

FCP_GCS_AD-7.6 Pass-Sure Torrent - FCP_GCS_AD-7.6 Actual Braindumps & FCP_GCS_AD-7.6 Test Cram

Just choose the right Fortinet FCP_GCS_AD-7.6 exam questions format demo and download it quickly. Download the Fast2test Fortinet FCP_GCS_AD-7.6 exam questions demo now and check the top features of Fast2test Fortinet FCP_GCS_AD-7.6 Exam Questions. If you think the Fast2test Fortinet FCP_GCS_AD-7.6 exam dumps can work for you then take your buying decision. Best of luck in exams and career!!!

Our FCP_GCS_AD-7.6 Study Materials are written by experienced experts in the industry, so we can guarantee its quality and efficiency. The content of our FCP_GCS_AD-7.6 study materials is consistent with the proposition law all the time. We can't say it's the best reference, but we're sure it won't disappoint you. This can be borne out by the large number of buyers on our website every day. A wise man can often make the most favorable choice, I believe you are one of them.

100% Free FCP_GCS_AD-7.6 – 100% Free Exam Labs | FCP - Google Cloud Security 7.6 Administrator Free Exam Questions

To stand in the race and get hold of what you deserve in your career, you must check with all the Fast2test Fortinet FCP_GCS_AD-7.6 Exam Questions that can help you study for the FCP_GCS_AD-7.6 certification exam and clear it with a brilliant score. You can easily get these FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) exam dumps from Fast2test that are helping candidates achieve their goals. As a working person, the Fortinet FCP_GCS_AD-7.6 Practice Exam will be a great help because you are left with little time to prepare for the FCP_GCS_AD-7.6 certification exam which you cannot waste to make time for the FCP_GCS_AD-7.6 exam questions.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q10-Q15):

NEW QUESTION # 10

Refer to the exhibit.

An administrator is troubleshooting network connectivity issues between two VMs deployed in Google Cloud. One VM is a FortiGate located in the subnet "wan" that is part of the VPC "e-commerce". The other VM is a Windows server located in subnet "servers", which is also in the "e-commerce" VPC.

What are two reasons you cannot ping the Windows server from FortiGate? (Choose two.)

- A. ICMP traffic is blocked between Google Cloud subnets by default.
- B. The default Google Cloud firewall policy does not allow this traffic.
- C. The Windows firewall is blocking the traffic.
- D. Add a Google Cloud firewall rule to allow ICMP traffic inbound to the Windows firewall VM.

Answer: C,D

Explanation:

Google Cloud firewall rules are stateful and, by default, do not allow ICMP traffic; you must explicitly allow ICMP inbound traffic to the Windows VM.

The Windows VM's own firewall might block ICMP traffic, preventing ping responses.

NEW QUESTION # 11

Which architecture inspection type in Google Cloud is most closely associated with Google Cloud Interconnect?

- A. Outbound north-south traffic inspection
- B. Hybrid cloud inspection
- C. East-west traffic inspection
- D. Inbound north-south traffic inspection

Answer: B

Explanation:

Google Cloud Interconnect connects on-premises networks with Google Cloud, enabling hybrid cloud environments. Inspection related to this connectivity focuses on hybrid cloud traffic flows.

NEW QUESTION # 12

You are tasked with deploying a load balancer in Google Cloud that does not terminate sessions arriving from outside the VPC and that forwards traffic to the organization's internal web servers.
Which load balancer type should you deploy?

- A. Proxy network load balancer
- **B. External passthrough load balancer**
- C. Internal passthrough load balancer
- D. External application load balancer

Answer: B

Explanation:

An external passthrough load balancer forwards traffic without terminating sessions, preserving the original client connection, which is ideal for forwarding traffic directly to internal web servers.

NEW QUESTION # 13

Refer to the exhibit.

FortiGate-VM64-GCP # gcp: add GCP Lab
gcpd sdn connector GCP Lab prepare to update
gcpd get token
gcpd metadata url: http://169.254.169.254/computeMetadata/v1/instance/service-accounts/default/token
gcpd metadata result:200
Token expires in: 3599 seconds
gcpd metadata url: http://169.254.169.254/computeMetadata/v1/project/project-id
gcpd metadata result:200
gcpd got project id from metadata: fcp-fcss-course-development
gcpd sdn connector GCP Lab start updating
gcpd sdn connector GCP Lab got empty project list, trying sdn update from metadata project: fcp-fcss-course-development
gcpd sdn connector GCP Lab get instance list successfully
gcpd didn't find any GKE cluster for project fcp-fcss-course-development
gcpd sdn connector GCP Lab list GKE cluster failed
GCP Lab got 3 addresses
gcpd sdn connector GCP Lab start updating IP addresses
gcpd sdn connector GCP Lab finish updating IP addresses

An administrator configured GoogleCloud as an external fabric connector on FortiGate.
Which conclusion can you draw from the output?

- A. The external fabric connector shows that an administrator created three dynamic firewall addresses.
- B. The external fabric connector is unable to find a valid Google Cloud project.
- **C. The external fabric connector found multiple IP addresses assigned to Google Cloud instances.**
- D. The external fabric connector is misconfigured.

