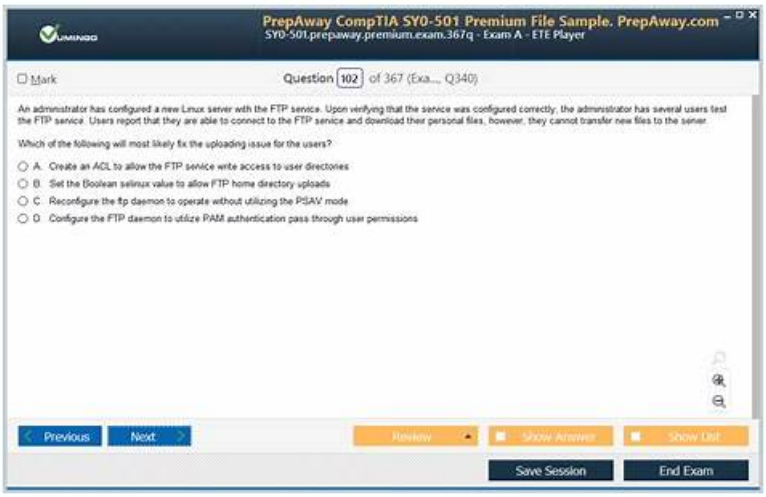
HPE7-A06 Test Questions Vce - HPE7-A06 Mock Test



P.S. Free & New HPE7-A06 dumps are available on Google Drive shared by Exams4Collection: https://drive.google.com/open?id=1pPrOBs_IS653HSp9uvoRYS13EYxKLVx0

Our HPE7-A06 study braindumps for the overwhelming majority of users provide a powerful platform for the users to share. Here, the all users of the HPE7-A06 exam questions can through own ID number to log on to the platform and other users to share and exchange, can even on the platform and struggle with more people to become good friend, pep talk to each other, each other to solve their difficulties in study or life. The HPE7-A06 Prep Guide provides user with not only a learning environment, but also create a learning atmosphere like home.

In today's highly developed and toughly competitive society, professional certificates are playing crucial importance for individuals like HPE7-A06. The choices of useful HPE7-A06 study materials have become increasingly various which serve to convey information about the HPE7-A06 Exam. And we have become a famous brand for we have engaged in this career. If you choose our HPE7-A06 practice engine, you will find the shortcut to the success.

HPE7-A06 Mock Test | Authentic HPE7-A06 Exam Questions

As the most important element that almost all the candidates will take into consider, the pass rate of our HPE7-A06 exam questions is high as 98% to 100%, which is unique in the market and no one has made it. And also the exam passing guarantee that makes our HPE7-A06 Study Guide superior in the market. As the best seller, our HPE7-A06 learning braindumps are very popular among the candidates. Many of the loyal customers are introduced by their friends or classmates.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q122-Q127):

NEW QUESTION # 122
You see the output unknown the first time you in the command, but the next time you see the following information displayed.
What aresome things you could took at in the switch to troubleshootthe issue? (Select two.)

- A. diag cable-diagnostic 1/1/X
- B. diag interface transceiver al
- C. diag interface 1/VX transceiver all
- D. diag 1/1/X transceiver all
- E. diag cable 1/1/X

Answer: A,D

Explanation:
The question involves troubleshooting an issue where the command output is initially unknown, but subsequent executions show

diagnostic information for an interface (1/1/X). The task is to identify appropriate diagnostic commands to troubleshoot the issue.
* Analysis of Options:
* Option A (diag interface transceiver al):Incorrect syntax; "al" is not a valid parameter.
* Option B (diag interface 1/VX transceiver all):Incorrect syntax; "1/VX" is not a valid interface format.
* Option C (diag cable-diagnostic 1/1/X):Correct. This command runs a cable diagnostic test (TDR) on interface 1/1/X to check for cable faults, such as opens or shorts.
* Option D (diag cable 1/1/X):Incorrect; "diag cable" is not a valid AOS-CX command.
* Option E (diag 1/1/X transceiver all):Correct. This command displays detailed transceiver information, including status, errors, and signal quality, useful for diagnosing interface issues.
* Why C and E are Correct:The diag cable-diagnostic 1/1/X command is used to perform TDR tests to identify cable faults, which could cause connectivity issues. The diag 1/1/X transceiver all command provides detailed transceiver diagnostics, such as power levels, errors, or hardware issues, helping pinpoint problems with the interface or connected device. These commands align with AOS-CX troubleshooting workflows for physical layer issues.
* Relevance to Certification Objectives:
* Troubleshooting (10%):Involves using diagnostic commands to troubleshoot campus network issues.
* Connectivity (9%):Includes identifying problem areas in device deployment, such as cabling or transceiver issues.
References:
HPE Aruba Networking AOS-CX Configuration Guide: Diagnostic Commands, covering cable diagnostics and transceiver diagnostics.
HPE7-A06Study Guide: Details troubleshooting tools for AOS-CX switches.
HPE Aruba Networking Technical Documentation: AOS-CX Troubleshooting, explaining diagnostic command usage.

