Salesforce Platform Developer I (PDI) Sample Questions (Q41-Q46):

NEW QUESTION # 41
A developer is asked to create a Visualforce page that displays some Account fields as well as fields configured on the page layout for related Contacts.
How should the developer implement this request?

- A. Add a method to the standard controller.
- B. Use the <apex:include> tag.
- C. Use the <apex:relatedList> tag.
- D. Create a controller extension.

Answer: B

NEW QUESTION # 42

A custom Visualforce controller calls the ApexPages.addMessage() method, but no messages are rendering on the page. Which component should be added to the Visualforce page to display the message?

- A. <apex:pageMessage severity="info" />
- B. <apex:pageMessages />
- C. <apex:facet name="messages" />
- D. <opex:message for"info"/>

Answer: B

Explanation:
* Option B: The<apex:pageMessages />component renders all messages added to theApexPagesmessages collection on a
Visualforce page, including those added by theApexPages.addMessage()method.
* Not Suitable:
* Option A:<apex:message>is for specific fields, not for the general messages collection.
* Option C:<apex:pageMessage>is used for displaying a single, static message, not the dynamic collection of messages.
* Option D:<apex:facet>does not display messages.
:Visualforce ApexPages Messages

NEW QUESTION # 43
When would a developer use a custom controller instead of a controller extension? Choose 2 answers:

- A. When a Visualforce page needs to replace the functionality of a standard controller.
- B. When a Visualforce page does not reference a single primary object.
- C. When a Visualforce page should not enforce permissions or field-level security.
- D. When a Visualforce page needs to add new actions to a standard controller.

Answer: B,C

NEW QUESTION # 44
Which three Salesforce resources can be accessed from a Lightning web component?
Choose 3 answers

- A. Third-party web components
- B. All external libraries
- C. SVG resources
- D. Content asset files
- E. Static resources

Answer: C,D,E

Explanation:
Lightning Web Components (LWCs) have access to a variety of resources in Salesforce. Below are the supported resources:
* Static Resources (A):You can use static resources to reference JavaScript libraries, images, and other files needed in an LWC.
Reference:Static Resources in LWC
SVG Resources (C):LWCs can use custom SVG files for icons or other visual elements.
Reference:SVG Resources in LWC
Content Asset Files (E):Content asset files, like images or videos, stored in Salesforce can be accessed and used in LWC.
Reference:Using Content Assets in LWC
Incorrect Options:
B: All external libraries:Only libraries uploaded as static resources are supported, not directly external libraries.
D: Third-party web components:While supported, additional configuration is needed to use them effectively.

NEW QUESTION # 45
A developer must write an Apex method that will be called from a Lightning component. The method may delete an Account stored in the accountRec variable.
Which method should a developer use to ensure only users that should be able to delete Accounts can successfully perform deletions?

- A. accuntRec, sObjectType,isDeletable()
- B. Schema,sObjectType,Account, isDeletable ()
- C. accountRec, isDeletable()
- D. Account,isDeleteable

Answer: B
