Answer: B,D

Explanation:

Solution:

Based on learning.sap.com, these are the correct statements about the purpose and function of receiving types in SAP Ariba Procurement (two correct answers):

1. A. Receiving types specify what data must be recorded when a receipt is entered.
o Receiving types control how a receipt must be entered and what information is required. For example, they define whether you record quantity or amount, among other data specifics. SAP Learning+1

2. D. Receiving types define who enters the receipt.

o Receiving types also determine who performs the receipt-such as whether it's the requester (desktop receiving) or a central receiving group. SAP Learning+1 The other options are not correct in this context:

* B. Receiving types control whether an invoice is required.

→ There is no indication in the documentation that receiving types directly control invoice requirements.

* C. Receiving types determine who is required to approve a receipt.

→ The documentation says that receipt approval rules (separate configuration) determine who approves receipts, not the receiving type itself. Receiving types define who enters the receipt, but the approver can be governed by other rule sets. SAP Learning
Correct answers:

* A. Receiving types specify what data must be recorded when a receipt is entered.

* D. Receiving types define who enters the receipt.
