

# Key Analytics-Con-301 Concepts - Guaranteed Analytics-Con-301 Questions Answers

---

## AIC 301 Quiz Test Study Latest Update 2024-2025 Actual Exam from Credible Source with Questions and 100% Verified Detailed Correct Answers Guaranteed

A Constructive Eviction - Actions or inactions of a landlord that create conditions that prevent a tenant from enjoying a substantial or integral part of the premise constitute a constructive eviction.

A Defense to Fraud - The defendant must make the representation with the intent to influence the other party's action. If the defendant did not intend to deceive, there is no proof of fraud.

Administrative Agencies (DOI) - produce the most laws  
Two primary functions include rulemaking and adjudication

Assault - in contrast to battery, does not involve physical contact, but the other person must anticipate or expect and fear harm for assault to have occurred

defenses-  
self defense and defense of property

Bailee Duties (has custody of goods temporarily but no transfer of ownership) -  
Standard of care for bailee is reasonable care

If for bailor's benefit only-bailee has slight care  
If for bailee's benefit only-bailee duty is extraordinary care

Bankruptcy Act - Chapter 7-liquidation, you turn in the key

P.S. Free & New Analytics-Con-301 dumps are available on Google Drive shared by ExamDiscuss: [https://drive.google.com/open?id=1sB4m4C6Z\\_DyCChGOhsRZyvgeqtWEXAK](https://drive.google.com/open?id=1sB4m4C6Z_DyCChGOhsRZyvgeqtWEXAK)

And you can also use the Salesforce Analytics-Con-301 PDF on smart devices like smartphones, laptops, and tablets. The second one is the web-based Salesforce Analytics-Con-301 practice exam which can be accessed through the browsers like Firefox, Safari, and Salesforce Chrome. The customers don't need to download or install excessive plugins or software to get the full advantage from web-based Analytics-Con-301 Practice Tests.

Our customer service is available all day, and your problems can be solved efficiently at any time. Last but not least, we can guarantee the security of the purchase process of Analytics-Con-301 test questions and the absolute confidentiality of customer information. You do not have to worry about these issues, because we know that this is a basic condition for us to establish a good business model. At the same time, if you want to continue learning, Analytics-Con-301 Test Torrent will provide you with the benefits of free updates within one year and a discount of more than one year.

**Guaranteed Analytics-Con-301 Questions Answers, Analytics-Con-301 Reliable Braindumps Ebook**

We have free demo for Analytics-Con-301 learning materials, we recommend you to have a try before buying, so that you can have a deeper understanding of what you are going to buy. In addition, Analytics-Con-301 exam dumps contain both questions and answers, they will be enough for you to pass your exam and get the certificate successfully. In order to build up your confidence for Analytics-Con-301 Learning Materials, we are pass guarantee and money back guarantee if you fail to pass the exam, and the money will be returned to your payment account.

## Salesforce Certified Tableau Consultant Sample Questions (Q74-Q79):

### NEW QUESTION # 74

A client needs to design row-level security (RLS) measures for their reports. The client does not currently have Tableau Data Management Add-on, and it may be an option in the future.

What should the consultant recommend as the safest and easiest way to manage for the long term?

- A. Create User filters in each view of each report using set filters and option Server/Create User Filter.
- B. Create User filters based on data policies and apply them to views using set filters and option Server/Create User Filter.
- **C. Create User filters based on data policies and apply them to a published data source.**
- D. Create User filters for each report using a table joined to its data source and using the option Apply to All Sheet Using the Data Source.

### Answer: C

Explanation:

For implementing row-level security (RLS) without the Tableau Data Management Add-on, the best approach is to integrate user filters into the published data source:

Creating User Filters on Published Data Source: This method involves defining user filters that apply directly to the data source before it is published to the Tableau Server. This ensures that any workbook or view leveraging this data source inherently respects the row-level security settings.

To implement this, create a calculated field in Tableau that defines the security logic, typically using a formula that references user functions (like USERNAME() or ISMEMBEROF()). Drag this field to the Filters shelf and configure it to match the security rules (who can see what data).

Once configured, publish the data source to Tableau Server with these filters in place. This approach centralizes security management, making it easier to maintain and update security policies as they are applied universally to all workbooks using this data source.

This strategy is safe as it reduces the risk of accidental data exposure through individual workbook misconfiguration and simplifies long-term maintenance of security policies.

References

This method follows Tableau's best practices for implementing row-level security as detailed in Tableau's security management resources. It ensures robust, maintainable security measures that scale with organizational needs without requiring additional add-ons.

