

100% Pass Quiz 2026 2V0-16.25: VMware vSphere Foundation 9.0 Administrator Marvelous Exam Guide Materials

2026 Latest TestBraindump 2V0-16.25 PDF Dumps and 2V0-16.25 Exam Engine Free Share: https://drive.google.com/open?id=1RvYup_VgnEGubW2r84xOcz3lMDjstqUk

If you can own the certification means that you can do the job well in the area so you can get easy and quick promotion. The latest 2V0-16.25 quiz torrent can directly lead you to the success of your career. Our materials can simulate real operation exam atmosphere and simulate exams. The download and install set no limits for the amount of the computers and the persons who use 2V0-16.25 Test Prep. The 2V0-16.25 test prep mainly help our clients pass the 2V0-16.25 exam and gain the certification. The certification can bring great benefits to the clients. The clients can enter in the big companies and earn the high salary. You may double the salary after you pass the 2V0-16.25 exam.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 2	<ul style="list-style-type: none">• IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Topic 3	<ul style="list-style-type: none">• VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

Topic 4	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 5	<ul style="list-style-type: none"> Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

Free PDF Quiz VMware - High Hit-Rate 2V0-16.25 Exam Guide Materials

With 2V0-16.25 practice test questions you can not only streamline your exam VMware 2V0-16.25 exam preparation process but also feel confident to pass the challenging 2V0-16.25 Exam easily. One of the top features of VMware 2V0-16.25 valid dumps is their availability in different formats.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q36-Q41):

NEW QUESTION # 36

During a recent audit, it was determined that a group of users may have been compromised. These users should not have access to any VMware vCenter resources while an investigation is underway. All the affected users have been placed into a SUSPECT_USERS group.

Which step is required to ensure that the suspect users will never have access to resources in vCenter?

- A. Assign the SUSPECT_USERS group the Administrator role to the vCenter Object and uncheck propagate.
- B. Disconnect the vCenter from Active Directory.
- C. Assign the SUSPECT_USERS group the Read-only role to the vCenter Object and check propagate.
- D. Assign the SUSPECT_USERS group the No access role to the vCenter Object and check propagate.

Answer: D

Explanation:

To ensure compromised users cannot access vCenter resources:

- * Assign the No Access role at the vCenter level.
- * Enable propagation so this restriction applies to all child objects.
- * This guarantees zero permissions for SUSPECT_USERS.

Other options:

- * B. Administrator with uncheck propagate# Still gives dangerous access at root level.
- * C. Disconnect Active Directory# Disrupts all AD users, not just suspect ones.
- * D. Read-only role# Still grants access, not acceptable during investigation.

NEW QUESTION # 37

In VMware Cloud Foundation (VCF) Operations for Logs, which node type is responsible for coordinating the overall functioning

of the cluster?

- A. Worker Node
- B. Data Node
- C. Replica Node
- **D. Primary Node**

Answer: D

Explanation:

In VCF Operations for Logs (formerly vRealize Log Insight):

* The Primary Node is responsible for coordinating the overall functioning of the cluster, including configuration management and directing traffic.

* Worker/Data Nodes handle log ingestion and query execution.

* Replica Node provides HA for the Primary Node but does not act as the main coordinator.

NEW QUESTION # 38

An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.

After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Fleet Management
- B. VCF Operations
- C. VCF Automation
- **D. vSphere Client**

Answer: D

Explanation:

To deploy the VCF Operations for Logs OVA appliance:

* The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.

* After deployment, the appliance can be configured and integrated with VCF.

Other options:

* A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.

* C. VCF Automation# Provides automation workflows, not appliance deployment.

* D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.

NEW QUESTION # 39

An administrator has been tasked to share resources in the cluster between the Quality Assurance (QA) Department and Marketing Department. The following information has been provided:

* In the case of contention, the QA Department must not lose any performance.

* When the QA Department is not using all of its allocated resources, the Marketing Department requires the ability to consume them.

* The administrator has set up resource pools for the QA Department (RP-QA) and Marketing Department (RP-MKT).

How should the resource shares be configured for each pool?

- **A. Set RP-QA to Fixed and RP-MKT to Scalable.**
- B. It is not possible to satisfy the requirements of both departments.
- C. Set RP-QA to Scalable and RP-MKT to Fixed.
- D. Set both Resource Pools to Fixed.

Answer: A

Explanation:

The requirements:

- * QA must not lose performance during contention# QA must have guaranteed resources, so Fixed is correct.
- * Marketing can use leftover resources when QA is idle# Marketing must be Scalable, so it can borrow resources from QA's allocation when available.

Other options:

- * A. Both Fixed# Marketing would not be able to use QA's unused resources.
- * C. QA Scalable, MKT Fixed# QA would lose guaranteed resources, violating requirements.
- * D. Not possible# Incorrect; VMware supports this configuration.

NEW QUESTION # 40

An administrator is tasked with adding a 96-core VMware ESX host to a VMware vSphere Foundation (VVF) 9.0 vCenter cluster. The vCenter has been previously licensed for 1024 cores and the existing hosts equal 960 cores. The administrator adds the host to the vCenter cluster and places the cluster back into production. What issue will occur if the administrator performs no additional actions to this vCenter?

- A. No issue will occur. The new host was added to the vCenter cluster successfully and will operate for the valid period of the applied license.
- B. The new ESX host will operate in evaluation mode until more capacity is added to the license to license the host. If the host is not licensed when the evaluation period expires, the host will be limited to 64 cores until 32 cores or greater is added to the license.
- C. The new ESX host has been limited to 64 cores until more capacity is added to the license to license the host. Once 32 cores or greater is added to the license, the full 96 cores of the new host will be useable.
- **D. The new ESX host will operate in evaluation mode until more capacity is added to the license to license the host. If the host is not licensed when the evaluation period expires, it is disconnected from the vCenter instance.**

Answer: D

Explanation:

The vSphere Foundation 9.0 licensing model uses per-core licensing.

- * Current license covers 1024 cores.
- * Existing hosts = 960 cores, leaving 64 cores licensed.
- * Adding a 96-core host# 32 cores exceed the license.

Result:

- * The new host runs in evaluation mode.
- * If not licensed after the evaluation period, the host is disconnected from vCenter.

Other options:

- * A. Limited to 64 cores# Not how VMware licensing enforcement works.
- * B. Limited to 64 cores until license upgrade# Incorrect; VMware does not partially disable cores.
- * D. No issue# Incorrect; licensing compliance will cause issues.

NEW QUESTION # 41

.....

Many platforms are offering "TestBraindump" study material for the VMware 2V0-16.25 certification exam. But most of them are not valid and people who study with them fail in the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) Exam and lose their resources. "TestBraindump" offers actual VMware 2V0-16.25 Exam Questions that will help you pass the exam on the first try and save your money. These 2V0-16.25 questions are compiled under the guidance of thousands of professionals from around the world.
