By passing Google-Workspace-Administrator Exam, you can validate your skills and knowledge and open up new career opportunities in the field of Google Workspace administration.

## Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q12-Q17):

### NEW QUESTION # 12

Your organization recently had a sophisticated malware attack that was propagated through embedded macros in email attachments. As a Workspace administrator, you want to provide an additional layer of anti-malware protection over the conventional malware protection that is built into Gmail. What should you do to protect your users from future unknown malware in email attachments?

- A. Run queries in Security Investigation Tool.
- B. Turn on advanced phishing and malware protection.
- C. Enable Gmail confidential mode.
- **D. Enable Security Sandbox.**

**Answer: D**

Explanation:

Access Admin Console: Log into your Google Workspace Admin Console.

Navigate to Security Settings: Go to Security > Gmail > Safety.

Enable Security Sandbox: Locate the "Security Sandbox" setting and enable it. Security Sandbox provides an additional layer of protection by analyzing attachments for malware in a controlled environment before they reach users.

Save Settings: Save the changes to ensure the new protection layer is active.

### NEW QUESTION # 13

Your IT team is being asked to fulfill a query by your organization's legal department that requires an MBOX file that will be shared to a third-party partner for eDiscovery. The query must be run on multiple users. Legal has no admin rights to Google Vault. What should you do to fulfill the request?

- A. Create a Google Vault matter for each user account, and share the matters to the legal admin.
- **B. Create a Google Vault matter, search for data, and run an export for the legal department.**
- C. Use the Investigation Too! to search for the data requested, and export for the legal department.
- D. Search for the data in Gmail, and export for the legal department.

**Answer: B**

Explanation:

\* Access Google Vault: Go to Google Vault.

\* Create a Matter: Create a new matter in Google Vault for the legal query.

\* Search for Data: Use the search functionality to query the required data across multiple user accounts based on the legal department's requirements.

\* Run Export: After verifying the search results, run an export of the data to an MBOX file format.

\* Share Export: Provide the exported MBOX file to the legal department for their eDiscovery process.

### NEW QUESTION # 14

Your-company.com recently bought 2500 Chrome devices and wants to distribute them to various teams globally. You decided that enterprise enrollment would be the best way to enforce company policies for managed Chrome devices. You discovered that Chrome devices currently end up in the top-level organization unit, and this needs to change to the organizational unit of the device administrator.

What should you do?

- A. Change Enrollment Controls to Keep Chrome device in current location.
- B. Change Enrollment Permissions to not allow users in this organization to enroll new devices.
- C. Change Enrollment Permissions to only allow users in this organization to re-enroll existing devices.
- **D. Change Enrollment Controls to Place Chrome device in user organization.**

**Answer: D**

Explanation:

Change Enrollment Controls to Place Chrome device in user organization:

To ensure that newly enrolled Chrome devices are placed in the organizational unit (OU) of the device administrator rather than the top-level OU, you need to change the enrollment settings in Google Workspace.

In the Admin console, navigate to Devices > Chrome > Settings > Enrollment controls. Set the option to place Chrome devices in the user's organization during enrollment. This aligns the devices with the correct OU based on the enrolling user's OU.

### NEW QUESTION # 15

Samantha, an employee from your engineering department, has submitted a help desk ticket. She is unable to share a Google Doc file with Jason, her coworker in the marketing department. However, Samantha is able to share the same file with her colleagues in the engineering department. You must troubleshoot the issue. What should you do?

- A. Instruct Samantha to export a PDF copy of the document and email it to Jason.
- B. Confirm if there is a data protection rule that is preventing the sharing of this particular Google Doc.
- C. Confirm if a trust rule is preventing sharing with Jason or someone that belongs to the marketing department.
- **D. Verify that Samantha's Drive sharing settings in the Admin console allow sharing content outside her organization.**

**Answer: D**

#### NEW QUESTION # 16

A user does not follow their usual sign-in pattern and signs in from an unusual location. What type of alert is triggered by this event?

- A. Suspicious mobile activity alert.
- B. Leaked password alert.
- C. User sign-in alert.
- **D. Suspicious login activity alert.**

**Answer: D**

Explanation:

\* Identify Suspicious Login Activity:

\* Google Workspace triggers a suspicious login activity alert when a user signs in from an unusual location or device that is not part of their regular sign-in pattern.

\* Review Alerts:

\* Go to the Google Workspace Admin console.

\* Navigate to "Security" > "Dashboard" > "Suspicious login activity".

\* Review the details of the alert to determine the nature of the suspicious login.

\* Take Appropriate Actions:

\* Investigate the alert to ensure that the login attempt is legitimate.

\* If the login is deemed suspicious, follow security protocols to secure the user account, such as resetting the password or enabling two-factor authentication.
