Answer: D

Explanation:

The W3C trace ID uniquely identifies a distributed trace across all services and components involved in a transaction.

It enables:

- * End-to-end visibility of a request
- * Correlation of spans across multiple services
- * Full trace reconstruction in distributed environments

Other attributes are not unique identifiers:

- * Span kind describes the role of a span
- * Process ID identifies a process, not a transaction
- * Service type categorizes services

Only the W3C trace ID provides a globally unique identifier for a full transaction.

Reference: Based on official Dynatrace University training materials covering distributed tracing.

NEW QUESTION # 81

In Distributed Traces, how is the trace-id propagated in an environment?

- **A. HTTP header**
- B. TLS handshake
- C. JSON payload
- D. XML payload

Answer: A

Explanation:

In distributed tracing, Dynatrace follows standard tracing protocols (such as W3C Trace Context), where the trace ID is propagated via HTTP headers between services.

This enables:

- * End-to-end trace continuity across services
- * Correlation of requests across distributed systems
- * Seamless tracking through microservices architectures

The trace context is typically included in headers like traceparent, ensuring each downstream service continues the same trace.

Other options are incorrect because:

- * XML and JSON payloads are not used for trace propagation
- * TLS handshake is unrelated to trace context propagation

Reference: Based on official Dynatrace University training materials covering distributed tracing and W3C trace context.

NEW QUESTION # 82

Which of the following Synthetics simulate an HTTP request to a URL or endpoint?

- A. Browser clickpaths
- **B. HTTP monitor**
- C. Ping test
- D. Single-URL browser monitors

Answer: B

Explanation:

HTTP monitors are designed specifically to simulate HTTP requests to a defined URL or endpoint. They validate response codes, headers, and content, and measure availability and response time from various locations.

- * Ping tests only check network-level availability using ICMP and do not perform HTTP requests
- * Single-URL browser monitors simulate real browser interactions, including page rendering and JavaScript execution
- * Browser clickpaths simulate multi-step user journeys through an application. Therefore, HTTP monitors are the correct choice for simulating direct HTTP requests.

Reference: Based on official Dynatrace University training materials on Synthetic Monitoring types.

NEW QUESTION # 83

Name the 3 pillars of observability?

- A. Automation
- B. Logs
- C. Traces
- D. Metrics
- E. Dynatrace RUM

Answer: B,C,D

Explanation:

The three pillars of observability are:

- * Metrics - numerical performance data
- * Logs - event-based records
- * Traces - end-to-end request tracking

These pillars provide the foundation for understanding system behavior.

Other options:

- * Automation is not a pillar
- * RUM is a capability built on top of these pillars

Reference: Based on standard observability principles covered in Dynatrace University.

NEW QUESTION # 84

.....

The Dynatrace-Associate study materials are mainly through three learning modes, Pdf, Online and software respectively. Among them, the software model is designed for computer users, can let users through the use of Windows interface to open the Dynatrace-Associate study materials of learning. It is convenient for the user to read. The Dynatrace-Associate study materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the Dynatrace-Associate Study Materials can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online more conveniently at the same time. As far as concerned, the online mode for mobile phone clients has the same function.
