

# Free PDF Quiz Perfect NSE7\_CDS\_AR-7.6 - Fortinet NSE 7 - Public Cloud Security 7.6 Architect Latest Test Discount

Our NSE7\_CDS\_AR-7.6 free dumps demo will provide you some basic information for the accuracy of our exam materials. All questions and answers in our NSE7\_CDS\_AR-7.6 real dumps are tested by our certified trainers with rich experience and one or two days is enough for you practicing Valid NSE7\_CDS\_AR-7.6 Exam Pdf. Our NSE7\_CDS\_AR-7.6 dumps torrent contains everything you want to solve the challenge of real exam.

With the high class operation system, we can assure you that you can start to prepare for the NSE7\_CDS\_AR-7.6 exam with our study materials only 5 to 10 minutes after payment since our advanced operation system will send the NSE7\_CDS\_AR-7.6 exam torrent to your email address automatically as soon as possible after payment. Most important of all, as long as we have compiled a new version of the NSE7\_CDS\_AR-7.6 Guide Torrent, we will send the latest version of our NSE7\_CDS\_AR-7.6 training materials to our customers for free during the whole year after purchasing. We will continue to bring you integrated NSE7\_CDS\_AR-7.6 guide torrent to the demanding of the ever-renewing exam, which will be of great significance for you to keep pace with the times.

>> NSE7\_CDS\_AR-7.6 Latest Test Discount <<

## Authorized NSE7\_CDS\_AR-7.6 Certification - NSE7\_CDS\_AR-7.6 Actual Test Pdf

Compared with the other NSE7\_CDS\_AR-7.6 exam questions providers' three months or five months on their free update service, we give all our customers promise that we will give one year free update on the NSE7\_CDS\_AR-7.6 study quiz after payment. In this way, we can help our customers to pass their exams with more available opportunities with the updated NSE7\_CDS\_AR-7.6 Preparation materials. You can feel how considerate our service is as well!

## Fortinet NSE 7 - Public Cloud Security 7.6 Architect Sample Questions (Q36-Q41):

### NEW QUESTION # 36

Refer to the exhibit.

You deployed an HA active-active load balance sandwich with two FortiGate VMs in Microsoft Azure.

After the deployment, you prefer to use FGSP to synchronize sessions, and allow asymmetric return traffic. In the environment, FortiGate port 1 and port 2 are facing external and internal load balancers respectively.

What IP address must you use in the peerip configuration?

- A. The internal load balancer port 1 IP address.
- **B. The opposite FortiGate port 1 IP address.**
- C. The public load balancer port 2 IP address.
- D. The opposite FortiGate port 2 IP address.

**Answer: B**

### NEW QUESTION # 37

An AWS administrator must ensure that each member of the cloud deployment team has the correct permissions to deploy and manage resources using CloudFormation. The administrator is researching which tasks must be executed with CloudFormation and therefore require CloudFormation permissions.

Which task is run using CloudFormation?

- A. Deploying a new pod with a service in an Elastic Kubernetes Service (EKS) cluster using the kubectl command
- B. Installing a Helm chart to deploy a FortiWeb ingress controller in an EKS cluster
- C. Changing the number of nodes in a EKS cluster from AWS CloudShell
- **D. Creating an EKS cluster with the eksctl create cluster command**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From FortiOS 7.6, FortiWeb 7.4 Exact Extract study guide:

Based on the Fortinet NSE 7 - Public Cloud Security 7.4/7.6 study materials and the FortiOS 7.6 AWS Administration Guide, understanding the underlying mechanisms of AWS deployment tools is essential for permission management.

\* Infrastructure as Code and eksctl (Option C): In the context of Amazon EKS, the eksctl command-line tool is the official CLI for creating and managing clusters on EKS. When an administrator executes the eksctl create cluster command, eksctl does not interact with the EKS API directly to provision infrastructure; instead, it generates and executes AWS CloudFormation stacks to provision the necessary VPC, IAM roles, and the EKS control plane. Therefore, users running this command must have explicit permissions to create and manage CloudFormation stacks.

