

Reliable AI-300 Study Guide | Latest AI-300 Exam Camp

Real4dumps offers affordable Operationalizing Machine Learning and Generative AI Solutions exam preparation material. You don't have to go beyond your budget to buy Updated AI-300 Dumps. To make your AI-300 exam preparation material smooth, a bundle pack is also available that includes all the 3 formats of dumps questions. Real4dumps offers 365 days updates.

Before you buy our AI-300 study questions you can have a free download and tryout and you can have an understanding of our AI-300 exam questions by visiting our pages of our AI-300 learning guide on the website. The pages of our AI-300 guide torrent provide the demo and you can understand part of our titles and the form of our software. So before your purchase you can have an understanding of our AI-300 Exam Questions and then decide whether to buy our AI-300 study questions or not.

The Tester's Handbook: AI-300 Online Test Engine

You can overcome this hurdle by selecting real Microsoft AI-300 Exam Dumps that can help you ace the AI-300 test quickly on the maiden endeavor. If you aspire to earn the Microsoft AI-300 Certification then obtaining trusted prep material is the most significant part of your AI-300 test preparation.

Microsoft Operationalizing Machine Learning and Generative AI Solutions Sample Questions (Q64-Q69):

NEW QUESTION # 64

Hotspot Question

You are monitoring a fine-tuned large language model deployed in Microsoft Foundry.

You evaluate the model before and after fine-tuning by using the same evaluation dataset.

You review the following evaluation results:

You need to determine whether the fine-tuned model shows improved performance without introducing regression. For each of the following statements, select Yes if the statement is true.

Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 65

Hotspot Question

A team is building a generative AI agent by using Retrieval-Augmented Generation (RAG) in Microsoft Foundry.

The team frequently updates prompt content. The team must be able to track changes across contributors while avoiding full application redeployments.

You need to enable rapid prompt iteration with traceability. Applications consuming the agent must be able to use updated prompts without requiring redeployment.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 66

An Azure Machine Learning workspace processes sensitive training data.

The workspace must NOT be accessible from the public internet.

You need to restrict network access.

Which configuration should you implement?

- A. Network security groups
- B. Service endpoints
- **C. Private endpoints**
- D. Azure Firewall rules

Answer: C

Explanation:

To ensure an Azure Machine Learning (AML) workspace handling sensitive data is not accessible from the public internet, you must disable the Public Network Access flag and implement Private Endpoints. This configuration creates a private link between your Azure Virtual Network (VNet) and the workspace, ensuring traffic never traverses the public internet.

NEW QUESTION # 67

A team accidentally deploys an outdated model version due to incorrect tagging. You need to enforce strict deployment governance and version control. What should you implement?

- A. Rename models
- **B. Use version pinning and approval workflows**
- C. Increase logging
- D. Store models locally

Answer: B

Explanation:

Version pinning ensures that only specific, approved model versions are deployed, while approval workflows enforce governance.

This prevents accidental deployment of outdated or unverified models. Simple naming conventions or tagging are error-prone and do not provide sufficient control.

NEW QUESTION # 68

A team is deploying machine learning models to a production inference endpoint in Azure Machine Learning.

The team requires a safe way to validate a new model version without disrupting existing users.

You need to recommend a deployment strategy for controlled testing of a new model version.

What should you configure?

- A. deployment to a separate staging endpoint
- B. the model asset version in the registry
- **C. traffic splitting between deployments**
- D. an evaluation script in Azure Machine Learning

Answer: C

Explanation:

The best strategy for controlled testing of a new model version in Azure Machine Learning is Blue-Green Deployment, often referred to as a safe rollout.

This approach allows you to deploy a new model version alongside the current one within the same Managed Online Endpoint without disrupting existing users.

Key Features of Blue-Green Deployment in Azure ML

Simultaneous Versions: Both the current "Blue" and new "Green" models run concurrently on the same endpoint.

***-> Traffic Shifting:** You can use the endpoint's load balancer to allocate a specific percentage (e.g., 10%) of live production traffic to the new version.

Mirrored Traffic: For even lower risk, you can test the new model with mirrored traffic, where production requests are copied to the new model for validation without using its responses for the end user.

Instant Rollback: If the new model performs poorly, you can instantly shift 100% of traffic back to the original version.

Deployment Headers: You can bypass general traffic splitting to test the "Green" deployment specifically by adding an azureml-model-deployment header to your HTTP requests.

NEW QUESTION # 69

.....

Our AI-300 test questions are available in three versions, including PDF versions, PC versions, and APP online versions. Each version has its own advantages and features, AI-300 test material users can choose according to their own preferences. The most popular version is the PDF version of AI-300 exam prep. The PDF version of AI-300 Test Questions can be printed out to facilitate your learning anytime, anywhere, as well as your own priorities. The PC version of AI-300 exam prep is for Windows users. If you use the APP online version, just download the application. Program, you can enjoy our AI-300 test material service.