NEW QUESTION # 123
Which minimal configurations must be completed for MSTP to work correctly? (Choose two.)

- A. creating MSTP instances
- B. revision number
- C. MSTP region
- D. MSTP enabled interfaces
- E. bridge priority number

Answer: B,C

Explanation:
For MSTP (Multiple Spanning Tree Protocol) to work correctly across switches, the following must match on all participating devices:
MSTP region name
MSTP revision number
VLAN-to-instance mapping (implied within the region definition)
These parameters define the MSTP region. Bridge priority and enabling interfaces are optional tuning steps, while instances themselves can be created after the region is defined.

NEW QUESTION # 124
Refer to the exhibit.
The customer has VSX clusters in two locations interconnected over on MC-LAG interface. You need to SVI to provide a seamless experience for clients connected to Edge-1 and Edge-2 switches to reach the default route if the resources are moved between the switches.
What needs to be done as an HPE Aruba Networking best practices?

- A. Configure active forwarding and use the same virtual IP and a different vMAC.
- B. Configure the active gateway and use the same virtual IP and vMAC.
- C. Configure the VXLAN interface and bind required SVIs as VNIs.
- D. Configure VRRP and load balance traffic using member properties.

Answer: B

Explanation:
With two VSX domains bridged via MC-LAG, the seamless default-gateway for mobile clients is achieved using Active Gateway

(anycast gateway). Configure the same virtual IP and the same vMAC for the SVI on both VSX pairs so hosts keep the same ARP/ND entry regardless of which site they attach to or when workloads move.

NEW QUESTION # 125
You are configuring an SSID that is using PSK as a security mechanism. Why should you use WPA3-Personal with WPA3 Transition Mode disabled?

- A. WPA3-Personal with Transition Mode disabled is mandatory for 5 GHz-enabled networks.
- B. WPA3-Personal with Transition Mode disabled is optional for 6 GHz-enabled networks as there is a built-in fallback to 5 GHz mode with WPA2.
- C. WPA3-Personal with Transition Mode disabled is mandatory for 6 GHz-enabled networks.
- D. WPA3-Personal with Transition Mode disabled should be used to prevent legacy clients from connecting to the network.

Answer: C

Explanation:
For Wi-Fi 6E (6 GHz) networks, WPA3-Personal (SAE) is mandatory, and WPA3 Transition Mode (which allows WPA2 clients) is not permitted. This ensures stronger security and prevents weaker WPA2 connections in the 6 GHz band.

NEW QUESTION # 126
Which command will permit read-only access to a user with physical access to an AOS-CS switch?

- A.
- B.
- C.
- D.

Answer: C

Explanation:
The question involves granting read-only access to a user with physical access to an AOS-CX switch. The task is to identify the correct command set.
* Analysis of Options (Assumed Context):Read-only access is typically configured using AAA with a privilege level or role. Option C is assumed to include commands like:
text
Copy
aaa authentication login privilege-mode
user operator password plaintext <password>
This assigns the "operator" role, which provides read-only access.
* Option A:Incorrect. Likely uses an incorrect role or privilege level (e.g., admin).
* Option B:Incorrect. May configure a role with excessive permissions or invalid syntax.
* Option C:Correct. Configures a user with the "operator" role for read-only access.
* Option D:Incorrect. Likely includes commands for a different access level or invalid configuration.
* Why Option C is Correct:In AOS-CX, the "operator" role provides read-only access, allowing users to view configurations and status (e.g., show commands) without modifying settings. The command user operator password plaintext <password> creates a local user with this role, and aaa authentication login privilege-mode ensures privilege levels are enforced upon login. This configuration is suitable for a user with physical access (e.g., via console or SSH), ensuring they cannot alter the switch, as per HPE Aruba Networking's AAA security practices.
* Relevance to Certification Objectives:
* Authentication/Authorization (9%):Configuring AAA for user access control.
* Security (10%):Implementing secure management access in customer networks.
* Troubleshooting (10%):Ensuring proper user permissions for network management.
