Three High-in-Demand BootcampPDF Confluent CCDAK Practice Questions Formats

You can trust the CCDAK practice test and start this journey with complete peace of mind and satisfaction. The CCDAK exam PDF questions will not assist you in Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam preparation but also provide you with in-depth knowledge about the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam topics. This knowledge will be helpful to you in your professional life. So Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam questions are the ideal study material for quick Confluent CCDAK exam preparation.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q83-Q88):

NEW QUESTION # 83

Your company has three Kafka clusters: Development, Testing, and Production. The Production cluster is running out of storage, so you add a new node. Which two statements about the new node are true?

(Select two.)

- A. A node ID will be assigned to the new node automatically.
- **B. A new node will not have any partitions assigned to it unless a new topic is created or reassignment occurs.**
- C. A newly added node will have KRaft controller role by default.
- **D. A new node can be added without stopping existing cluster nodes.**

Answer: B,D

Explanation:

* C is true: When a new broker is added, no partitions are assigned to it unless you create new topics or reassign existing ones using `kafka-reassign-partitions.sh`.

* D is true: Kafka brokers are hot-pluggable; no need to stop the cluster when scaling.

From Kafka Operations Guide:

"A newly added broker won't be assigned partitions until reassignments or new topic creation."

"Kafka allows dynamic scaling by adding brokers without downtime."

* A is false: Broker IDs must be manually set unless using dynamic broker registration in KRaft mode.

* B is false unless the cluster uses KRaft mode and the broker is specifically assigned a controller role.

Reference: Kafka Operations > Adding Brokers

NEW QUESTION # 84

You are using JDBC source connector to copy data from 2 tables to two Kafka topics. There is one connector created with `max.tasks` equal to 2 deployed on a cluster of 3 workers. How many tasks are launched?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

we have two tables, so the max number of tasks is 2

NEW QUESTION # 85

You are building a consumer application that processes events from a Kafka topic. What is the most important metric to monitor to ensure real-time processing?

- A. BytesInPerSec
- B. UnderReplicatedPartitions
- **C. records-lag-max**
- D. MessagesInPerSec

Answer: C

Explanation:

This metric shows the current lag (number of messages behind the broker)

NEW QUESTION # 86

Which of the following event processing application is stateless? (select two)

- **A. Read log messages from a stream and writes ERROR events into a high-priority stream and the rest of the events into a low-priority stream**
- **B. Read events from a stream and modifies them from JSON to Avro**
- C. Find the minimum and maximum stock prices for each day of trading
- D. Publish the top 10 stocks each day

Answer: A,B

Explanation:

Stateless means processing of each message depends only on the message, so converting from JSON to Avro or filtering a stream are both stateless operations

NEW QUESTION # 87

A consumer wants to read messages from partitions 0 and 1 of a topic topic1. Code snippet is shown below.

```
consumer.subscribe(Arrays.asList("topic1"));
List<TopicPartition> pc = new ArrayList<>();
pc.add(new PartitionTopic("topic1", 0));
pc.add(new PartitionTopic("topic1", 1));
consumer.assign(pc);
```

- A. This works fine. subscribe() will subscribe to the topic and assign() will assign partitions to the consumer.
- B. Throws IllegalStateException

Answer: B

Explanation:

subscribe() and assign() cannot be called by the same consumer, subscribe() is used to leverage the consumer group mechanism, while assign() is used to manually control partition assignment and reads assignment

NEW QUESTION # 88

.....

Another great format of our CCDAK exam dumps is the real questions in a PDF file. This is a portable file that contains the most probable CCDAK test questions. The Confluent CCDAK PdfDumps format is a convenient preparation method as these CCDAK questions document is printable and portable.
