Reliable NetSec-Analyst Exam Registration & NetSec-Analyst Test Answers
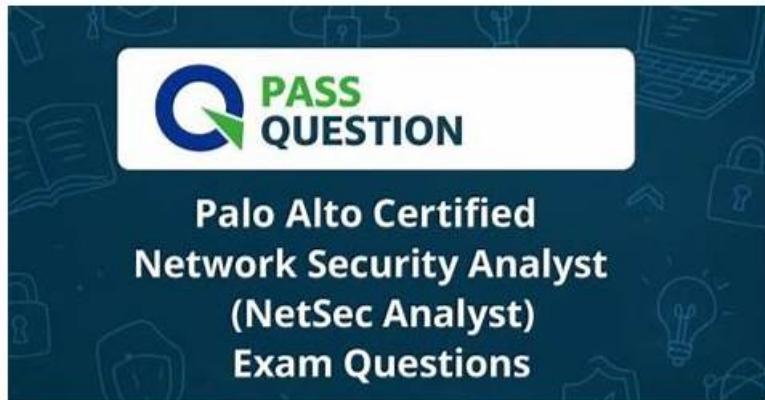

You may be also one of them, you may still struggling to find a high quality and high pass rate Palo Alto Networks Network Security Analyst study question to prepare for your exam. Your search will end here, because our study materials must meet your requirements. Our product is elaborately composed with major questions and answers. Our study materials are choosing the key from past materials to finish our NetSec-Analyst Torrent prep. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the NetSec-Analyst exam torrent. Then, you will have enough confidence to pass it. So start with our NetSec-Analyst torrent prep from now on. We can succeed so long as we make efforts for one thing.

Palo Alto Networks NetSec-Analyst Exam Syllabus Topics:

Topic	Details
Topic 1	• Object Configuration Creation and Application: This section of the exam measures the skills of Network Security Analysts and covers the creation, configuration, and application of objects used across security environments. It focuses on building and applying various security profiles, decryption profiles, custom objects, external dynamic lists, and log forwarding profiles. Candidates are expected to understand how data security, IoT security, DoS protection, and SD-WAN profiles integrate into firewall operations. The objective of this domain is to ensure analysts can configure the foundational elements required to protect and optimize network security using Strata Cloud Manager.
Topic 2	• Policy Creation and Application: This section of the exam measures the abilities of Firewall Administrators and focuses on creating and applying different types of policies essential to secure and manage traffic. The domain includes security policies incorporating App-ID, User-ID, and Content-ID, as well as NAT, decryption, application override, and policy-based forwarding policies. It also covers SD-WAN routing and SLA policies that influence how traffic flows across distributed environments. The section ensures professionals can design and implement policy structures that support secure, efficient network operations.
Topic 3	• Management and Operations: This section of the exam measures the skills of Security Operations Professionals and covers the use of centralized management tools to maintain and monitor firewall environments. It focuses on Strata Cloud Manager, folders, snippets, automations, variables, and logging services. Candidates are also tested on using Command Center, Activity Insights, Policy Optimizer, Log Viewer, and incident-handling tools to analyze security data and improve the organization overall security posture. The goal is to validate competence in managing day-to-day firewall operations and responding to alerts effectively.

Topic 4	• Troubleshooting: This section of the exam measures the skills of Technical Support Analysts and covers the identification and resolution of configuration and operational issues. It includes troubleshooting misconfigurations, runtime errors, commit and push issues, device health concerns, and resource usage problems. This domain ensures candidates can analyze failures across management systems and on-device functions, enabling them to maintain a stable and reliable security infrastructure.

100% Pass-Rate Reliable NetSec-Analyst Exam Registration - Easy and Guaranteed NetSec-Analyst Exam Success

Our NetSec-Analyst practice engine boosts both the high passing rate which is about 98%-100% and the high hit rate to have few difficulties to pass the test. Our NetSec-Analyst exam simulation is compiled based on the resources from the authorized experts' diligent working and the real exam and confer to the past years' exam papers thus they are very practical. So the content of the NetSec-Analyst Learning Materials is quite fully covered and completed. And we will update it to be the latest.

Palo Alto Networks Network Security Analyst Sample Questions (Q170-Q175):

NEW QUESTION # 170
Why does a company need an Antivirus profile?

- A. To protect against viruses, worms, and trojans
- B. To prevent access to malicious web content
- C. To prevent known exploits
- D. To prevent command-and-control traffic

Answer: A

NEW QUESTION # 171
To use Active Directory to authenticate administrators, which server profile is required in the authentication profile?

- A. domain controller
- B. LDAP
- C. TACACS+
- D. RADIUS

Answer: B

NEW QUESTION # 172
How would a Security policy need to be written to allow outbound traffic using Secure Shell (SSH) to destination ports tcp/22 and tcp/4422?

- A. The admin creates a custom service object named "tcp-4422" with port tcp/4422.
  The admin also creates a custom service object named "tcp-22" with port tcp/22.
  The admin then creates a Security policy allowing application "ssh", service "tcp-4422". and service "tcp-22".
- B. The admin creates a custom service object named "tcp-4422" with port tcp/4422.
  The admin then creates a Security policy allowing application "ssh" and service "tcp-4422".
- C. The admin creates a Security policy allowing application "ssh" and service "application-default".
- D. The admin creates a custom service object named "tcp-4422" with port tcp/4422.
  The admin then creates a Security policy allowing application "ssh", service "tcp-4422". and service "application-default".

Answer: A

NEW QUESTION # 173

What must first be created on the firewall for SAML authentication to be configured?

- A. Server Group
- B. Server Profile
- C. Server Policy
- D. Server Location

Answer: B

Explanation:
A server profile identifies the external authentication service and instructs the firewall on how to connect to that authentication service and access the authentication credentials for your users. To configure SAML authentication, you must create a server profile and register the firewall and the identity provider (IdP) with each other. You can import a SAML metadata file from the IdP to automatically create a server profile and populate the connection, registration, and IdP certificate information. Reference: Configure SAML Authentication, Set Up SAML Authentication, Introduction to SAML

NEW QUESTION # 174

A server-admin in the USERS-zone requires SSH-access to all possible servers in all current and future Public Cloud environments. All other required connections have already been enabled between the USERS- and the OUTSIDE-zone. What configuration-changes should the Firewall-admin make?

- A. In addition to option a, a custom-service-object called SERVICE-SSH-RETURN that contains source-port-TCP-22 should be created. A second security-rule is required that allows traffic from zone OUTSIDE to USERS for SERVICE-SSH-RETURN for any source-IP-address to any destination-Ip-address
- B. Create a security-rule that allows traffic from zone USERS to OUTSIDE to allow traffic from any source IP-address to any destination IP-address for application SSH
- C. In addition to option c, an additional rule from zone OUTSIDE to USERS for application SSH from any source-IP-address to any destination-IP-address is required to allow the return-traffic from the SSH-servers to reach the server-admin
- D. Create a custom-service-object called SERVICE-SSH for destination-port-TCP-22. Create a security-rule between zone USERS and OUTSIDE to allow traffic from any source IP-address to any destination IP-address for SERVICE-SSH

Answer: B

NEW QUESTION # 175
