Certification JN0-336 Exam, JN0-336 Authentic Exam Hub

The objective of the VerifiedDumps is to help JN0-336 exam applicants crack the test. It follows its goal by giving a completely free demo of Real JN0-336 Exam Questions. The free demo will enable users to assess the characteristics of the Security, Specialist (JNCIS-SEC) exam product.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q61-Q66):

NEW QUESTION # 61

After JSA receives external events and flows, which two steps occur? (Choose two.)

- A. Before formatting the data, the data is analyzed for relevant information.

- B. Before the information is filtered, the information is formatted
- C. After the information is filtered, JSA responds with active measures
- D. After formatting the data, the data is stored in an asset database.

Answer: B,D

Explanation:

When JSA (Juniper Secure Analytics) receives external events and flows, the typical processing steps are:

Option C. Before the information is filtered, the information is formatted.

Data formatting is an initial step in the process where raw data from events and flows is converted into a standard format that can be more easily processed and analyzed by JSA.

Option A. After formatting the data, the data is stored in an asset database.

Once the data is formatted, it is stored in an asset database. This database acts as a repository for all the formatted data, enabling JSA to perform further analysis, correlation, and eventually, to maintain a comprehensive view of the network assets and activities. These steps are part of JSA's comprehensive approach to security event management, which involves collecting, normalizing, and analyzing data to identify potential security threats and vulnerabilities efficiently.

NEW QUESTION # 62

You want to use IPS signatures to monitor traffic.

Which module in the AppSecure suite will help in this task?

- A. AppFW
- B. AppTrack
- C. AppQoS
- D. APPID

Answer: A

Explanation:

The AppFW module in the AppSecure suite provides IPS signatures that can be used to monitor traffic and detect malicious activities. AppFW also provides other security controls such as Web application firewall, URL filtering, and application-level visibility.

NEW QUESTION # 63

Which statement about security policy schedulers is correct?

- A. A policy can have multiple schedulers.
- B. Multiple policies can use the same scheduler.
- C. A policy without a defined scheduler will not become active
- D. When the scheduler is disabled, the policy will still be available.

Answer: B

Explanation:

Schedulers can be defined and reused by multiple policies, allowing for more efficient management of policy activation and deactivation. This can be particularly useful for policies that need to be activated during specific time periods, such as business hours or maintenance windows.

NEW QUESTION # 64

Which two statements about SRX Series device chassis clusters are true? (Choose two.)

- A. Redundancy group 0 is only active on the cluster backup node.
- B. Each chassis cluster member requires a unique cluster ID value.
- C. Chassis cluster member devices must be the same model.
- D. Each chassis cluster member device can host active redundancy groups

Answer: C,D

Explanation:

In a chassis cluster, both nodes can host active redundancy groups. The active redundancy groups can be distributed between the two nodes, depending on the configuration and failover status, allowing each node to handle traffic for different sets of services or interfaces.

For the chassis clustering to function correctly, both nodes in the cluster must be of the same model.

This requirement ensures that the hardware capabilities, such as processing power and interface compatibility, are identical, which is crucial for maintaining consistent performance and behavior between cluster nodes.

NEW QUESTION # 65

Click the Exhibit button.

Which two statements about the log output shown in the exhibit are correct? (Choose two)

- A. Traffic destined to the HTTP server is placed in an IPsec tunnel
- **B. AppTrack is enabled on the untrust zone.**
- C. Source NAT is performed
- **D. AppTrack is enabled on the trust zone.**

Answer: B,D

NEW QUESTION # 66

.....

Thousands of Security, Specialist (JNCIS-SEC) (JN0-336) exam applicants are satisfied with our JN0-336 practice test material because it is according to the latest Security, Specialist (JNCIS-SEC) (JN0-336) exam syllabus and we also offer up to 1 year of free Juniper Dumps updates. Visitors of VerifiedDumps can check the JN0-336 product by trying a free demo. Buy the JN0-336 test preparation material now and start your journey towards success in the JN0-336 examination.

Certification JN0-336 Exam: <https://www.verifiedumps.com/JN0-336-valid-exam-braindumps.html>

Therefore, Security, Specialist (JNCIS-SEC) (JN0-336) mock exam takers will experience the real exam environment, VerifiedDumps professionals collect all the latest exam questions and answers which can be very much helpful for getting Juniper certification, candidates can easily get access to the services of JN0-336 Security, Specialist (JNCIS-SEC) exam which will assure them 100% passing success rate, Juniper Free JN0-336 Dumps So high quality materials can help you to pass your exam effectively, make you feel easy, to achieve your goal.

Managing Hardware Issues, A good example is portable benefits, Therefore, Security, Specialist (JNCIS-SEC) (JN0-336) mock exam takers will experience the real exam environment, VerifiedDumps professionals collect all the latest exam questions and answers which can be very much helpful for getting Juniper certification, candidates can easily get access to the services of JN0-336 Security, Specialist (JNCIS-SEC) exam which will assure them 100% passing success rate.
