

# F5CAB1 Reliable Braindumps Ebook, F5CAB1 Latest Braindumps Ebook

DOWNLOAD the newest PDF Braindumps F5CAB1 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=12DATUaCCrZ2SfeuAHT25jMdyUufjEu>

There are a lot of leading experts and professors in different field in our company. The first duty of these leading experts and professors is to compile the F5CAB1 exam questions. In order to meet the needs of all customers, the team of the experts in our company has done the research of the F5CAB1 study materials in the past years. As a result, they have gained an in-depth understanding of the fundamental elements that combine to produce world class F5CAB1 practice materials for all customers.

F5 F5CAB1 study guide files will help you get a certification easily. Let's try to make the best use of our resources and take the best way to clear exams with F5 F5CAB1 Study Guide files. If you are an efficient working man, purchasing valid study guide files will be suitable for you.

## Excellent F5CAB1 Reliable Braindumps Ebook - Pass F5CAB1 Exam Successful

Our F5CAB1 exam materials constantly attract students to transfer their passion into progresses for the worldwide feedbacks from our loyal clients prove that we are number one in this field to help them achieve their dream in the F5CAB1 Exam. Though you can

participate in the use of important factors, only the guarantee of high quality, to provide students with a better teaching method, thus our F5CAB1 study dumps bring more outstanding teaching effect.

## F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q15-Q20):

### NEW QUESTION # 15

A BIG-IP device will be dedicated to functioning as a WAF, requiring only the ASM module to be provisioned. What provisioning level will ensure that the system allocates all CPU, memory, and disk resources to this module exclusively?

- A. Comprehensive
- **B. Dedicated**
- C. Maximal
- D. Nominal

**Answer: B**

Explanation:

Provisioning defines how BIG-IP allocates system resources to modules. The provisioning levels include:

Dedicated - allocates all CPU, memory, and disk resources to a single module  
Nominal - standard resource allocation balanced with other modules  
Minimal - lowest level, used for basic utility needs  
None - module disabled  
Comprehensive / Maximal - not valid  
TMOS provisioning levels  
Why "Dedicated" is correct  
When a BIG-IP device is intended to run only ASM (Web Application Firewall), the recommended way to maximize performance is to provision the module at Dedicated level.

With ASM: Dedicated:

ASM receives the entire hardware capacity

No other modules can or should be provisioned

This is explicitly recommended when a device is used solely as a WAF platform

### NEW QUESTION # 16

Which of the following is true about High Availability (HA) in BIG-IP?

- A. HA is only used for SSL offloading
- B. HA requires no additional configuration
- C. HA setup ensures both systems actively share traffic
- **D. In HA, one BIG-IP system is in active mode, and the other is in standby mode**

**Answer: D**

Explanation:

In a High Availability (HA) setup, one BIG-IP unit is actively serving traffic while the other is in standby mode, ready to take over in case of a failure.

### NEW QUESTION # 17

Which one of the following is a port and protocol combination allowed by the Allow Default setting for Port Lockdown?

- **A. TCP 443**
- B. TCP 80
- C. UDP 8443

**Answer: A**

Explanation:

Port Lockdown controls which ports and protocols a Self IP will respond to.

The Allow Default setting permits only a predefined set of BIG-IP internal and required service ports.

The Allow Default list includes:

TCP 443 HTTPS (Management/TMUI access via Self-IP)

TCP 4353 CMI (device sync)

TCP/UDP ports related to HA communication

Other essential internal F5 ports

Why TCP 443 is correct:

It is one of the officially allowed ports under Allow Default.

It enables HTTPS/TMUI access through a Self IP.

### NEW QUESTION # 18

The monitoring team reports that the SNMP server is unable to poll data from a BIG-IP device.

What information will help the BIG-IP Administrator determine whether the issue originates from the BIG-IP system?

- A. The "Traffic Group" setting must use a floating Traffic Group.
- B. The configuration on the exhibit is correct and other options should be explored.
- **C. The "Port Lockdown" setting is preventing the SNMP server from polling data from the BIG-IP.**
- D. The "VLAN / Tunnel" setting must allow All Vlans.

**Answer: C**

Explanation:

The exhibit shows a Self IP with:

\* VLAN: Data

\* Port Lockdown: Allow None

Impact of "Allow None" on SNMP

When a Self IP is configured with:

Port Lockdown: Allow None

the BIG-IP blocks all services and ports except a few hardcoded HA communication ports.

This means:

\* UDP/161 (SNMP) is blocked

\* UDP/162 (SNMP traps) is blocked

\* The SNMP server cannot poll or receive data from the BIG-IP through this Self IP. SNMP relies on access through the Self IP if out-of-band (mgmt interface) is not used.

Thus, the issue is directly caused by Port Lockdown = Allow None, which prevents SNMP communication.

Why the other options are incorrect:

B). Traffic Group must use a floating Traffic Group

\* SNMP polling does not require floating Self IPs.

\* Floating groups apply to HA failover IPs, not SNMP functionality.

C). VLAN/Tunnel must allow All VLANs

\* Self IPs are always bound to a VLAN; SNMP does not require All VLANs.

\* As long as the Self IP belongs to a reachable VLAN, SNMP can work.

D). Configuration is correct

\* It is not correct: Allow None blocks SNMP and is the problem.

### NEW QUESTION # 19

Which of the following actions is NOT required during the initial setup of a BIG-IP system?

- A. Set up self-IPs
- **B. Set up SSL certificates**
- C. Install a software license
- D. Assign an administrative password

**Answer: B**

Explanation:

Setting up SSL certificates is typically done after the initial setup, not during it. The main tasks during initial setup involve network configuration and licensing.

### NEW QUESTION # 20

.....

Many of our worthy customers have achieved success not only on the career but also on the life style due to the help of our F5