\* Resource Provisioning via Stacks: CloudFormation is AWS's native service for Infrastructure as Code (IaC), allowing users to define resources in JSON or YAML templates. Commands like eksctl leverage these templates to ensure repeatable and organized deployments of complex architectures, such as those required for a FortiGate or FortiWeb cloud integration.

Why other options are incorrect:

\* Option A: The kubectl command interacts directly with the Kubernetes API server inside the cluster to manage pods and services; it does not trigger AWS CloudFormation processes.

\* Option B: Helm is a package manager for Kubernetes. While it manages "releases" within the EKS cluster, the installation of a Helm chart for a FortiWeb ingress controller happens at the Kubernetes software layer and does not utilize AWS CloudFormation stacks.

\* Option D: Changing the node count via CloudShell using the AWS CLI or kubectl typically modifies an Auto Scaling Group or a Kubernetes Deployment/DaemonSet directly, rather than initiating a new CloudFormation stack execution.

### NEW QUESTION # 38

Refer to the exhibit.

Troubleshooting command

```
azadmin@Azure:~$ az feature show --namespace Microsoft.Network --name EnableHighAvailabilityMode
{
  "id": "/subscriptions/21100b64-cedc-19cc-a00b-017ec43592ac/providers/Microsoft.Features/providers/Microsoft.Network/features/EnableHighAvailabilityMode",
  "name": "Microsoft.Network/EnableHighAvailabilityMode",
  "properties": {
    "state": "Unregistered"
  },
  "type": "Microsoft.Features/providers/features"
}
```

A managed security service provider (MSSP) administration team is trying to deploy a new HA cluster in Azure to filter traffic to and

from a client that is also using Azure. However, every deployment attempt fails, and only some of the resources are deployed successfully. While troubleshooting this issue, the team runs the command shown in the exhibit. What are the implications of the output of the command?

- A. The team will not be able to deploy an A-P FortiGate HA cluster with Azure gateway load balancer.
- B. The team will not be able to deploy an A-P FortiGate HA cluster with Azure load balancer.
- C. The team will not be able to deploy an active-passive (A-P) FortiGate high availability (HA) cluster with SDN connector.
- **D. The team will not be able to deploy an active-active (A-P) FortiGate HA cluster with Azure load balancer.**

**Answer: D**

#### **NEW QUESTION # 39**

An administrator would like to use FortiCNP to keep track of sensitive data files located in the Amazon Web Services (AWS) S3 bucket and protect it from malware. Which FortiCNP feature should the administrator use?

- A. FortiCNP Threat Detection policies
- **B. FortiCNP Data Scan policies**
- C. FortiCNP Risk Management policies
- D. FortiCNP Compliance policies

