# Nutanix NCP-EUC Questions Material Formats

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by PDFTorrent: https://drive.google.com/open?id=1EqUAfySdjfyF20BYR-diNJHdBmE4O_bi

One major difference which makes the Nutanix NCP-EUC exam dumps different from others is that the exam questions are updated after feedback from more than 90,000 professionals and experts around the globe. In addition, the Nutanix NCP-EUC Exam Questions are very similar to actual Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC exam questions. Hence, it helps you to achieve a high grade on the very first attempt.

The NCP-EUC certification exam is a challenging exam that tests your knowledge and skills in EUC. NCP-EUC exam consists of 60 multiple-choice questions that must be completed within 90 minutes. To pass the exam, you must score at least 300 out of 500 points. NCP-EUC exam is computer-based, and you can take it at any Pearson VUE testing center around the world.

Nutanix Certified Professional - End-User Computing (NCP-EUC) certification exam is an important credential for IT professionals who specialize in virtual desktop infrastructure (VDI). It is designed to assess an individual's knowledge of Nutanix's VDI solutions and their ability to install, configure, and manage these solutions. If you are an IT professional looking to advance your career in VDI, obtaining the NCP-EUC Certification can help you achieve your goals.

NCP-EUC Latest Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Exam Pdf & Free PDF Nutanix Realistic Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam

Every version of NCP-EUC study materials that we provide to you has its own advantage: the PDF version has no equipment limited, which can be read anywhere; the online version can use on any electronic equipment there is network available; the software version can simulate the Real NCP-EUC Exam environment to let you have more real feeling to NCP-EUC real exam, besides the software version can be available installed on unlimited number devices.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q179-Q184):

NEW QUESTION # 179

An administrator is creating a customized report. Both the "global" and "report" level have been applied.
What is the expected outcome?

- A. Report level will take precedence.
- B. Contradicting data will be highlighted.
- C. Global Level will take precedence.
- D. Report with two charts will be created.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix Prism Operations documents:
According to the Prism Central Intelligent Operations Guide regarding Reporting:
* Precedence Rule: When configuring reports, settings can be applied at a Global level (default for all reports) or overridden at the specific Report level.
* Outcome: The specific Report level settings take precedence over the Global level settings. This allows administrators to have a general standard while customizing specific reports for unique requirements without breaking the global standard.

NEW QUESTION # 180

A company is using Citrix for virtual desktops on Nutanix with AHV. The studio has 10,000 users who will be connecting to this infrastructure and have deployed a dedicated Files cluster for holding the user home shares.
Since this is a dedicated cluster with dual Intel 6242 28 GHz 16 Core processors and 192GB of RAM, what should be done for the FSVM and CVM configuration to allow for optimal performance?

- A. Increase the CVM vCPUs to 16 and the FSW vCPUs to 12.
- B. Increase the CVM RAM to 64GB and the FSVM RAM to 96GB.
- C. Leave the CVM vCPUs et 12 and increase the FSVM vCPUs to 8,
- D. Leave the CVM RAM at 32GB and increase the FSVM RAM to 96GB.

Answer: D

Explanation:

https://portal.nutanix.com/page/documents/solutions/details?targetId=TN-2041-Nutanix-Files:file-server-virtual-
https://next.nutanix.com/files-storage-71/command-line-access-to-nutanix-file-server-vm-fsvm-via-ssh-nutanix-f The file server VM (FSVM) is a virtual machine that runs on Nutanix Files and provides file services such as SMB shares and NFS exports. The FSVM is based on CentOS and incorporates all the security and hardening that goes into the Nutanix Controller VM (CVM)2. The CVM is a virtual machine that runs on each node of a Nutanix cluster and provides storage management, data protection, cluster coordination, and other services3.
The FSVMs have some default configuration settings that can be changed depending on your workload requirements. For example, you can change the number of vCPUs, RAM, network interfaces, or disk size of an FSVM2. However, you should not change these settings without consulting Nutanix Support first.
One of the factors that affects the performance of an FSVM is its memory allocation. The more memory an FSVM has, the more cache it can use for file operations. This can improve the throughput and latency of file serving workloads4. Therefore, increasing the FSVM RAM to 96GB can help optimize its performance for a large number of users.

NEW QUESTION # 181

When creating a Frame account, which two are valid Network Type options? (Choose two.)

- A. Private Network with VPN
- B. Public Network
- C. Express Route
- D. Private Network

Answer: A,B

Explanation:

https://docs.frame.nutanix.com/platform/admin/account-creation/
The Public Network option provides access to the Frame environment over the public internet, while the Private Network with VPN

option allows for a secure connection to the Frame environment over a private network using a VPN.

NEW QUESTION # 182
A company has started planning for migration to Windows 11. An administrator is looking over the requirements for boot and security settings at the VM level to prepare to build new base images.
Which option can the administrator exclude from the requirements list for running Windows 11 VMs on AHV?

- A. Credential Guard
- B. UEFI
- C. vTPM
- D. Secure Boot

Answer: A

Explanation:
According to Nutanix AHV support documentation for Windows 11, the operating system enforces strict hardware requirements for installation and booting. These mandatory requirements include:
* UEFI firmware (Legacy BIOS is not supported).
* Secure Boot enabled.
* vTPM (Virtual Trusted Platform Module) version 2.0.
Credential Guard is a security feature (Virtualization-Based Security) available in Windows 11 that protects credentials, but it is not a mandatory requirement to successfully install or boot the operating system. While Nutanix AHV supports Credential Guard, an administrator can validly exclude it from the minimum requirements list needed just to get the VMs running, whereas excluding vTPM, UEFI, or Secure Boot would cause the OS installation or boot process to fail.

NEW QUESTION # 183
An AHV-based virtual desktop user is reporting poor performance in a newly-provisioned VDI environment.
After investigating, an administrator discovers this VM configuration:
UEFI BIOS1
2 vCPU
8GB RAM
Windows 11
SCSI disk controller
Thin provisioned storage
VLAN tagged network
How should the administrator best improve performance?

- A. Use qemu-img to expand the vDisk.
- B. Add 2GB RAM to the VM.
- C. Connect the vNIC to the Native VLAN.
- D. Configure at least three vCPUs.2

Answer: D

Explanation:
According to Nutanix and Microsoft best practices for Windows 11 on AHV, the operating system has significantly higher CPU overhead compared to previous versions due to mandatory security features like Virtualization-Based Security (VBS) and Hypervisor-Protected Code Integrity (HVCI).
While the minimum requirement for Windows 11 is 2 vCPUs, this configuration is often insufficient for an acceptable user experience in a VDI environment where users are running concurrent applications.
Performance analysis indicates that 2 vCPUs results in high CPU Ready time and sluggishness. The recommended configuration to resolve these performance bottlenecks is to increase the CPU allocation to at least 3 vCPUs (typically 4 vCPUs is the standard "sweet spot" for Windows 11 VDI), ensuring enough compute cycles are available for both the OS overhead and user workloads.3

NEW QUESTION # 184
......

NCP-EUC certifications are one of the most popular certifications currently. Earning NCP-EUC certification credentials is easy, in first attempt, with the help of products. PDFTorrent is well-reputed brand among the professional. That provides the best preparation materials for NCP-EUC Certification exams. PDFTorrent has a team of NCP-EUC subject experts to develop the best products for NCP-EUC certification exam preparation.