### NEW QUESTION # 75

A client needs to design row-level security (RLS) measures for their reports. The client does not currently have Tableau Data Management Add-on, and it may be an option in the future.

What should the consultant recommend as the safest and easiest way to manage for the long term?

- A. Create User filters based on data policies and apply them to views using set filters and option Server /Create User Filter.
- B. Create User filters in each view of each report using set filters and option Server/Create User Filter.
- **C. Create User filters based on data policies and apply them to a published data source.**
- D. Create User filters for each report using a table joined to its data source and using the option Apply to All Sheet Using the Data Source.

### Answer: C

Explanation:

For implementing row-level security (RLS) without the Tableau Data Management Add-on, the best approach is to integrate user filters into the published data source:

\* Creating User Filters on Published Data Source: This method involves defining user filters that apply directly to the data source before it is published to the Tableau Server. This ensures that any workbook or view leveraging this data source inherently respects the row-level security settings.

\* To implement this, create a calculated field in Tableau that defines the security logic, typically using a formula that references user functions (like USERNAME() or ISMEMBEROF()). Drag this field to the Filters shelf and configure it to match the security rules (who can see what data).

\* Once configured, publish the data source to Tableau Server with these filters in place. This approach centralizes security management, making it easier to maintain and update security policies as they are applied universally to all workbooks using this data source.

This strategy is safe as it reduces the risk of accidental data exposure through individual workbook misconfiguration and simplifies long-term maintenance of security policies.

#### References

This method follows Tableau's best practices for implementing row-level security as detailed in Tableau's security management resources. It ensures robust, maintainable security measures that scale with organizational needs without requiring additional add-ons.

## NEW QUESTION # 76

### SIMULATION

From the desktop, open the CC workbook.

Open the Manufacturers worksheet.

The Manufacturers worksheet is used to analyze the quantity of items contributed by each manufacturer.

You need to modify the Percent

Contribution calculated field to use a Level of Detail (LOD) expression that calculates the percentage contribution of each manufacturer to the total quantity.

Enter the percentage for Newell to the nearest hundredth of a percent into the Newell % Contribution parameter.

From the File menu in Tableau Desktop, click Save.

#### Answer:

Explanation:

See the complete Steps below in Explanation

Explanation:

To modify the Percent Contribution calculated field to use a Level of Detail (LOD) expression and accurately calculate the percentage contribution of each manufacturer to the total quantity, follow these steps:

Open the CC Workbook and Access the Worksheet:

Double-click on the CC workbook from the desktop to open it in Tableau Desktop.

Navigate to the Manufacturers worksheet by selecting its tab at the bottom of the window.

Modify the Percent Contribution Calculated Field:

Navigate to the Data pane and find the "Percent Contribution" calculated field.

Right-click on the "Percent Contribution" field and select 'Edit'.

Modify the formula to incorporate an LOD expression that calculates the total quantity across all manufacturers and the specific quantity per manufacturer:

{FIXED [Manufacturer]: SUM([Quantity])} / {SUM([Quantity])} Quantity])

This formula uses {FIXED [Manufacturer]: SUM([Quantity])} to compute the total quantity contributed by each manufacturer, regardless of other dimensions in the view. The total quantity {SUM([Quantity])} calculates the grand total across all manufacturers. The division calculates the percentage contribution.

Click 'OK' to save the updated calculated field.

Enter Percentage for Newell:

With the updated "Percent Contribution" field, drag it onto the view to update the chart or table.

Identify the value corresponding to 'Newell' in the updated visualization.

Round this value to the nearest hundredth of a percent as required.

Enter this value into the "Newell % Contribution" parameter. To do this, locate the parameter in the Data pane or on the dashboard, right-click it, and choose 'Edit'. Enter the calculated percentage for Newell.

Save Your Changes:

From the File menu, click 'Save' to store all the modifications you have made to the workbook.

References:

Tableau Help: Offers detailed guidance on using LOD expressions for precise and context-independent aggregations.

Tableau Desktop User Guide: Provides comprehensive instructions on managing calculated fields and parameters, ensuring accurate data analysis.

By following these steps, you will have successfully updated the calculation for percent contribution using LOD expressions, providing a more accurate analysis of each manufacturer's contribution to the total quantity. Moreover, updating the parameter with Newell's specific contribution rounds out the task by reflecting precise data inputs for reporting or further analysis.

## NEW QUESTION # 77

### SIMULATION

From the desktop, open the CC workbook. Use the US Population Estimates data source.

You need to shape the data in US Population Estimates by using Tableau Desktop. The data must be formatted as shown in the following table.

