

Dumps NVIDIA NCP-AIN Collection | Latest NCP-AIN Material

What's more, part of that Pass4sureCert NCP-AIN dumps now are free: <https://drive.google.com/open?id=1mLCBjHF95LhuTVfS0yVDJNvV4b-tRLNo>

You can also become part of this skilled and qualified community. To do this you must enroll in the Network Security Specialist NCP-AIN certification exam and start preparation with real and valid NVIDIA-Certified Professional AI Networking (NCP-AIN) exam practice test questions right now. The Pass4sureCert NCP-AIN Exam Practice test questions are checked and verified by experienced and qualified NCP-AIN exam trainers. So you can trust Pass4sureCert NCP-AIN exam practice test questions and start preparation with confidence.

The pass rate for NCP-AIN learning materials is 98.35%, and pass guarantee and money back guarantee if you fail to pass the exam. NCP-AIN exam dumps are verified by experienced specialists, therefore, we can guarantee the correctness of the answers. NCP-AIN Learning Materials of us will give you free update for 365 days after purchasing, and the latest version will send to your email box automatically. If you have any other questions about the NCP-AIN exam dumps, just contact us.

Latest NCP-AIN Material | NCP-AIN Standard Answers

We provide our customers with the most reliable learning materials about NCP-AIN certification exam and the guarantee of pass. We assist you to prepare the key knowledge points of NCP-AIN actual test and obtain the up-to-dated exam answers. All NCP-AIN Test Questions offered by us are tested and selected by our senior experts in IT field, which only need little time to focus on the practice and the preparation.

NVIDIA-Certified Professional AI Networking Sample Questions (Q37-Q42):

NEW QUESTION # 37

When upgrading DOCA on a BlueField DPU, what command should first be run on the host?

- A. sudo apt-get upgrade doca
- B. sudo apt-get install doca
- C. sudo apt-get autoremove
- D. /usr/sbin/ofed_uninstall.sh -force

Answer: D

Explanation:

Before upgrading the DOCA SDK on a BlueField DPU, it is mandatory to uninstall the existing OFED drivers to prevent compatibility conflicts.

From the NVIDIA DOCA Installation Guide:

"Before upgrading DOCA or BlueField-related software, you must remove existing OFED packages using: /usr/sbin/ofed_uninstall.sh -force." This ensures:

- * Clean driver state
- * No residual kernel modules or userspace libraries
- * Proper registration of new DOCA/OFED versions

Incorrect Options:

- * A and C may not resolve conflicts.
- * D installs but doesn't remove conflicting packages.

Reference: DOCA SDK Installation - Uninstall OFED Requirement

NEW QUESTION # 38

Which service on Cumulus switches can monitor layer 1, layer 2, layer 3, tunnel, buffer, and ACL related issues?

- A. ONIE
- B. WJH
- C. NCLU
- D. BGP

Answer: B

Explanation:

The "What Just Happened" (WJH) service on Cumulus switches provides real-time visibility into network problems by monitoring various layers and components, including layer 1, layer 2, layer 3, tunnel, buffer, and Access Control List (ACL) related issues. WJH streams detailed and contextual telemetry data, enabling administrators to diagnose and troubleshoot network problems effectively.

Reference Extracts from NVIDIA Documentation:

- * "WJH can monitor layer 1, layer 2, layer 3, tunnel, buffer and ACL related issues."
- * "The WJH service enables you to diagnose network problems by looking at dropped packets."

NEW QUESTION # 39

In Cumulus Linux, which technology enables the ability to provide active-active redundancy to servers, without the need for direct inter-switch links?

- A. EVPN Multi-homing
- B. MLAG
- C. VSS

Answer: A

Explanation:

EVPN Multi-homing enables active-active redundancy without inter-switch links by using overlay routing over VXLAN and distributed control plane using BGP EVPN.

From the official NVIDIA Cumulus Linux EVPN Multihoming Documentation:

"EVPN multihoming allows multiple Top-of-Rack (ToR) switches to connect to the same server while maintaining full layer-2 redundancy without the need for inter-switch links or traditional MLAG configuration." Key benefits:

- * Simplified topology (no ISL/peer-link needed)
- * BGP-based control plane
- * Fast convergence

* Active-active links per host NIC

Incorrect Options:

* MLAG requires ISL between switches and peer-link configuration.

* VSS (Virtual Switching System) is a Cisco term, not supported in NVIDIA networking.

Reference: Cumulus Linux Docs - EVPN Multihoming

NEW QUESTION # 40

You are concerned about potential security threats and unexpected downtime in your InfiniBand data center.

Which UFM platform uses analytics to detect security threats, operational issues, and predict network failures in InfiniBand data centers?

- A. Enterprise Platform
- **B. Cyber-AI Platform**
- C. Host Agent
- D. Telemetry Platform

Answer: B

Explanation:

The NVIDIA UFM Cyber-AI Platform is specifically designed to enhance security and operational efficiency in InfiniBand data centers. It leverages AI-powered analytics to detect security threats, operational anomalies, and predict potential network failures. By analyzing real-time telemetry data, it identifies abnormal behaviors and performance degradation, enabling proactive maintenance and threat mitigation.

This platform integrates with existing UFM Enterprise and Telemetry services to provide a comprehensive view of the network's health and security posture. It utilizes machine learning algorithms to establish baselines for normal operations and detect deviations that may indicate security breaches or hardware issues.

Reference: NVIDIA UFM Cyber-AI Documentation v2.9.1

NEW QUESTION # 41

When utilizing the `ib_write_bw` tool for performance testing, what does the `-S` flag define?

- **A. Which service level to use**
- B. The maximum rate of sent packages
- C. The burst size
- D. The number of QPs

Answer: A

Explanation:

From NVIDIA Performance Tuning Guide (`ib_write_bw` Tool Usage):

"-S <SL>: Specifies the Service Level (SL) to use for the InfiniBand traffic. SL is used for setting priority and mapping to virtual lanes (VLs) on the IB fabric." This flag is useful when testing QoS-aware setups or validating SL/VL mappings.

Incorrect Options:

* A- No such flag for burst size.

* B- `-q` defines number of QPs.

* C- `--rate` or `-R` is used for rate-limiting.

NEW QUESTION # 42

.....

The advent of our NCP-AIN study guide with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Rather than insulating from the requirements of the NCP-AIN real exam, our NCP-AIN practice materials closely correlated with it. And their degree of customer's satisfaction is escalating. Besides, many exam candidates are looking forward to the advent of new NCP-AIN versions in the future.

Latest NCP-AIN Material: <https://www.pass4surecert.com/NVIDIA/NCP-AIN-practice-exam-dumps.html>

Your NCP-AIN certification success is just a step away and is secured with 100% money back guarantee, We are still moderately developing our latest NCP-AIN exam torrent all the time to help you cope with difficulties, NVIDIA Dumps NCP-AIN Collection after a certain period of time according to the selected package (1 month, 3 months, 6 months or 1 year) it is re-billed automatically by the payment processor, NVIDIA Dumps NCP-AIN Collection My fingers are crossed.

Warehousing cost should also be minimized because the company NCP-AIN Valid Dumps Sheet is maintaining only a single facility instead of several locations, No one will crack your passwords.

Your NCP-AIN Certification success is just a step away and is secured with 100% money back guarantee, We are still moderately developing our latest NCP-AIN exam torrent all the time to help you cope with difficulties.

NCP-AIN practice materials & NCP-AIN real test & NCP-AIN test prep

after a certain period of time according to the selected package NCP-AIN (1 month, 3 months, 6 months or 1 year) it is re-billed automatically by the payment processor, My fingers are crossed.
