Rule: rule 5 permit ip source 10.0.2.0 0.0.254.255

- \* The first and third octets are checked exactly.
- \* The second and fourth octets can vary.
- \* This results in a match for IPs in the range 10.0.2.0 - 10.0.2.255.

Thus, the correct answer is D (10.0.2.1).

#### NEW QUESTION # 230

Refer to the graphic, 00e0-fc99-9999 is a specific host MAC address learned by a switch through ARP, and the host changes the IP address three times.

- **A. TRUE**
- B. FALSE

**Answer: A**

Explanation:

Detailed Explanation: In this scenario, the MAC address 00e0-fc99-9999 is associated with multiple IP addresses through dynamic ARP learning, indicating that the host's IP has changed several times. The ARP table on the switch shows multiple entries with different IPs mapped to the same MAC address, which is common when a device frequently updates its IP. As ARP is a dynamic protocol, these entries reflect the device's current and past IP associations. (Reference: HCIA-Datacom Training Material, ARP Operation and IP-MAC Mapping)

#### NEW QUESTION # 231

Assuming that an administrator is running the command shown in the figure on an AR2200 router, which of the following statements about the configuration is true?

- B. The saved configuration file will be replaced by the running configuration file.
- C. To clear the configuration file for next startup, select N.
- D. The configuration file for next startup is retained.

**Answer: A**

Explanation:

On Huawei routers running VRP, the reset saved-configuration command is used to delete the saved startup configuration file.

\* Option A (Incorrect): This command does not replace the saved configuration with the running configuration. Instead, it deletes the saved startup configuration.

\* Option B (Incorrect): The configuration file for the next startup is NOT retained. Instead, it is erased, meaning the device will boot with default settings if restarted.

\* Option C (Correct): Selecting Y (Yes) confirms the deletion of the saved startup configuration file, meaning the router will no longer have a saved configuration at the next reboot.

\* Option D (Incorrect): Selecting N (No) cancels the operation and keeps the saved startup configuration intact.

Thus, the correct answer is C. To clear the configuration file for next startup, select Y.