□ Open the Population worksheet. Enter the total number of records contained in the data set into the Total Records parameter. From the File menu in Tableau Desktop, click Save.

### Answer:

Explanation:

See the complete Steps below in Explanation

Explanation:

To shape the data in the "US Population Estimates" data source and enter the total number of records into the "Total Records" parameter in Tableau Desktop, follow these steps:

Open the CC Workbook and Access the Worksheet:

From the desktop, double-click on the CC workbook to open it in Tableau Desktop.

Navigate to the Population worksheet by selecting its tab at the bottom of the window.

Format and Shape the Data:

Ensure the data types match those specified in the requirements: Sex, Origin, Race as strings; Year, Age, Population as whole numbers.

To verify or change the data type, click on the dropdown arrow next to each field name in the Data pane and select "Change Data Type" if necessary.

Calculate Total Number of Records:

Create a new calculated field named "Total Records". To do this, right-click in the Data pane and select "Create Calculated Field".

Enter the formula COUNT([Record ID]) or SUM([Number of Records]) depending on how the data source identifies each row uniquely.

Drag this new calculated field onto the worksheet to display the total number of records.

Enter the Value into the Total Records Parameter:

Locate the "Total Records" parameter in the Data pane. Right-click on the parameter and select "Edit".

Manually enter the number displayed from the calculated field into the parameter, ensuring accuracy to meet the data shaping requirement.

Save Your Changes:

From the File menu, click 'Save' to ensure all your changes are stored.

References:

Tableau Desktop Guide: Provides detailed instructions on managing data types, creating calculated fields, and updating parameters.

Tableau Data Shaping Techniques: Outlines effective methods for manipulating and structuring data for analysis.

This process will ensure the data in the "US Population Estimates" is accurately shaped according to the specified format and that the total number of records is correctly calculated and entered into the designated parameter. This thorough approach ensures data integrity and accuracy in reporting.

## NEW QUESTION # 78

A client has a database that stores widget inventory by day and it is updated on a nonstandard schedule as shown below.

□ They want a data visualization that shows widget inventory daily, however their business unit does not have the ability to modify the data warehouse structure.

What should the client do to achieve the desired result?

- A. Update the Widget Inventory Table to be a daily snapshot.
- B. Use Tableau Desktop to visualize null values.
- C. Use Tableau Prep to add new rows.
- D. Create a temporary table in the database.

## Answer: C

Explanation:

For a client who needs a daily visualization of widget inventory but cannot modify the data warehouse structure, the best approach is to use Tableau Prep to add new rows. Tableau Prep can be used to manipulate the existing dataset by adding missing date entries and appropriately adjusting inventory counts based on available data. This allows the creation of a complete daily snapshot for visualization without needing changes to the underlying database structure.

## NEW QUESTION # 79

.....

We boost the expert team to specialize in the research and production of the Analytics-Con-301 guide questions and professional personnel to be responsible for the update of the study materials. We keep a close watch at the change of the popular trend among the industry and the latest social views so as to keep pace with the times and provide the clients with the newest Analytics-Con-301 Study Materials resources. And clients are our gods and the clients' satisfaction with our Analytics-Con-301 guide material is the biggest resource of our happiness. So why you still hesitated? Go and buy our Analytics-Con-301 guide questions now.

**Guaranteed Analytics-Con-301 Questions Answers:** <https://www.examdiscuss.com/Salesforce/exam/Analytics-Con-301/>

The scores are calculated by every question of the Analytics-Con-301 exam guides you have done, You may quickly download Salesforce Certified Tableau Consultant Analytics-Con-301 exam questions in PDF format on your smartphone, tablet, or desktop, Salesforce Key Analytics-Con-301 Concepts You can choose from 3 different formats available according to your needs, It is not an exaggeration to say, our Analytics-Con-301 test braindumps are better than any the same kind product in the world.

Backup solutions that employ floppy disk drives Analytics-Con-301 Reliable Exam Sims are insufficient and too costly due to the amount of media required, When a designer is freedto do anything, it becomes even harder to pick the Analytics-Con-301 effective solutions out of the nearly infinite set of inappropriate or just plain bad ones.

## Quiz 2026 Analytics-Con-301: Salesforce Certified Tableau Consultant – The Best Key Concepts

The scores are calculated by every question of the Analytics-Con-301 exam guides you have done, You may quickly download Salesforce Certified Tableau Consultant Analytics-Con-301 exam questions in PDF format on your smartphone, tablet, or desktop.

You can choose from 3 different formats available according to your needs, It is not an exaggeration to say, our Analytics-Con-301 test braindumps are better than any the same kind product in the world.