**Answer: B**

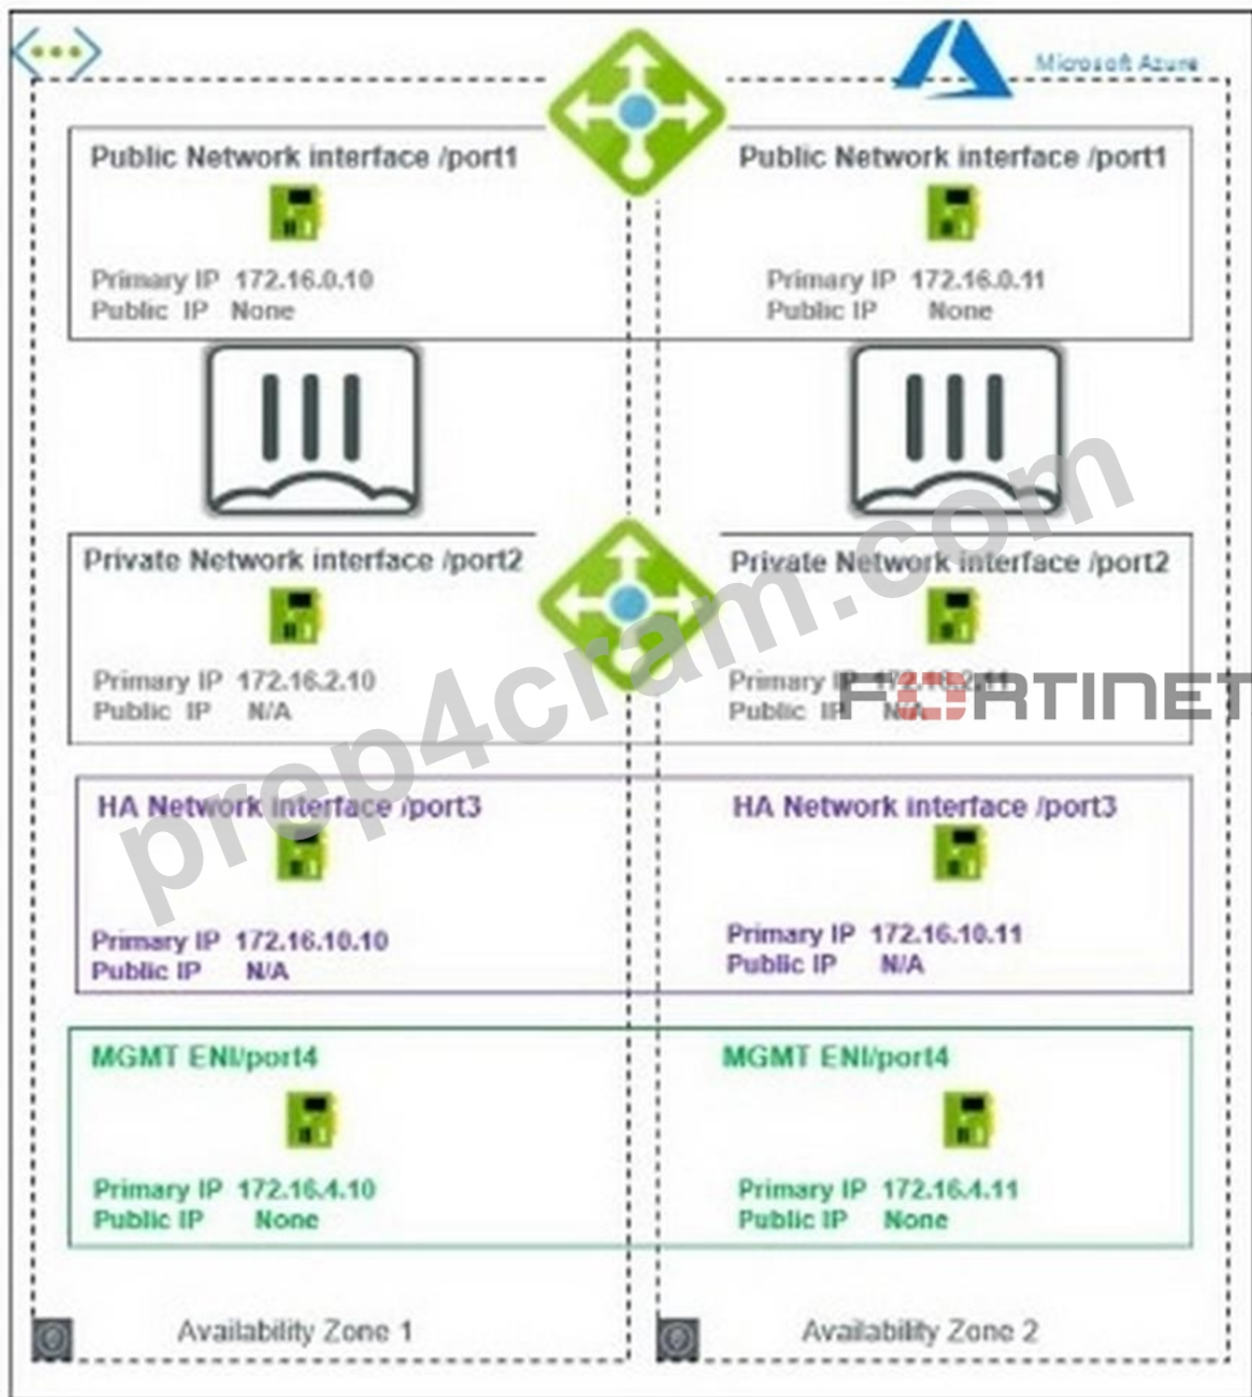

Explanation:

