Get SC-401 Exam Questions To Gain Brilliant Results

Now IT industry is more and more competitive. Passing Microsoft SC-401 exam certification can effectively help you entrench yourself and enhance your status in this competitive IT area. In our DumpsMaterials you can get the related Microsoft SC-401 exam certification training tools. Our DumpsMaterials IT experts team will timely provide you the accurate and detailed training materials about Microsoft Certification SC-401 Exam. Through the learning materials and exam practice questions and answers provided by DumpsMaterials, we can ensure you have a successful challenge when you are the first time to participate in the Microsoft certification SC-401 exam. Above all, using DumpsMaterials you do not spend a lot of time and effort to prepare for the exam.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 2	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 3	<ul style="list-style-type: none"> • Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	<ul style="list-style-type: none"> • Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q28-Q33):

NEW QUESTION # 28

You create a data loss prevention (DLP) policy that meets the following requirements:

- * Prevents guest users from accessing a sensitive document shared during a Microsoft Teams chat
 - * Prevents guest users from accessing a sensitive document stored in a Microsoft Teams channel
- Which location should you select for each requirement? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

The screenshot shows the 'Answer Area' for a DLP policy configuration. It contains two dropdown menus. The first dropdown is for the requirement 'Prevents guest users from accessing a sensitive document shared during a Microsoft Teams chat'. The selected option is 'OneDrive accounts'. The second dropdown is for the requirement 'Prevents guest users from accessing a sensitive document stored in a Microsoft Teams channel'. The selected option is 'SharePoint sites'. A watermark 'dumpsmaterials.com' is visible across the image.

Answer:

NEW QUESTION # 29

You need to meet the retention requirement for the users' Microsoft 365 data.
What is the minimum number of retention policies required to achieve the goal?

- A. 0
- B. 1
- C. 2
- **D. 3**
- E. 4

Answer: D

Explanation:

The requirement states that all Microsoft 365 data for users must be retained for at least one year. In Microsoft 365, retention policies must be configured for each type of data storage.

Step 1: Identifying Where Data is Stored

From the case study, users store data in the following locations:

- *SharePoint Online sites
- *OneDrive accounts
- *Exchange email
- *Exchange public folders
- *Teams chats
- *Teams channel messages

Since these locations fall under two broad categories:

- *Microsoft Exchange data (Emails, Public folders)
- *SharePoint, OneDrive, and Teams data

Step 2: Required Retention Policies

A single retention policy can cover:

- *SharePoint Online
- *OneDrive
- *Microsoft Teams

2. A second retention policy is required for:

- *Exchange (Emails & Public Folders)

Thus, the minimum number of retention policies required to meet the requirement is 2.

Microsoft 365 retention policies can be applied broadly across multiple services with just two policies:

- *One for Exchange & Public Folders

*One for SharePoint, OneDrive, and Teams

There's no need for separate policies for each individual workload unless different retention durations are required, which is not stated in the requirement.

NEW QUESTION # 30

You have a Microsoft 365 E5 tenant.

You create a data loss prevention (DLP) policy.

You need to ensure that the policy protects documents in Microsoft Teams chat sessions.

Which location should you enable in the policy?

- A. Exchange email
- B. SharePoint sites
- C. OneDrive accounts
- **D. Teams chat and channel messages**

Answer: D

Explanation:

To extend DLP to Teams, you must enable Teams chat and channel messages as a location in the DLP policy.

SharePoint and OneDrive protect stored content, but chat sessions require the Teams-specific location.

Reference: DLP in Microsoft Teams

NEW QUESTION # 31

You have a Microsoft 365 E5 subscription.

You need to ensure that encrypted email messages sent to an external recipient can be revoked or will expire within seven days.

What should you configure first?

- A. a mail flow rule
- **B. a custom branding template**
- C. a Conditional Access policy
- D. a sensitivity label

Answer: B

Explanation:

To ensure that encrypted email messages sent to external recipients can be revoked or expire within seven days, you need to configure a sensitivity label with encryption settings in Microsoft Purview Information Protection. A sensitivity label allows you to encrypt emails and documents, set expiration policies (e.g., emails expire after 7 days), and enable email revocation. How to configure it?

Go to Microsoft Purview compliance portal # Information Protection

Create a sensitivity label

Enable encryption and configure the content expiration policy

Publish the label to users

NEW QUESTION # 32

You have a Microsoft 365 E5 subscription.

You need to identify documents that contain patent application numbers containing the letters PA followed by eight digits, for example, PA 12345678. The solution must minimize administrative effort.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
