NEW QUESTION # 141

Which of the following are the common deployment modes used by the CloudCampus Solution to Implement plug-and-play of devices?

- A. DHCP Option 148
- B. Registration query center deployment
- C. QR code scanning for deployment

Answer: A,B,C

Explanation:

Explanation

CloudCampus Solution is a cloud-based network management platform that provides plug-and-play of devices using three common deployment modes: QR code scanning for deployment, DHCP Option 148, and registration query center deployment. QR code scanning for deployment allows users to scan the QR code on the device label using a mobile app and automatically add the device to the cloud platform. DHCP Option 148 allows devices to obtain the cloud platform address from a DHCP server and automatically register with the cloud platform. Registration query center deployment allows devices to obtain the cloud platform address from a registration query center server and automatically register with the cloud platform. These deployment modes simplify the network configuration and management process and reduce the OPEX.
