PMI Agile Certified Practitioner Sample Questions (Q117-Q122):

NEW QUESTION # 117

The team is working to build a new AI model that will summarize and create presentation materials for executive leaders from external and internal content. The team believes there is value in increasing the scope of work as it will benefit the organization. Which two actions should the product owner take first? (Choose two.)

- A. Seek executive approval on the approach.
- B. Create a change request to formalize the requirements.

- C. Determine the purpose and value proposition on the approach.
- D. Determine the cost and resource requirements.
- E. Create a spike to determine the dependencies.

Answer: A,C

NEW QUESTION # 118

What should the agile coach do?

- A. Have the team increase work in progress (WIP) levels to more quickly complete the flow.
- B. Rejuvenate the team by temporarily reducing WIP levels.
- C. Provide the team with a break by scheduling a team event.
- D. Work with the team to determine points at which to celebrate its work.

Answer: D

Explanation:

Kanban is continuous and can lead to burnout or low morale due to lack of visible milestones. The PMI Agile Practice Guide (Section 5.7: Flow-based Agile) and Mike Griffiths' PMI-ACP Exam Prep Book (Chapter 3: Team Performance) suggest that recognizing and celebrating milestones or delivery points is essential to maintain motivation, especially in long-running Kanban teams.

- * Option A is correct: celebrating completed work gives the team a sense of closure and achievement, improving engagement.
- * Option B might help temporarily but doesn't address the root motivational issue.
- * Option C adds pressure and is counterproductive.
- * Option D may improve flow but doesn't directly address the lack of visible progress recognition.

NEW QUESTION # 119

The agile team disagrees with the business stakeholders on completing some epics. What could help eliminate misunderstandings?

- A. Include the reasons for the project in the contract
- B. Consider previous sprint demo feedback when planning the next sprint
- C. Begin planning every four iterations
- D. Agree on requirements with all stakeholders

Answer: B

NEW QUESTION # 120

The product owner is present at the sprint review meeting and states that an estimation for the end of the project must be shared with the company's steering committee. The scrum master declares that the team reached an average velocity of 40 story points per sprint, considering a biweekly iteration. The team members predict that there are 240 story points remaining. What is the estimated project conclusion?

- A. Six months
- B. Three months
- C. Two months
- D. Twelve months

Answer: B

NEW QUESTION # 121

A "Scrum of Scrums" meeting is:

- A. Another name for the daily standup project meeting in a Scrum team