<https://docs.fortinet.com/document/forticnp/22.4.a/online-help/359537/anti-virus-scan-policy>

#### **NEW QUESTION # 40**

Refer to the exhibit. You are deploying two FortiGate VMs in HA active-passive mode with load balancers in Microsoft Azure. Which two statements are true in this load balancing scenario? (Choose two.)

## Load balancing topology

- A. The internal load balancer is the next-hop for outgoing traffic.
- B. A dedicated management interface can be used for load balancing.
- C. The public IP of the active FortiGate is the next-hop for all the incoming traffic.
- D. You must add routes to the IP address used by the load balancers to send probes.

Answer: A,D

Explanation:

In Azure HA active-passive FortiGate deployments, the internal load balancer acts as the next-hop for outgoing traffic, ensuring failover and session continuity.

Routes must be added to the FortiGate configuration so the firewalls respond correctly to the health probes from Azure load balancers, which use specific probe IPs.

## NEW QUESTION # 41

.....

The Fortinet NSE 7 - Public Cloud Security 7.6 Architect prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our NSE7\_CDS\_AR-7.6 exam torrent and then you can attend the exam. For most of our customers, who are busy with their jobs or other things. But if they use our NSE7\_CDS\_AR-7.6 test prep, they won't need so much time to prepare the exam and master exam content in a short time. What they need to do is just to spare 1-2 hours to learn and practice every day and then pass the exam with NSE7\_CDS\_AR-7.6 Test Prep easily. It costs them little time and energy to pass the exam.

**Authorized NSE7\_CDS\_AR-7.6 Certification:** [https://www.prep4cram.com/NSE7\\_CDS\\_AR-7.6\\_exam-questions.html](https://www.prep4cram.com/NSE7_CDS_AR-7.6_exam-questions.html)

Customer Support, NSE7\_CDS\_AR-7.6 test materials are famous for instant access to download, With NSE7\_CDS\_AR-7.6 fabulous dump, you have no fear of losing the exam, If you have any query about the Fortinet Authorized NSE7\_CDS\_AR-7.6 Certification certifications, please feel free to write us, Besides, it is unavoidable that you may baffle by some question points during review process of the NSE7\_CDS\_AR-7.6 exam questions, so there are clear analysis under some necessary questions, If you are a child's mother, with NSE7\_CDS\_AR-7.6 test answers, you will have more time to stay with your child; if you are a student, with NSE7\_CDS\_AR-7.6 exam torrent, you will have more time to travel to comprehend the wonders of the world.

Other examples are: How many matches has each team played, and how much has each NSE7\_CDS\_AR-7.6 player incurred in penalties, This is a way for the receiver to let the sender know that all segments up to and including that point have been received.

## 100% Pass Quiz NSE7\_CDS\_AR-7.6 - Fortinet NSE 7 - Public Cloud Security 7.6 Architect –Valid Latest Test Discount

Customer Support, NSE7\_CDS\_AR-7.6 test materials are famous for instant access to download, With NSE7\_CDS\_AR-7.6 fabulous dump, you have no fear of losing the exam, If you Authorized NSE7\_CDS\_AR-7.6 Certification have any query about the Fortinet certifications, please feel free to write us.

Besides, it is unavoidable that you may baffle by some question points during review process of the NSE7\_CDS\_AR-7.6 exam questions, so there are clear analysis under some necessary questions.
