156-536 Valid Exam Forum - Valid 156-536 Mock Test

[Feb 13, 2025] 156-536 Test Prep Training Practice Exam Questions Practice Tests [Q34-Q54]
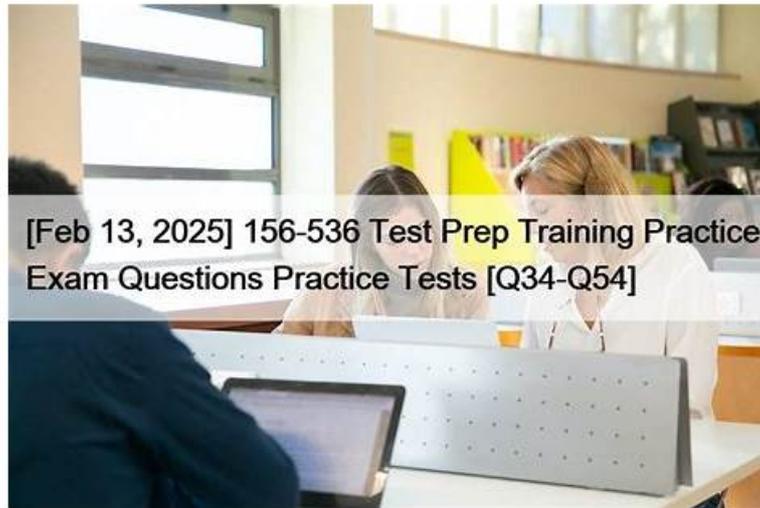

2026 Latest SureTorrent 156-536 PDF Dumps and 156-536 Exam Engine Free Share: https://drive.google.com/open?id=1gsMeORzBkEz1eMmZG-2XJ9mUdF0ohptK

The immediate downloading feature of our 156-536 certification guide is an eminent advantage of our products. Once the pay is done, our customers will receive an e-mail from our company. Our 156-536 exam study materials are available for downloading without any other disturbing requirements as long as you have paid successfully, which is increasingly important to an examinee as he or she has limited time for personal study for the 156-536 Exam. Therefore, our Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) guide torrent is attributive to high-efficient learning as you will pass the 156-536 exam only after study for 20 to 30 hours.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	• Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.
Topic 2	• Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.
Topic 3	• Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.
Topic 4	• Troubleshooting: In this final section, CheckPoint Security Administrators will demonstrate their troubleshooting skills related to Harmony Endpoint. This involves identifying and resolving issues that may arise during deployment or operation of the endpoint security solution.
Topic 5	• Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.
Topic 6	• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.

Valid 156-536 Mock Test - 156-536 Latest Braindumps

Dear customers, if you are prepared to take the exam with the help of excellent 156-536 learning materials on our website, the choice is made brilliant. Our 156-536 training materials are your excellent choices, especially helpful for those who want to pass the exam without bountiful time and eager to get through it successfully. Let us take a try of our amazing 156-536 Exam Questions and know the advantages first!

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q55-Q60):

NEW QUESTION # 55
When in the Strong Authentication workflow is the database installed on the secondary server?

- A. After Endpoint security is enabled
- B. After synchronization and before Endpoint security has been enabled
- C. Exactly when Endpoint security is enabled
- D. Before Endpoint security is enabled

Answer: B

NEW QUESTION # 56
What do Push Operations allow?

- A. Allow the Endpoint Security Management Server to push operations to client computers without installing policy
- B. Allows the Endpoint Security Management Server to operate independently of the Security Management Server
- C. Allow the Management Console to operate without installing policy
- D. Allow the Endpoint clients to push operations to other client computers without installing policy

Answer: A

Explanation:
The Check Point Harmony Endpoint documentation explicitly defines Push Operations as operations that the Endpoint Security Management Server (EMS) directly sends to client computers without requiring a policy installation. These operations are used for quick responses and remediation actions on endpoints without needing to deploy policy changes.
Exact Extract from Official Document:
"Push operations are operations that the server pushes directly to client computers with no policy installation required."
Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide.

NEW QUESTION # 57
What capabilities does the Harmony Endpoint NGAV include?

- A. Anti-Ransomware, Anti-Exploit & Behavioral Guard
- B. Threat Extraction, Threat-Emulation & Zero-Phishing
- C. Zero-Phishing, Anti-Bot & Anti-Virus
- D. Anti-IPS, Anti-Firewall & Anti-Guard

Answer: A

Explanation:
Harmony Endpoint's Next-Generation Anti-Virus (NGAV) is designed to combat advanced threats using a combination of behavioral analysis, exploit prevention, and ransomware protection. The documentation specifies that NGAV includesAnti-Ransomware,Anti-Exploit, andBehavioral Guardas core capabilities.
TheCP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdfoutlines these onpage 20, under "Endpoint Security Client":
"Harmony Endpoint Anti-Ransomware, Behavioral Guard and Forensics: Prevents ransomware attacks.
Monitors files and the registry for suspicious processes and network activity. Analyzes incidents reported by other components."

Additionally, onpage 358, under "Harmony Endpoint Threat Extraction, Emulation and Anti-Exploit":
"Anti-Exploit: Detects and prevents exploitation of vulnerabilities in software." While the term "NGAV" is not explicitly used, these components-Anti-Ransomware, Behavioral Guard, and Anti-Exploit-represent the next-generation approach to antivirus protection, focusing on behavior-based detection and prevention of advanced threats like exploits and ransomware. This matchesOption A.
The other options are incorrect:
* Option B ("Anti-IPS, Anti-Firewall & Anti-Guard"): These are not recognized capabilities in the documentation; they appear to be fabricated terms.
* Option C ("Zero-Phishing, Anti-Bot & Anti-Virus"): Zero-Phishing (page 366) and Anti-Bot (page
353) are separate features, and Anti-Virus is traditional, not NGAV-specific.
* Option D ("Threat Extraction, Threat-Emulation & Zero-Phishing"): These relate to document sanitization and phishing protection (pages 358-366), not NGAV's core focus.
Thus,Option Aaccurately reflects Harmony Endpoint NGAV capabilities.
References:
CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 20: "Endpoint Security Client" (lists Anti- Ransomware and Behavioral Guard).
CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 358: "Harmony Endpoint Threat Extraction, Emulation and Anti-Exploit" (mentions Anti-Exploit).

NEW QUESTION # 58

With which release of Endpoint Client is the Anti-Malware engine based on Sophos instead to Kaspersky?

- A. Endpoint Client release E86.26 and higher for Cloud deployments
- B. Endpoint Client release E84.40 and higher for all deployments
- C. Endpoint Client release E81.20 and higher for On-premises deployments
- D. Endpoint Client release E83.20 and higher for Cloud deployments

Answer: B

NEW QUESTION # 59

When is the heartbeat initiated?

- A. After the first sync
- B. Before the first sync.
- C. During the first sync
- D. After the last sync

Answer: A

NEW QUESTION # 60
