Salesforce Advanced Cross Channel Accredited Professional Sample Questions (Q11-Q16):

NEW QUESTION # 11

What are three differences between the new MC Transactional Messaging API and previous MC triggered message API versions?

- A. Messages are sent as quickly as possible. For email, there is no more low, medium, or high priority.
- B. Transactional messaging limits the number of API calls a minute.
- C. MC Transactional Messaging requires the selection of prioritization - low, medium or high priority.
- D. The software can track each message utilizing the Event Notification service.
- E. API runs on an updated messaging platform which improves scale and send speed

Answer: A,D,E

NEW QUESTION # 12

Which two concepts are types of Journeys?

Choose 2 answers

- A. Multi-step
- B. Promotional
- C. Single-send
- D. Triggered

Answer: C,D

NEW QUESTION # 13

Where would you add a topic profile

- A. Admin settings
- B. Workspace settings
- C. Social studio engage
- D. Social studio automate

Answer: A

Explanation:

* Understanding Topic Profiles:

* Topic profiles are the core of social listening in Social Studio. They define the keywords, social accounts, and other criteria used to capture relevant social media mentions.

* Admin Settings as the Central Hub:

* Admin settings in Social Studio are the central location for managing overall account configurations, user permissions, and, importantly, topic profiles.

* Detailed Steps:

* Access Admin Settings: In Social Studio, you'll click on your profile avatar in the top right corner and then select "Admin".

* Topic Profiles Section: Within the Admin panel, you'll find a dedicated section for "Topic Profiles."

* Create/Edit Topic Profiles: This is where you can create new topic profiles or edit existing ones.

You'll define keywords, include/exclude terms, specify languages, locations, media types, and link social accounts.

* Why Other Options Are Incorrect:

* A. Social Studio Automate: Social Studio Automate is used for automating actions based on rules (e.g., automatically routing posts

to different teams, adding classifications). It's not where you create the foundation of social listening (topic profiles).

* C. Workspace Settings: Workspace settings manage collaboration and workflow within a specific workspace. While you might use topic profiles within a workspace, you don't create them there.

* D. Social Studio Engage: Engage is for viewing and interacting with social media content that has already been captured based on your topic profiles. You don't create topic profiles in Engage.

In Summary:

NEW QUESTION # 14