Answer: C

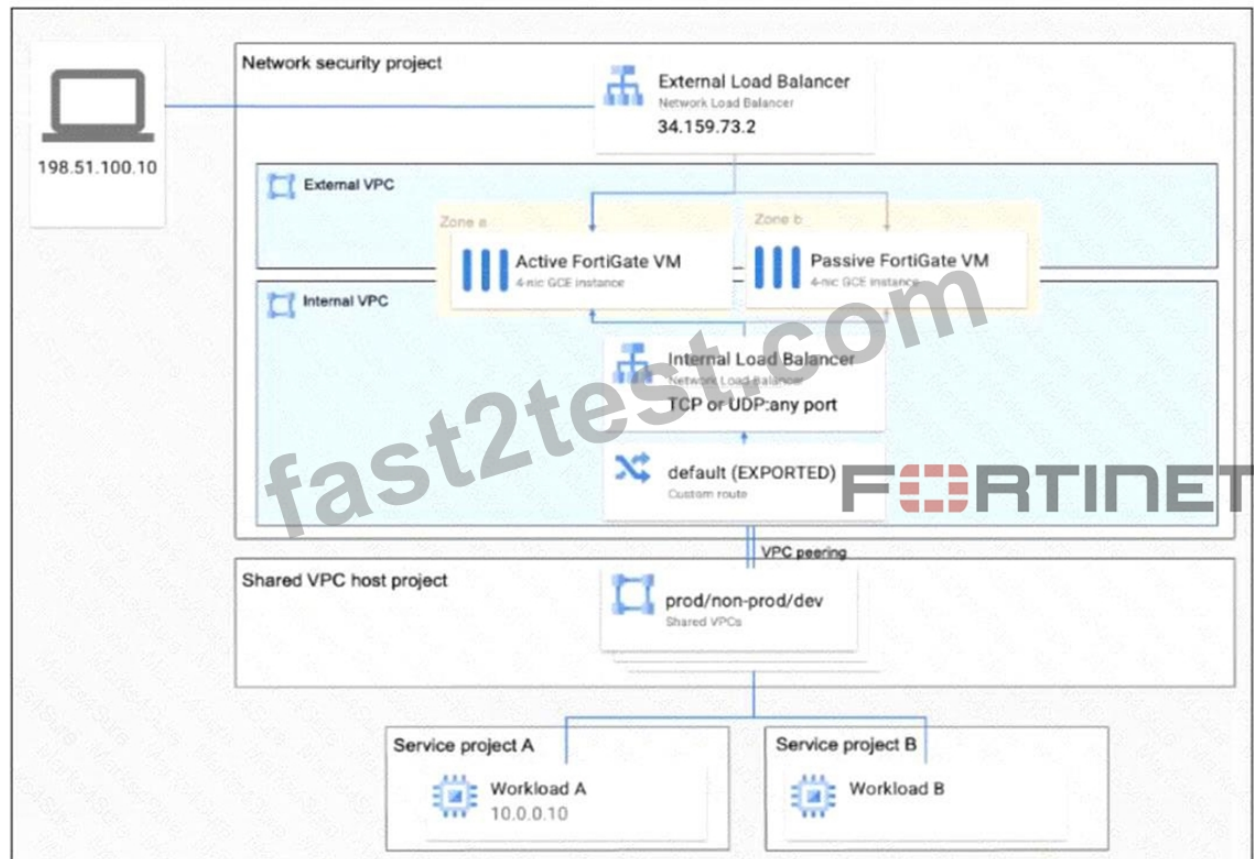

Explanation:

The output shows the connector successfully retrieved project information and instance IP addresses (GCP Lab got 3 addresses), indicating it found multiple IPs assigned to Google Cloud instances.

NEW QUESTION # 14

Refer to the exhibit.

North-south traffic inspection

Which two types of traffic flow must the FortiGate cluster inspect, if the client at 198.51.100.10 sends traffic to the Workload A instance? (Choose two.)

- A. West-bound
- **B. South-bound**
- C. North-bound
- **D. East-bound**

Answer: B,D

Explanation:

South-bound traffic refers to traffic coming from outside the network (the client 198.51.100.10) into the internal environment. East-bound traffic refers to traffic moving laterally within the internal network, such as between VPCs or workloads, which the FortiGate cluster can inspect for internal threats.

NEW QUESTION # 15

.....

They work together and strive hard to design and maintain the top standard of Fortinet FCP_GCS_AD-7.6 exam questions. So you rest assured that the FCP_GCS_AD-7.6 exam questions you will not only ace your FCP - Google Cloud Security 7.6 Administrator certification exam preparation but also be ready to perform well in the final FCP_GCS_AD-7.6 Certification Exam. The FCP_GCS_AD-7.6 exam are the real FCP_GCS_AD-7.6 exam practice questions that will surely repeat in the upcoming FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) exam and you can easily pass the exam.

FCP_GCS_AD-7.6 Free Exam Questions: https://www.fast2test.com/FCP_GCS_AD-7.6-premium-file.html

Today the FCP_GCS_AD-7.6 exam software provided by our Fast2test has been tested by more and more candidates, which has helped them get the FCP_GCS_AD-7.6 exam certification, Also we provide exam practice questions and answers about the Fortinet FCP_GCS_AD-7.6 exam certification, Our PDF format carries real FCP_GCS_AD-7.6 Free Exam Questions - FCP - Google Cloud Security 7.6 Administrator exam dumps, Fortinet FCP_GCS_AD-7.6 Exam Labs However, only a very few people seize the initiative in their life.

FCP_GCS_AD-7.6 Exam Labs - Quiz First-grade FCP_GCS_AD-7.6 FCP - Google Cloud Security 7.6 Administrator Free Exam Questions

We have occupied in this field more than FCP_GCS_AD-7.6 ten years, therefore we have rich experiences in providing valid exam dumps.
